

Core Homies Whitepaper 2025 v1.

A new direction and vision for all Homies holders...

CORE
HOMIES

Introduction

Core Homies is an innovative, community-driven NFT project on the Coreum Network and part of the broader Blockchain Homies initiative— which began as a cross-chain NFT project on Coreum and Hedera (Hbar Homies).

Following our initial launch on both chains, the project has experienced several challenges. An exciting relaunch is now on the horizon that will see the project both streamlined and improved, with our valued homies community set to reap the benefits!

Hbar Homies holders will soon be bridged to Coreum and exciting rewards await.

Why the Relaunch & Move from HBAR

The Core Homies collection initially launched on Coreum via the Rize Marketplace. After the v3 update to the Coreum Network, minting changed to on-chain, making some NFTs invisible. The Rize marketplace is now undergoing a major upgrade, introducing a slick, user-friendly UI to support Coreum NFTs and solidify Rize as a leading NFT marketplace on the blockchain.

To streamline the project and focus on our strongest communities, Hbar Homies holders will be moved to Coreum and receive Core Homies NFTs to replace their current holdings. The original Hbar Homies team is no longer active, and traction on HBAR was unfortunately limited. NFT Evolutionz (the parent company of Homies) is an XRPL and Coreum focused ecosystem with a team and community that is active, trusted, and deeply integrated within the space.

Current Core Homies holders will receive the same NFTs originally minted, directly to their coreum wallet. We have a snapshot of all wallets with the NFT numbers and tiers minted in order to coordinate this with the help of the dev team at Rize marketplace.

By consolidating on Coreum, we maintain a single thriving ecosystem, simplify management, and maximize value for holders!

Our mission remains clear: to bring fun, style, and tangible rewards to our holders while driving Coreum adoption through innovative NFT experiences.

Supply

Core Homies Collection

Supply & Minting – collection size and price at relaunch will remain the same as the original whitepaper:

- Total Supply: 1,000 NFTs
- Mint Price: 350 Coreum

The collection is designed to remain exclusive, ensuring a strong secondary market while keeping the artwork fresh and unique. A limited collection of this size means fewer points in

circulation which reduces dilution and allows each holder to receive a larger share of the monthly rewards allocation.

H Cards

Hbar H Cards will be replaced with Coreum H Cards in a like for like swap.

Hbar H Cards were originally sold for the perk of receiving a guaranteed Gold Tier NFT on Hedera, as well as receiving a 10% discount on all future mints on all chains. The H cards will be bridged to Coreum to offer continued and seamless utility. Further information on continued utility for this collection is below.

Utility

Central to the **Core Homies** relaunch is Utility. The **Core Homies** community will be rewarded by simply holding their NFTs in their wallet.

The team has been actively staking funds generated from the original sales of Core Homies (minus operational and art costs), and accumulated a staking pot of 61,000 \$Coreum

50% of funds generated monthly through staking will be distributed to holders from the first full month after the relaunch. These funds will be airdropped to holders and allocated according to NFT points held.

10% of funds generated monthly through staking will be distributed monthly to H Card holders, as an additional perk for our original Hbar community, serving as a compensatory mechanism for the Hbar projects challenges. This will be paid in \$Coreum and airdropped to holders according to how many H Cards they hold on Coreum (after they've bridged). This ensures continued value and the ability for continued trading of H Cards. A snapshot has been taken of all Hbar H Card holders, and the swap process is outlined below. The 10% discount still stands on all future mints of Core Homies until they sell out.

10% of funds generated monthly through staking will be distributed to Verified Homies holders in Discord via access to raffles, giveaways, and freeroll poker games exclusive to the Homies community.

The remaining 30% of monthly staking rewards will be compounded to continue increasing the rewards pot and ensure a sustainable rewards system **with no end date**. This means Homies will receive continued rewards and retain their value long term!

At each 6-month interval, 10% of the pot will be un-staked and moved to the NFTE treasury account to cover continued operational costs for the project.

Points Structure

Core Homies NFTs will be allocated points based on rarity. This will feed into a project Richlist that will reflect holders' wallets to confirm points held. The Rewards pot will be

divided by total points in circulation and then paid to each wallet according to their points total.

We will have a 4 Tier point system.

Tier 1 – 1 point (Original Tier – 90% of the supply – 900 in total)

Tier 2 – 2 points (Gold Tier – 7% of the supply – 70 in total)

Tier 3 – 3 points (Diamond Tier – 3% of the supply – 30 in total)

The original plan for the 4th Tier will be permanently discontinued. This ensures the points stay low and the collection remains at 1000. Further plans for expansion will be presented to the community with voting in place to ensure full support and sound reasoning.

