

PLATFORM DEPOSIT GUIDELINES AND Q&As

Welcome to our poker platform – the first poker platform to offer five different cryptocurrencies as payment options! Each coin operates uniquely, and both mobile and browser extension wallets function in their own ways. To ensure smooth gameplay, fast transactions and secure handling of your funds, it's essential that you read these guidelines carefully. They will walk you through everything you need to know about wallet connection for deposits on each chain, withdrawals and other hot tips for ensuring you manage your funds well on the site. A few minutes of reading now, will save you time – and possibly crypto! – later.

TOP TIPS

- You can switch chains by clicking on the currency in the top right corner of the home screen.
- The deposit guidelines below give instructions from the Home screen.
- If you are using an iPhone for gameplay, you can login to Instantplay on Safari using the Instantplay link as an alternative to the android app (iPhone app is not currently available).
- If you do not wish to download the android app, you can opt to use the Instantplay link on chrome browser on your android device.
- Instantplay on mobile will mostly function the same as Instantplay on desktop but there are some things to note when depositing on mobile, so please ensure you read the information in full for the chain you wish to deposit on.

XRP DEPOSITS

Q1: How do I deposit XRP tokens?

A: Windows App

Click on cashier (top left) > and deposit (from the drop-down menu) and enter the amount you wish to deposit. A QR code will pop up for Xaman. Scan the code and sign off the deposit in your wallet. The credit will appear on your account once the transaction is processed successfully.

B: Instantplay

Click on the 3 lines at the top left of the home screen and click on cashier. Enter the amount you wish to deposit. A QR code will pop up for Xaman. Scan the code and sign off the deposit in your wallet. The credit will appear on your account once the transaction is processed successfully. If you are accessing instantplay on a mobile browser, the sign request will automatically open in Xaman app.

C: Android App

Click on the 3 lines at the top left of the home screen and click on cashier. Enter the amount you wish to deposit. A QR Code will pop up for Xaman. Click on sign request and then open in Xaman and sign off the deposit in your wallet. The credit will show on your account once the transaction is processed successfully.

Q2: Are there any fees for depositing XRP?

Network transaction fees apply.

Q3: How long does it take for XRP deposits to reflect in my account?

Deposits will reflect as soon as the transaction is processed – for XRP this is usually immediate.

Q4: Can I deposit from an exchange wallet?

Xaman is currently the only supported wallet for XRP.

AVAX DEPOSITS

Q1: How do I deposit AVAX tokens?

AVAX deposits are currently only available on Windows App and Instantplay via Desktop. Mobile deposits via Android App or Instantplay on Mobile browser are not available. This will be implemented soon!

A: Windows App

Click on cashier (top left) > and deposit (from the drop-down menu) and enter the amount you wish to deposit. You will be directed to a payment gateway with a list of available deposit methods. If you select Wallet Connect a QR code will appear where you can connect with the payment page from within your AVAX wallet by opening the wallet and scanning the code and approving the connection. Once connected, the pop up window will confirm connection and display the transaction amount with an option to 'send transaction'. Click on send transaction and approve in your wallet. The credit will appear on your account once the transaction is processed successfully.

Alternative options include Metamask, Keplr and Leap extensions. Follow the steps to connect to your required wallet via your browser extension and approve the transaction.

B: Instantplay on Desktop

Click on the 3 lines at the top left of the home screen and click on cashier. Enter the amount you wish to deposit. You will be directed to a payment gateway with a list of available deposit methods. If you select Wallet Connect a QR code will appear where you can connect with the payment page from within your AVAX wallet app by opening the wallet, scanning the code and approving the connection. Once connected, the pop up window will confirm connection and display the transaction amount with an option to 'send transaction'. Click on send transaction and approve in your wallet. The credit will appear on your account once the transaction is processed successfully.

Alternative options include Keplr and Leap extensions. Follow the steps to connect to your required wallet via your browser extension and approve the transaction.

