HCD Welcomes Newest Team Member

Trent Craig Joins HCD to Expand Company's Mission

MIDDLEBURG, May 6th, 2022 – Horse Country Design warmly welcomes Trent Craig, DIN, SWPA, ESCA as their newest Project Manager.

At the young age of 12, Trent's passion of functional design started with a landscape design and maintenance business. This introduced a desire to gain geotechnical experience and knowledge to include but not limited to retaining walls. These skills were enriched during time served in the United States Marine Corps, as a combat engineer while deployed on two tours to Helmand Province Afghanistan. He would continue to serve his community while employed at local government agencies in Northern Virginia. Throughout the duration of his employment, he has gained specialized skills in Erosion and Sediment Control as a state certified Combined Administrator. In addition, he has gained certifications in Stormwater Management as a state certified Inspector and Program Administrator encompassing permitting and compliance as well as BMP construction and conformance.
