DESAWYER 2000® & ES*

The only fully computerized, five-bladed saw on the market with a complete manual backup system. This saw can be operated in one of three modes: Automatic, Semi-Automatic and Manual.

Automatic

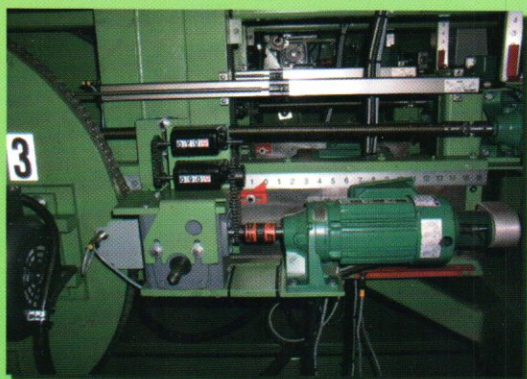

» Jobs are downloaded by Network or removable disks.

Semi-Automatic

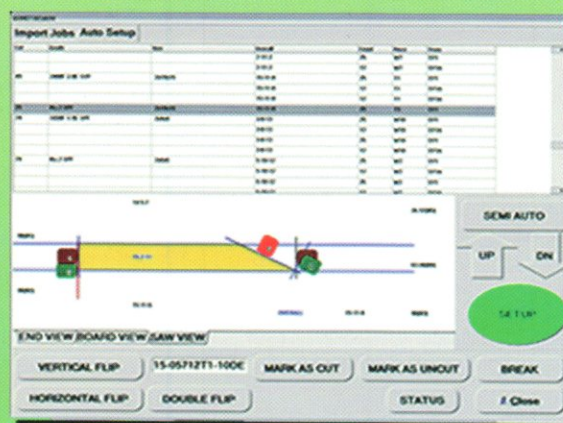

» Sawyer uses the touch screen to enter the values from cut sheet.

Manual

» Bypasses the computer allowing the sawyer to use conventional push buttons.

MANUAL BACKUP SCALES

FAST & EASY SETUP

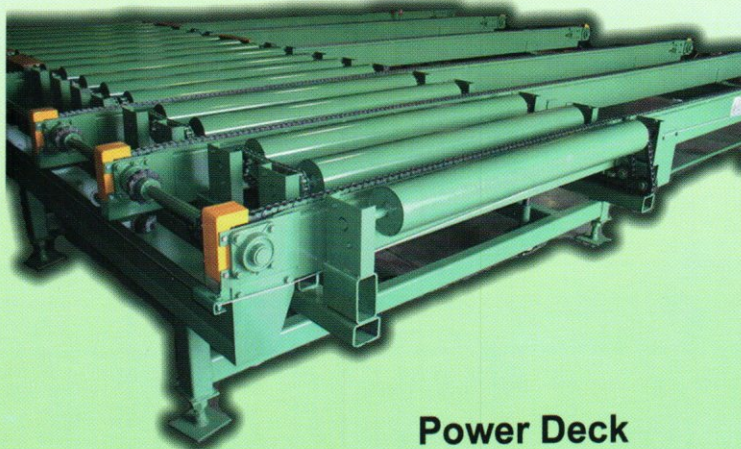

* The Desawyer ES is a true closed looped servo controlled component saw.

AUTOMATIC COMPONENT SAW

MATERIAL HANDLING

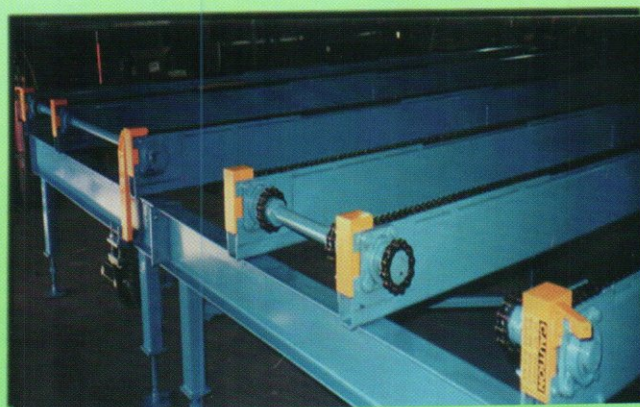

Material Handling Equipment - Monet Desauw manufactures a variety of equipment to improve productivity. Some of the most popular items are the Power Deck, Side Eject Table, Lumber Carts, and Finish Rollers.

Side Eject Table

Power Deck

Increase Saw Output 50% - Eliminate "Bottlenecks"

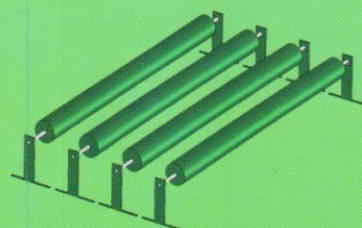

Lumber

Heavy-Duty Construction with 8" Casters

Rollers

5" dia. x 14' Powered & Non-Powered Rollers Available.