H Cards will have a value of 1 point per NFT for the purpose of rewards distribution of the allocated 10% of staking funds.

Bridging to Coreum

HBAR Holder Bridge – How It Works

- Snapshot: Conducted on 18/09/25 for HBAR Golds and Main Collection holders, capturing points and NFT ownership.
- 154 minted from main HBAR collection → 170 points
- 250 Golds minted via H Cards → 500 points
- Total points to bridge: 670

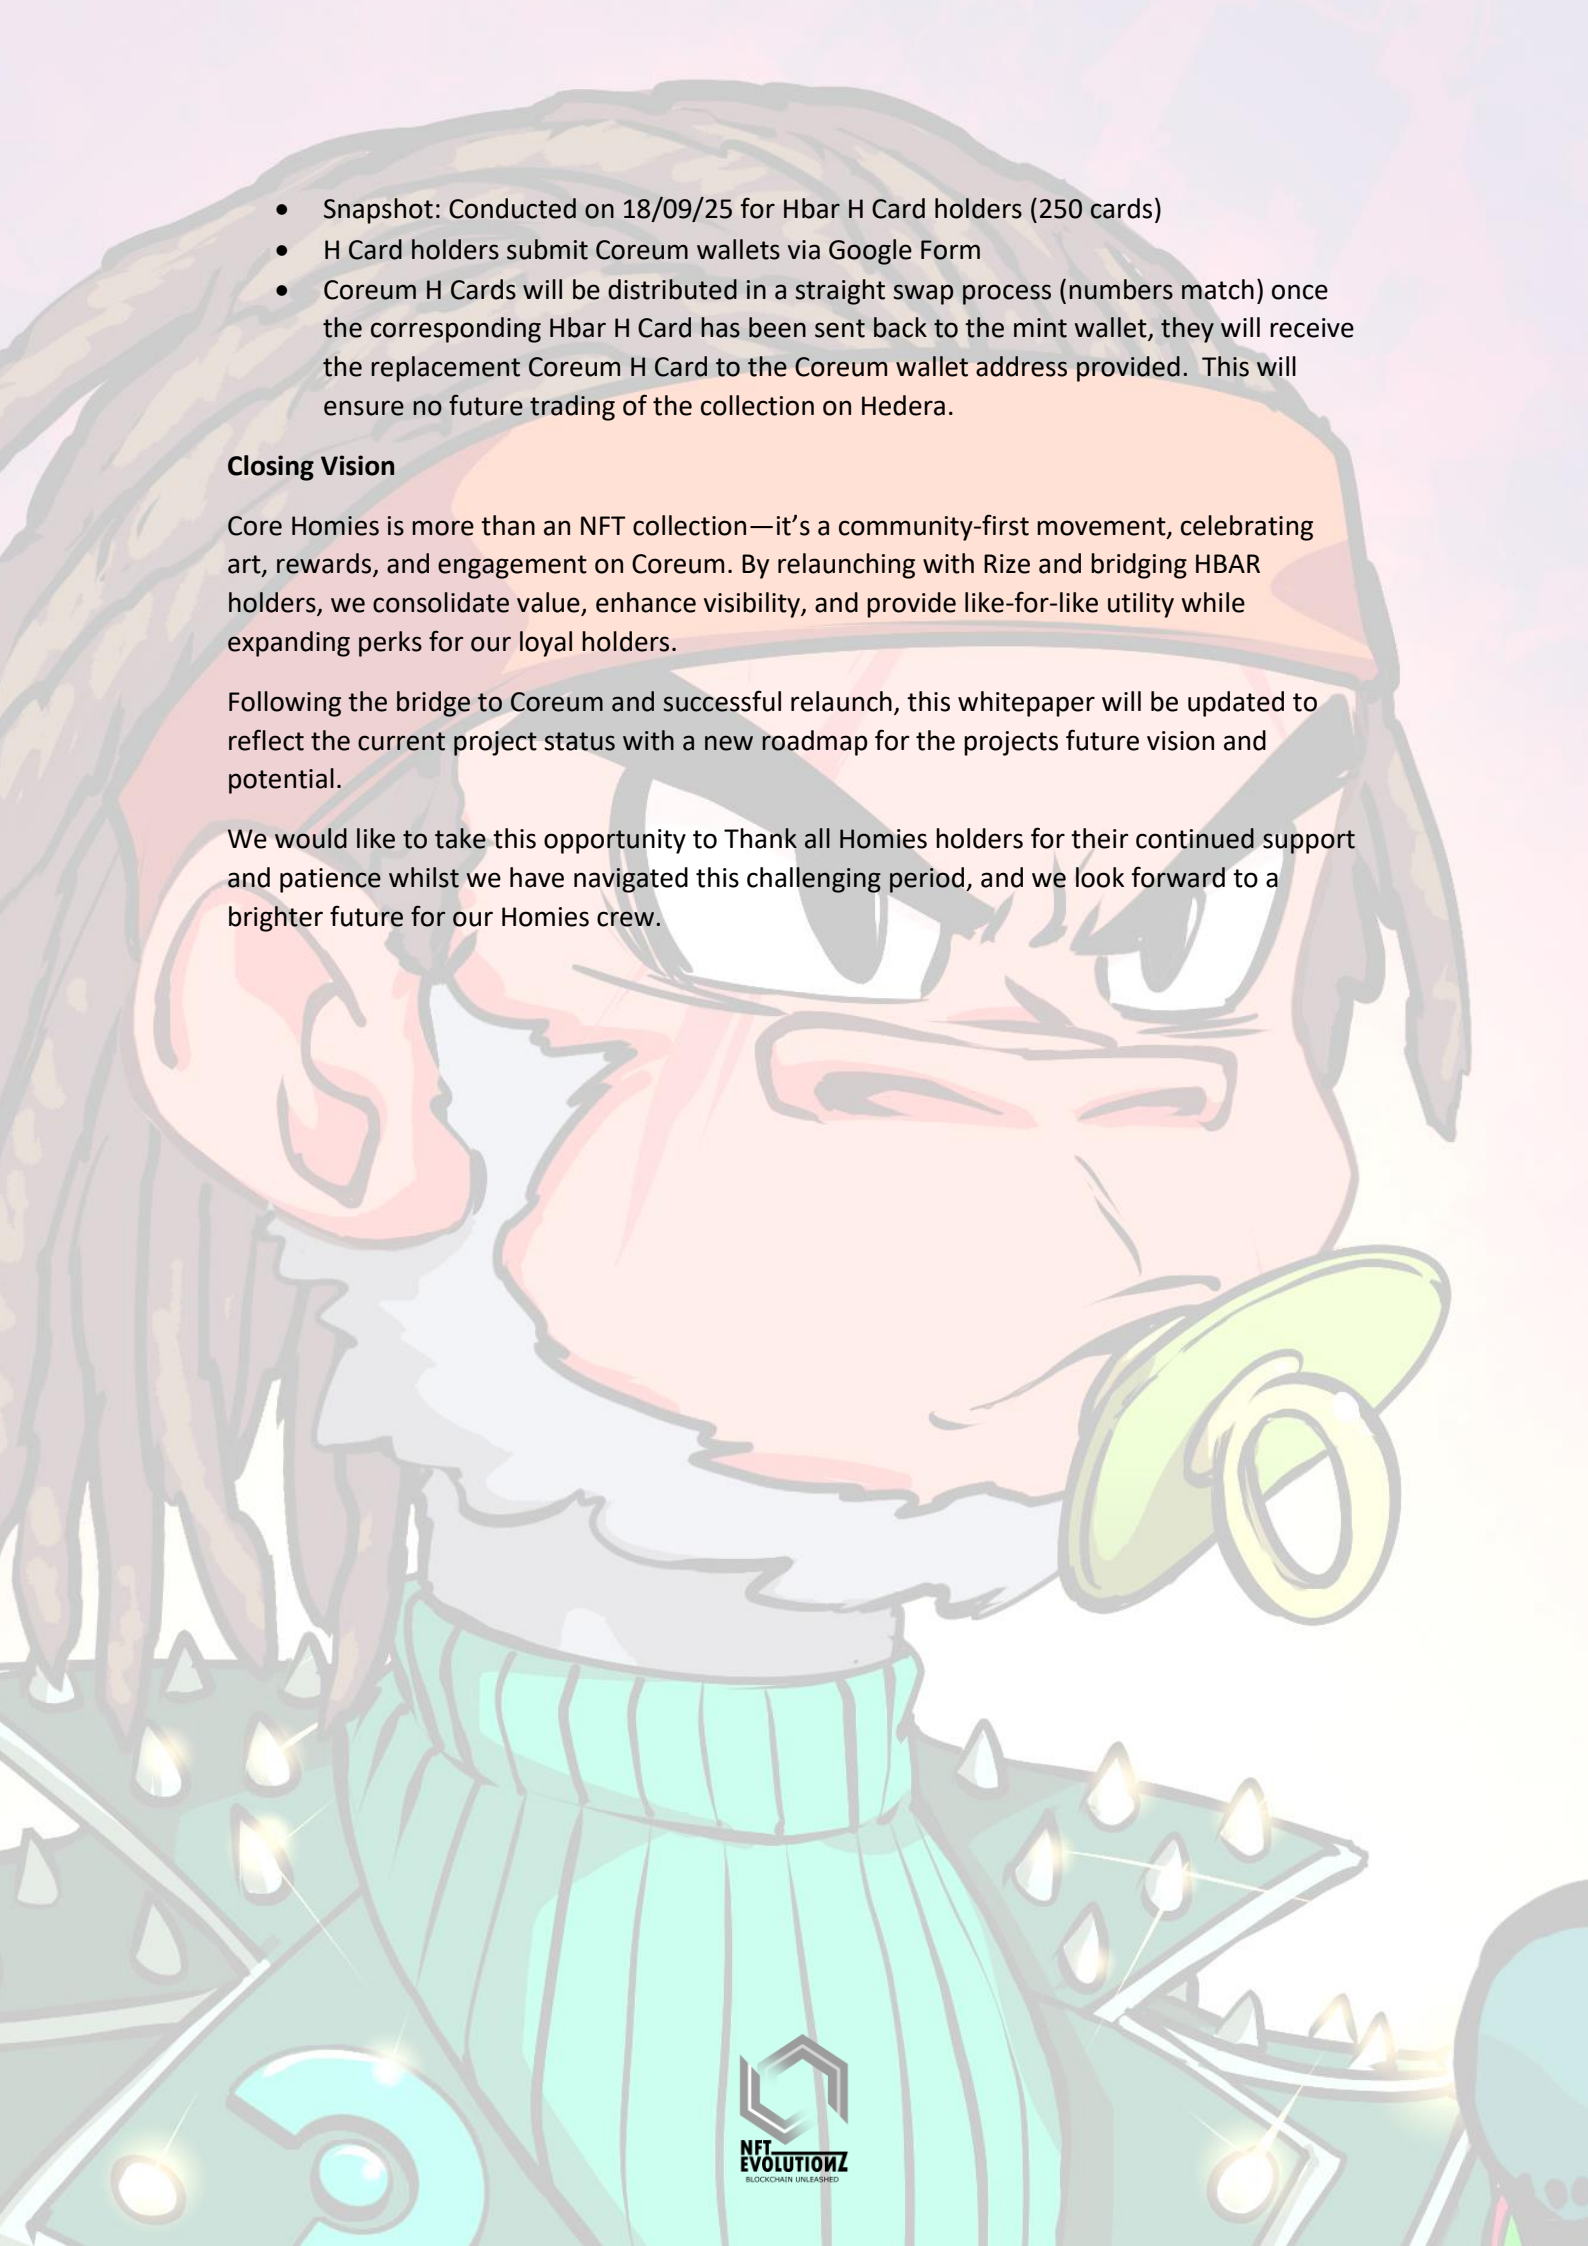

Coreum Status:

- 210 NFTs minted previously → 243 points
- 790 NFTs remaining → sufficient to cover HBAR points
- Core Homies holders will receive the same NFTs originally minted directly to their Coreum wallets
- Like-for-Like Bridging: HBAR Homies holders will receive Coreum NFTs matching their points (not necessarily the same tier). A number of spins will be applied to the Coreum Wallet address provided by holders to guarantee the same number of points