Q2: Are there any fees for depositing Avax?

Network transaction fees apply.

Q3: How long does it take for Avax deposits to reflect in my account?

Deposits will reflect as soon as the transaction is processed – for Avax this is usually within minutes.

Q4: Can I deposit from an exchange wallet?

Deposits are only available via the listed options on the payment gateway page.

SOLANA DEPOSITS

Q1: How do I deposit SOLANA tokens?

A: Windows App

Launch the windows app from your desktop and sign in. Click on cashier (top left) > and deposit (from the drop-down menu) and enter the amount you wish to deposit. A pop up screen will display a QR code and a Solana address – here you have two options to deposit. You can either click on the 'copy address' option and pay this address directly from your Solana wallet or you can open your Solana wallet and scan the QR code to pay the address that way. Once your transaction is signed off and the funds arrive in the wallet it will be applied to your account.

B: Instantplay

Click on the 3 lines at the top left of the home screen and click on cashier. Enter the amount you wish to deposit. A new window will open with a QR code and a Solana address – here you have two options to deposit. You can either click on the 'copy address' option and pay this address directly from your Solana wallet or you can open your Solana wallet and scan the QR code to pay the address that way. Once your transaction is signed off and the funds arrive in the wallet it will be applied to your account. The process is the same if you are using Instantplay on mobile.

C: Android App

Click on the 3 lines at the top left of the home screen and click on cashier. Enter the amount you wish to deposit and click on deposit. The screen will display a QR code and a Solana address – here you have two options to deposit. You can either click on the 'copy address' option and pay this address directly from your Solana wallet or you can open your Solana wallet and scan the QR code to pay the address that way. Once your transaction is signed off and the funds arrive in the wallet it will be applied to your account.

Q2: Are there any fees for depositing SOL?

Network transaction fees apply. Solana deposits are powered by Nowpayments which incurs an additional base fee of 0.7% which will reflect in your deposit balance.

Q3: How long does it take for SOL deposits to reflect in my account?

Deposits will reflect as soon as the transaction is processed – as Solana payments are processed via Nowpayments, this can sometimes take up to 15 minutes.

Q4: Can I deposit from an exchange wallet?

As deposits for Solana are sent directly from your wallet via Nowpayments to your Solana address on the LocoEvo platform, you can send SOL from any wallet you prefer. Ensure the amount you send matches the amount you entered in the deposit field; allowing for any additional fees applied by the exchange you're using.

COREUM DEPOSITS

Q1: How do I deposit COREUM tokens?

NOTE: Once you have completed your deposit – disconnect your wallet on the payment processing page. If you are showing as already connected from a previous deposit, you will need to disconnect your wallet first and press connect wallet again. This will avoid any issues with the transaction sending to your wallet for approval.

A: Windows App

Click on cashier (top left) > and deposit > enter the deposit amount. A payment page will open in your desktop browser. Click on Connect wallet and select the wallet you wish to connect to. Wallet options available are Keplr and Leap extensions or Keplr and Leap mobile wallet apps. Follow the steps to connect wallet and approve the connection from the selected wallet. This will return you to the payment page where the transaction amount will show with the option to 'send' the transaction. Hit send and then sign off the transaction in your wallet. The credit will appear on your account once the transaction is processed successfully.

B: Instantplay on Desktop

Click on cashier (top left) > and deposit > enter the amount you wish to deposit. A payment page will open in your desktop browser. Click on Connect wallet and select the wallet you wish to connect to. Wallet options available to connect to are Keplr and Leap extensions or Keplr and Leap mobile wallet apps. Follow the steps to connect wallet and approve the connection from the selected wallet. This will return you to the payment page where the transaction amount will show and the option to 'send' the transaction. Hit send and then sign off the transaction in your wallet. The credit will appear on your account once the transaction is processed successfully.