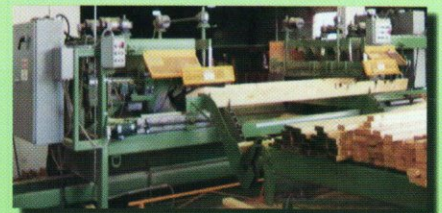

Made in Mid-Missouri **1-877-642-4900**

B500 XE (SEMI-AUTOMATIC) & B500 (MANUAL)

**PLC Driven,
Semi-Auto
Component Saw
With Touch Screen
Interface**

Desauw B500 XE & B500 XEL - Semi-Automatic saws using a touch screen interface to enter the values for setup. The touch screen saws eliminate the guesswork and fine-tuning which gives the sawyer faster setup time. Both saws are operable in a full manual mode so production time is never interrupted. XEL option allows you to set length.

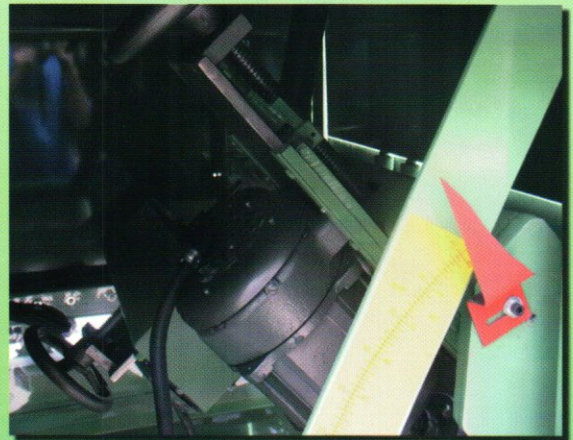

Desauw B500 - The heaviest, full manual operation saw on the market. The solid framework of this saw absorbs high frequency vibration which increases its working life. Operator has complete push button control from one convenient location. Digital readout is standard.

COMPONENT SAWS

FWA 500

The Safest, Easiest, Fastest & Most Precise Way to Cut Floor Webs

Desauw FWA 500 Floor Web Saw has digital readouts for setting saw blade angulations, a magazine feed, and an external cutoff blade.

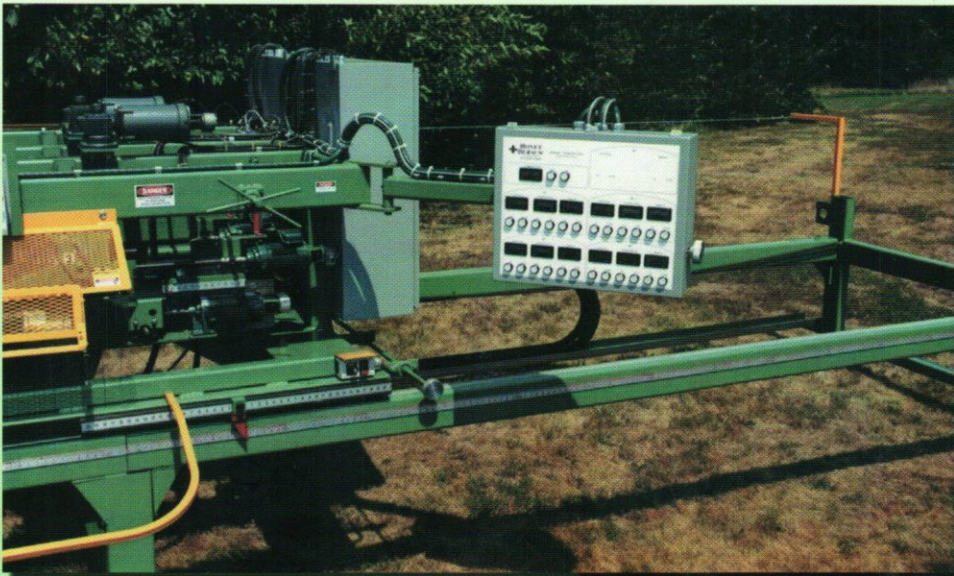

Cut components at 60 per min. on the FWA & realize its full potential!

FLOOR WEB SAW

DESAUW® WB 400

This saw has the same durable design features as our component saws, but it is specifically designed for condensed web cutting. This is a 4-bladed, push button controlled, high volume web saw. It is capable of cutting up to 14 feet.

DESAUW® B200 & B300

Specially designed computerized and manual saws engineered for the wall panel industry. These saws are capable of cutting multiple functions in one pass. You give us the specifications and we will design a saw to fit that need.

ROOF WEB SAW
