

PRESTAN PROFESSIONAL ADULT SERIES 2000 MANIKIN

SKU: PP-AM-2000-MS

The same high-quality, realistic Professional Adult Manikin is now available with Advanced Feedback including Rate, Depth, Recoil, Ventilation and Hands-Off Time via a Bluetooth® enabled PRESTAN CPR Feedback app available on both Apple and Android devices.

PRESTAN PROFESSIONAL ADULT SERIES 2000 MANIKIN

The same high-quality, realistic Professional Adult Manikin is now available with Advanced Feedback including Rate, Depth, Recoil, Ventilation and Hands-Off Time via a Bluetooth® enabled PRESTAN CPR Feedback app available on both Apple and Android devices.

Fully compliant with current industry guidelines, including the Heart and Stroke Foundation of Canada's February 2021 *Use of Feedback Devices in Resuscitation Training Courses Policy* and the most recent AHA Integrated Feedback Directive.

Available in medium or dark skin tones, with CPR Feedback only and in Single or 4-Pack configurations.

The Prestan Professional Training Manikin series is unlike any other on the market. Uniquely designed for realistic experiences, they are available individually or in sets of four for group training. The manikins are designed to match the real-life CPR experience. In CPR training, a precise feedback indicator is vital.

The Prestan's revolutionary CPR Rate Monitor provides instant feedback to both instructor and student on the correct compression depth. It enables each student to individually gauge their compression rate as well as allowing the instructor to monitor several students simultaneously. It is equipped with a unique Clicker Mechanism that gives an alert sound when the correct compression depth is reached. This helps ensure the students are using the correct force when administering CPR compression.

ADDITIONAL DETAILS:

The PRESTAN CPR Feedback App

Providing high-quality, real-time, advanced CPR feedback via a Bluetooth® connection with the PRESTAN Professional Adult Series 2000 Manikin. Advanced CPR feedback (includes rate, depth, recoil, ventilation, and hands-off time) is monitored, easily displayed, and available for reporting allowing students to self-monitor performance and gain confidence during CPR training.

The app allows instructors to provide comprehensive CPR training while monitoring CPR performance for up to six (6) students at a time. This app is also equipped with a reporting feature that allows for CPR training results to be downloaded directly from the app.

<https://www.youtube.com/watch?v=eifElZyoHRw>

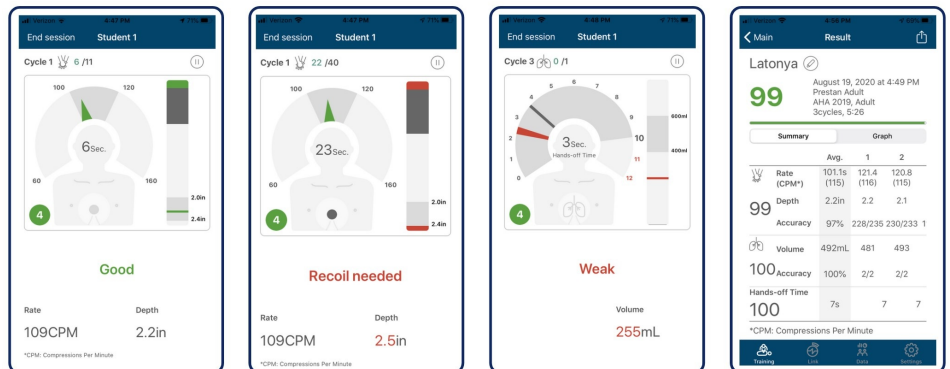

DOWNLOAD THE PRESTAN CPR FEEDBACK APP FOR THE PROFESSIONAL ADULT SERIES 2000

MANIKIN

The PRESTAN CPR Feedback app is for Instrumented Directive Feedback Devices (IDFD) that meet the most recent requirements of the American Heart Association and the Heart and Stroke Foundation of Canada’s February 2021 Use of Feedback Devices in Resuscitation Training Courses Policy.

Languages currently supported by the PRESTAN CPR Feedback app include English (US), English (International), Deutsch, Español, Français, Italiano, Português, Türk, Russian, Chinese (simplified), Japanese, Korean.

Instructors can easily calculate the Chest Compression Fraction with data collected via the PRESTAN CPR Feedback app making the Series 2000 Manikin suitable for both basic and advanced training.

