What price would you expect to pay for a linear saw?

What performance would you expect from a linear saw?

The DeRobo's price, performance, efficiency and quality can't be beat by other linear saws on the market. When combined with the optional automatic infeed system, your plant will experience a new level of automation.

Below are just a few of the DeRobo's features:

- Loads board definitions from a job file or allows manually creating boards using the touch-screen computer
- Optimizes lumber using sawyer-defined "fill" boards when necessary for better optimization
- Capable of cutting two boards at once
- Small pieces are captured and delivered to the basket under the machine
- Cuts webs, chords, stair stringers, rafters, and wedges

More DeRobo features are listed below:

- Uses a positive lumber pusher and puller
- Inks on the side of the board
- Allows creation of rafter packages
- Cuts long scarfs by multi-plunging
- Uses a 22 inch blade

Options:

- Live Deck (automatic or manual)
- Bunk Stripper (automatic or manual)
- Complete automatic infeed system using automatic live deck and automatic bunk stripper