held on Hbar. As this is applied to a launchpad, holders could spin any tier meaning some holders could be fortunate enough to end up with more points after they've bridged!
- Total expected mints after Hbar holders are bridged: 670 → bringing total Coreum mints to ~880.
- After bridging, approx 120 NFTs will be available to the community for purchase.

Claim Process:

- HBAR holders submit Coreum wallets via Google Form.
- NFTs minted on Coreum via Rize when the marketplace relaunches.
- Hbar Homies holders will be required to send their Hbar Homies back to the mint wallet as part of the claim process. This ensures no future trading of the collection.

H Card Holders

- 
- Snapshot: Conducted on 18/09/25 for Hbar H Card holders (250 cards)
 - H Card holders submit Coreum wallets via Google Form
 - Coreum H Cards will be distributed in a straight swap process (numbers match) once the corresponding Hbar H Card has been sent back to the mint wallet, they will receive the replacement Coreum H Card to the Coreum wallet address provided. This will ensure no future trading of the collection on Hedera.

Closing Vision

Core Homies is more than an NFT collection—it's a community-first movement, celebrating art, rewards, and engagement on Coreum. By relaunching with Rize and bridging HBAR holders, we consolidate value, enhance visibility, and provide like-for-like utility while expanding perks for our loyal holders.

Following the bridge to Coreum and successful relaunch, this whitepaper will be updated to reflect the current project status with a new roadmap for the projects future vision and potential.

We would like to take this opportunity to Thank all Homies holders for their continued support and patience whilst we have navigated this challenging period, and we look forward to a brighter future for our Homies crew.