Chest Compression Fraction Calculation

Hands-on Time/Total CPR Cycle Time = Chest Compression Fraction

Example

Total CPR Cycle Time = 326 seconds (5 min, 26 sec)

Hands-off Time = 21 seconds (3 cycles at 7 sec each)

Hands-on Time = 305 seconds (326-21 = 305 sec)

Chest Compression Fraction = 94% (305/326 = 0.94 or 94%)

PRESTAN PROFESSIONAL MANIKIN CPR RATE MONITOR

PRESTAN Series 2000 Manikin LED Sequence Table

	Connected Mode	Disconnected Mode
Sleep Mode/No Power	○ ○ ○ ○	
Smart Device Connected Mode <small>(Cycles in sequence left to right)</small>	● ● ● ●	n/a
1st Full Compression, Not Connected Mode <small>(Wake mode/LED Test Mode)</small>	n/a	● ● ● ●
CPM* < 60	○ ● ○ ○	
CPM* 60 – 79	○ ○ ● ○	
CPM* 80 – 99	● ○ ○ ○	
CPM* 100 - 120	● ○ ○ ●	
CPM* > 120	● ○ ● ●	
Compressions Stopped	○ ● ○ ○	

*CPM = Compressions per minute
● = Flashing

In combination with PRESTAN’s traditional CPR feedback light system installed in the shoulder, the Series 2000 manikin offers a unique, dual-purpose training solution providing instructors with an option to train with either advanced or basic feedback.

The visual feedback gives students a real life feel of delivering 100-120 compressions per minute. Lights continually signal rate progression, confirming compressions are within the 100- 120 cpm range recommended by the Industry Guidelines. The yellow light will blink if the 120 cpm upper limit is exceeded, warning students to slow down. Instructors can monitor several students quickly and easily.

In addition to the visual feedback, students will also hear an audible beep as the chest is pushed to the appropriate depth of 2.0 -2.4 inches allowing them to experience the true force needed to deliver real life chest compressions.

SERIES 2000 LUNG BAGS

The PRESTAN Professional Adult Series 2000 Lung Bags use the same easy to install PRESTAN design with the addition of a breath sensor. The Series 2000 lung bags are required for ventilation feedback via the PRESTAN CPR Feedback app.

PRESTAN ULTRALITE® MANIKINS

SKU: PP-ULM-100-MS

This is PRESTAN's most portable CPR manikin yet! It is amazingly easy to set up and sold in a convenient and lightweight package for efficient training-on-the-go. This durable vinyl and latex-free manikin offer an affordable tool for CPR training with all the quality and realism you expect from PRESTAN.

Features:

- Uniquely fast and easy to set-up.
- Stackable torso and head generate a compact package for transporting.
- Clamshell torso opening provides quick access for the easy-to-insert lung bag.
- Realistic skin resists dirt, grime, and grease.
- Adequate upper chest sizing facilitates AED pad placement and training.
- Visual anatomy landmarks reinforce proper hand placement for compressions.
- Head-tilt illustrates how to open the airway and allows each student to observe a true chest rise when the proper head-tilt chin-lift technique is used.
- Life tested to a half-million compressions.
- The manikin is easy to clean.

PRESTAN ADULT MANIKINS

SKU: PP-AM-100M-MS

The PRESTAN Professional Training Manikin series is unlike any other on the market. Uniquely designed for realistic experiences, they are available individually or in sets of four for group training. CPR manikins are designed to match the real-life CPR experience.

Features:

- Fully compliant with current industry guidelines, including the most recent AHA Integrated Feedback Directive.
- Realistic looking and performing manikin is more acceptable to both instructors and students.
- Far easier and faster to carry and set up at training sites.
- Patented face/head tilt simulates how an actual victim's head would move if he required CPR and teaches students how to properly open the airway.
- Easily inserted face-shield/lung-bag provides visual chest rise to ensure students receive the most accurate and realistic training.
- The face shield is secured so it won't slip and there's no need for adhesives.
- Manikins are available with the CPR Feedback Monitor - Monitors may also be purchased separately to easily install into non-monitored Prestan Professional Manikins.
- Prestan CPR Manikins are not made with natural rubber latex.

PRESTAN CHILD MANIKINS

SKU: PP-CM-100M-MS

The Prestan Professional Child Manikin is designed to look like a child versus an adult with less prominent body structures and softer, more childlike facial features. It is smaller and thinner than the Prestan Professional Adult Manikin. Yet, still realistic to the eye and the touch.

Features:

- Realistic looking and performing manikin is more acceptable to both instructors and students.
- Far easier and faster to carry and set up at training sites.
- Patented face/head tilt simulates how an actual victim's head would move if he required CPR and teaches students how to properly open the airway.
- Easily inserted face-shield/lung-bag provides visual chest rise to ensure students receive the most accurate and realistic training.
- The face shield is secured so it won't slip and there's no need for adhesives.
- Manikins are with the CPR Feedback Monitor
- Prestan Manikins are not made with natural rubber latex.

