Early childhood education

Early childhood education (VVE) is part of the educational disadvantage policy. The aim is to better prepare toddlers with a possible (language) delay, also known as 'target group children', for primary school and to ensure that preschoolers can go to group 3 without any delay. The VVE is for children from 2,5 until 4 years old.

Primary school (basisschool)

Start at age of 4, a child is required to attend school from the age of 5

Government funded

Public schools (openbare basisscholen)

Primary schools that are based on a religion or belief

Education concept

Montessori

Dalton

Vrije school

Schools for special primary education (SBO)

Special education schools (so)

Education of immigrants

4 – 6 yr

Start at a regular primary school, children receive support from the teacher in their own class.

6 – 12 yr

Children start at a special facility for children who do not yet master the Dutch language. In Hoofddorp this is the IKC Wereldwijs language school. Here, the Dutch language is learned in 1 year, with extra guidance. After 1 or a maximum of 2 years, children move on to regular primary school.