C: Android App

Click on cashier from the top left drop down menu bar > deposit > enter the amount you wish to deposit. A payment page will open in your mobile browser. Here you need to select **Keplr mobile** for deposits. Follow the steps to open your Keplr mobile app and sign off the transaction. Once connection is established with Keplr mobile app, return to the payment processing page to then 'send' the deposit transaction to Keplr to approve. For Leap mobile app deposits you can use the below method and then return to Android app for gameplay.

To deposit Coreum on Android app or Instantplay for mobile, using the Leap mobile app, you will need to access the Instantplay link from within your Leap app Browser. Copy the Instantplay link into the browser within the leap mobile app, sign in and follow the steps to deposit as above, then connect to leap that way. This is a wallet limitation and is the easiest way to deposit Coreum with leap on mobile for mobile users. You can then return to android app for gameplay.

Q2: Are there any fees for depositing Coreum?

Network fees apply.

Q3: How long does it take for Coreum deposits to reflect in my account?

Deposits will reflect as soon as the transaction is processed – for COREUM this is usually immediate.

Q4: Can I deposit from an exchange wallet?

Coreum deposits are currently supported via Keplr and Leap wallets only.

HBAR DEPOSITS

Q1: How do I deposit HBAR tokens?

For HBAR there are two depositing methods available from within the LocoEvo application. If you have Hashpack extension installed on your browser you can select the HASHPACK deposit method from the dropdown menu above the deposit amount field. If you do not have Hashpack extension, you will need to select HBAR deposit (option 2) from the dropdown menu above the deposit amount field.

For Windows app and Instantplay on desktop, click deposit and select the Hashpack deposit method, enter the amount and then click on deposit - a payment screen will open with the hashpack extension connection option. Click on Pair with Hashpack and log in to your extension. Follow the steps to connect, send transaction and sign. The deposit will appear in your LocoEvo account.

HBAR deposit (option 2) can be used as an alternative deposit option on all platforms if you do not have desktop with hashpack extension available. This method will provide you with a wallet address and memo tag to deposit hbar to. Follow the steps to deposit and the amount will reflect in your LocoEvo account when processed. This method is supported by Nowpayments and may have a slightly longer processing time. HBAR deposit (option 2) should always be selected for deposits via the Android app and mobile phone Instantplay.

Q2: Are there any fees for depositing HBAR?

Network fees apply for deposits via hashpack extension.

An additional base fee of 0.7% applies for HBAR deposit option 2 as this process is supported via Nowpayments. This will reflect in your deposit amount when processed.

Q3: How long does it take for HBAR deposits to reflect in my account?

Hashpack extension deposits are usually immediate whereas deposits via Nowpayments may take up to 15 minutes.

Q4: Can I deposit from an exchange wallet?

Yes, if using HBAR deposit Option 2.

NOTES:

- Always double-check that you are sending tokens to the correct network address when using deposit methods that do not require wallet connection.
- Minimum deposit amounts apply for each chain. You will receive an error message if you are attempting to deposit an amount below the minimum.
- Avoid sending unsupported tokens to your deposit address—they may be lost permanently.
- To view your transaction history go to cashier > transaction history.
- Minimum deposits apply - AVAX (0.01) SOLANA (0.01) XRP (1) HBAR (1) COREUM (1)

Withdrawals

Q1: How do I withdraw my funds?

1. Go to the withdraw section under 'cashier' on the required chain.
2. Enter the amount you wish to withdraw.
3. Paste your wallet address.
4. Confirm the transaction.

Q2: Are there fees for withdrawals?

No

Q3: How long do withdrawals take?

Withdrawals are subject to account checks and manual verification and processing. For this reason, withdrawals can take up to 48 hours, but we will always endeavor to have these processed as soon as possible.

Q3: Can I withdraw to an exchange wallet?

No

- **Always verify your wallet address before confirming a withdrawal.**
- **Withdrawals to exchange wallets are not supported.**
- **Large withdrawals may require extra security checks.**