PRESTAN INFANT MANIKINS 4-PACK

SKU: PP-IM-400M-MS

This AHA Compliant, 4-Pack of Prestan Infant Manikins-Medium Tone comes equipped with Compression Depth Clicker Feedback Devices and Compression Rate Monitor Feedback Devices.

This 4-Pack of Manikins will optimize your training program by ensuring the student's Compression Depth and Compression Rate are reached with an audible 'clicking' sound and LED indicators provided by 2 separate feedback devices. Additional Items Included: 50 Infant Lung Bags, an Instruction Sheet, and a nylon carrying case.

Achieve this with Prestan Professional's revolutionary new infant CPR manikin with Rate Monitor. The LED indicators allow for instant feedback to both instructors and students regarding their rate of chest compressions. Instructors can monitor several students quickly and easily, while students themselves can visually gauge their compression rate reinforcing more practice time using proper technique.

The depth of compression is a crucial skill to learn as well. Class participants learn proper compression depth with the manikin's audible 'clicking' sound. When compressions are done to the ECC recommended depth, the manikin's 'click' lets students know they are on target. Compression rate and depth – two vitally important components to learning for successful CPR. With Prestan's visual and audible reinforcement of good CPR techniques, students will confidently embrace their role in the cardiac chain of survival.

Features:

- LED indicators on the infant's diaper allow for instant feedback to both instructor and student regarding the accuracy of chest compressions.
- The realistically sized 100% Latex Free infant has a pinch-able nose. "Flick their feet" reminds students to check for the level of consciousness – easily taught since the manikin has fully formed legs with feet. Moveable arms even allow for brachial pulse checks.
- Practice conscious choking back blows on the infants' padded upper back portion.
- The easy to insert lung-bag speeds manikin setup.
- The face-shield is secured so it won't slip and there's no need for adhesives.
- Realistic skin resists dirt, grime, grease, and even adhesive build up from AED electrodes!
- Visual anatomy 'landmarks' such as clavicles, an accurate nipple line, sternum, and xiphoid process facilitates the practice of choking skills as well as reinforcing proper finger placement for compressions.
- A tiltable head illustrates how to open the airway and allows each student to observe a true chest rise when a proper head-tilt chin-lift technique is used.
- The infant's head structure is capable of demonstrating the jaw-thrust maneuver.
- Audible clicker mechanism increases the student's confidence in administering adequate depth of compressions.
- Manikins are capable of being cleaned and decontaminated per CDC guidelines.

PRESTAN ADULT MANIKINS 4-PACK

SKU: PP-AM-400M-MS

The Prestan Professional Training Manikin series is unlike any other on the market. Uniquely designed for realistic experiences, they are available individually or in sets of four for group training. The manikins are designed to match the real-life CPR experience.

Realistic to the eye and the touch, the Prestan adult professional manikin is uniquely designed as a clamshell that accommodates an easy-to-insert face shield/lung bag.

Prestan's revolutionary new CPR Rate Monitor allows for instant feedback to both instructor and student regarding the rate of chest compression. This allows each student to gauge their rate of compressions on their own as well as allowing the instructor to monitor several students quickly and easily.

And with our patented face/head tilt, the Prestan Professional Adult Manikin simulates the way an actual victim's head would move if he required CPR.

In addition, the unique construction of our manikins incorporates a mechanism to help them use the correct force to compress the chest to the correct depth. It comes with 50 A/C face-shield lung bags and a nylon carrying case.

Features:

- Life-like features and weight allows for realistic adult/child CPR training
- Sculpted body contours and realistic skin feel help prepare students for real-life rescues
- A unique clamshell design that accommodates an easy-to-insert face shield lung bag
- CPR Rate Monitor allows for instant feedback to both instructor and student regarding the rate of chest compression
- Includes 4 Manikin with CPR Monitor, Face-Shield Lung Bags, and Nylon Carrying Case.

PRESTAN PROFESSIONAL CHILD 50PCS FACE-SHIELD

SKU: PP-CFS-50

In classes where there is more than one student per manikin, there is a need for a balance between protecting the student and giving the student a realistic experience.

This is a 50 pack of Filtered Face Shields for Prestan Professional CPR Manikins. If manikins are shared during your training class, you'll want to use a filtered face shield to minimize the risk of cross-contamination between students. The Prestan face shield makes it easy and since it's secured to the manikin, it won't slip. No need for adhesives! Your students will spend less time distracted by an unruly barrier and more time practicing their skills.

Every CPR/AED instructor wants the best outcome when and if the student has a real-life experience giving CPR. This face shield, placed over the manikin's face, allows each student to practice CPR, be protected, and have the benefit of a realistic experience of a full chest rise.

50 pack face shields for Prestan Child Manikins.

Features:

- Professional Child Face Shields by Prestan Products (50 Pack)
- Not made with natural rubber latex
