FAQ

WHAT ARE FINGER JOINTED BOARDS?

FINGER JOINTED BOARDS ARE ENGINEERED WOOD PANELS MADE BY JOINING SHORTER LENGTHS OF WOOD USING PRECISION-CUT “FINGER-LIKE” JOINTS, BONDED WITH STRONG ADHESIVES TO CREATE LONGER, STABLE BOARDS.

WHAT ARE THE KEY BENEFITS OF FINGER JOINTED BOARDS?

THEY OFFER EXCELLENT DIMENSIONAL STABILITY, MINIMAL WARPING OR CUPPING, EFFICIENT USE OF TIMBER RESOURCES, AND A CLEAN, UNIFORM APPEARANCE — ALL AT A MORE AFFORDABLE PRICE POINT THAN SOLID WOOD.

WHERE CAN FINGER JOINTED BOARDS BE USED?

THEY'RE IDEAL FOR INTERIOR APPLICATIONS LIKE WALL PANELING, FURNITURE, CABINETRY, SHELVING, DOORS, FRAMES, AND DECORATIVE JOINERY. NOT RECOMMENDED FOR DIRECT EXTERIOR USE UNLESS TREATED.

ARE THEY AS STRONG AS SOLID WOOD?

YES — WHEN MANUFACTURED TO HIGH STANDARDS, FINGER JOINTED BOARDS OFFER COMPARABLE STRENGTH AND STRUCTURAL RELIABILITY, ESPECIALLY FOR STATIC INTERIOR USES.

CAN FINGER JOINTED BOARDS BE CUSTOMIZED IN SIZE?

ABSOLUTELY. WE OFFER CUSTOM SIZES FOR BULK ORDERS TO MEET SPECIFIC PROJECT REQUIREMENTS.

ARE THEY ECO-FRIENDLY?

YES. FINGER JOINTED BOARDS HELP REDUCE WOOD WASTE BY UTILIZING SHORTER OFFCUTS, SUPPORTING SUSTAINABLE FORESTRY AND RESPONSIBLE MATERIAL USAGE.

WHAT FINISHES OR COATINGS CAN BE APPLIED?

THEY CAN BE PAINTED, VENEERED, LAMINATED, OR CLEAR-COATED DEPENDING ON THE DESIRED FINISH. THE SURFACE IS SMOOTH AND READY FOR TREATMENT.

DO THEY SUPPORT SCREWS AND FIXINGS?

YES, PROPERLY INSTALLED FINGER JOINTED BOARDS HOLD NAILS, SCREWS, AND JOINERY HARDWARE WELL — JUST LIKE SOLID TIMBER.
