WINDOW AND DOOR MANUFACTURER

**MADE IN  
QUEBEC**

**FT**

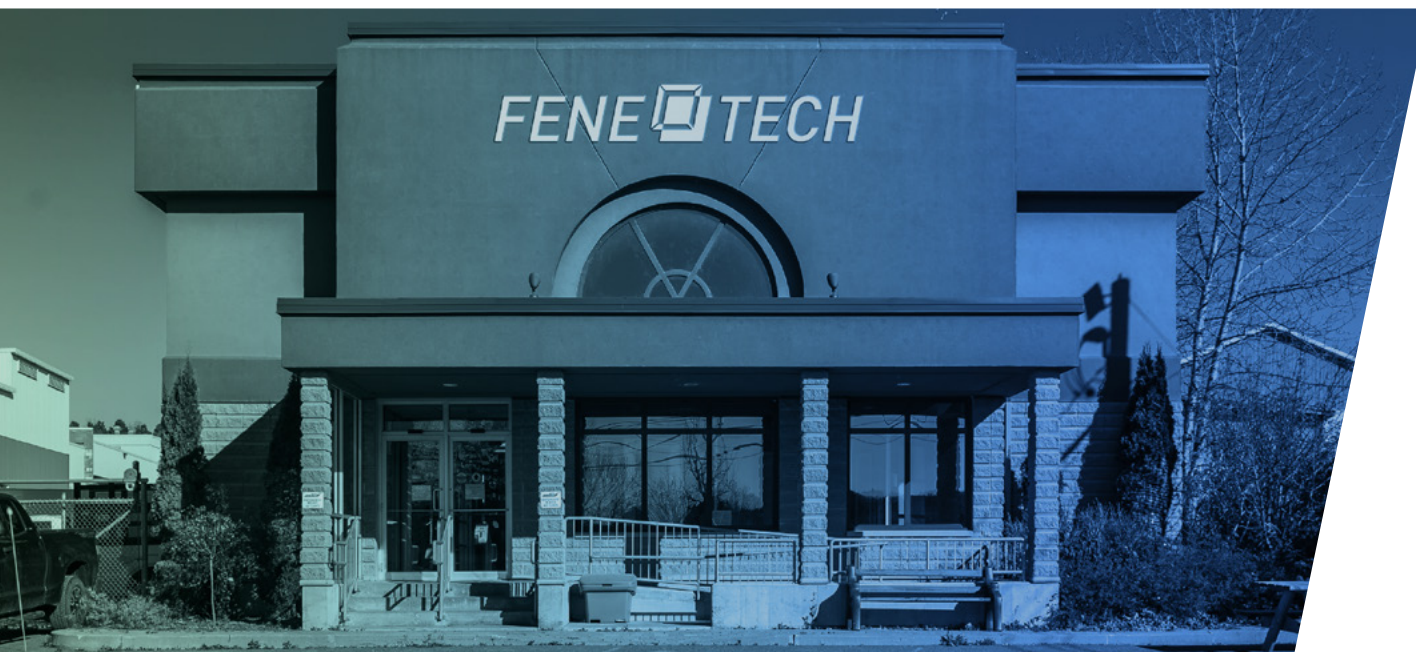

# THE COMPANY

## OUR STORY

Founded in 1987, Fene-Tech is a leader in Quebec's window and door industry. Renowned for the quality of its products, Fene-Tech is backed by a dedicated and self-sufficient team. The stability and commitment of its employees are key factors in the company's success throughout the La Matapédia region. Our mission is to offer you the best products for a lasting investment.

Lapco-Tech also has its roots in the window and door industry. Founded in 1994, Lapco-Tech has always embraced transparency to showcase its expertise. Our experienced, detail-oriented employees skillfully leverage state-of-the-art production equipment and premium quality raw materials. To support its growth, the company moved its facilities from Mirabel to Saint-Eustache in 2021 to better serve its customers' needs.

In 2011, ATLANTEM CANADA acquired Lapco-Tech and Fene-Tech, resulting in the merger of the two Quebec companies. In 2023, they joined forces to become Fene-Tech, a standalone entity.

## WHY CHOOSE FENE-TECH

Whether you're located in the Bas-Saint-Laurent region or in Montréal, Fene-Tech stands out as the top choice for window and door manufacturing. Our unwavering commitment to innovation and sustainability ensures we deliver the best products coupled with unequalled customer service. Choose Fene-Tech for our outstanding expertise and our reliable, made-in-Quebec products, perfectly suited for the Canadian climate. Fene-Tech: double the expertise, double the sustainability!

## SUSTAINABLE DEVELOPMENT

At Fene-Tech, we care deeply about the environment. Inevitably, the production of windows and doors results in some material loss. To minimize this waste, we promote a circular economy by supplying these residual materials to local partners for further processing.

Recycling these materials significantly improves our ecological footprint. To further minimize waste, we have implemented glass recycling. For example, glass can be recycled and transformed into sand for golf clubs!

# OUR PVC WINDOWS

## PVC

Windows are essential elements. In addition to providing plenty of natural light, they play a crucial role in air circulation and insulation for your home. Choosing the right windows is a vital step toward absolute comfort!

**PREMIUM**  
GLOSSY PVC

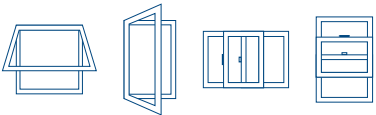

Certified  
energy  
efficiency ☒

### PVC FEATURES

**PVC windows are becoming increasingly popular in Quebec. Available in several models from Fene-Tech, PVC windows offer numerous advantages:**

- › Crafted from virgin powder for an easy-to-maintain glossy finish, featuring a welded PVC frame with multiple **insulating air chambers**
- › Equipped with a frame that optimizes glazing placement in the warmest part of the wall
- › Fitted with a welded PVC shutter incorporating a **triple weatherstripping system**
- › **Engineered with a 90° opening system** for easy maintenance and maximum air circulation
- › Compatible with North American hardware
- › Built for performance and extreme weather conditions

FT-PVC

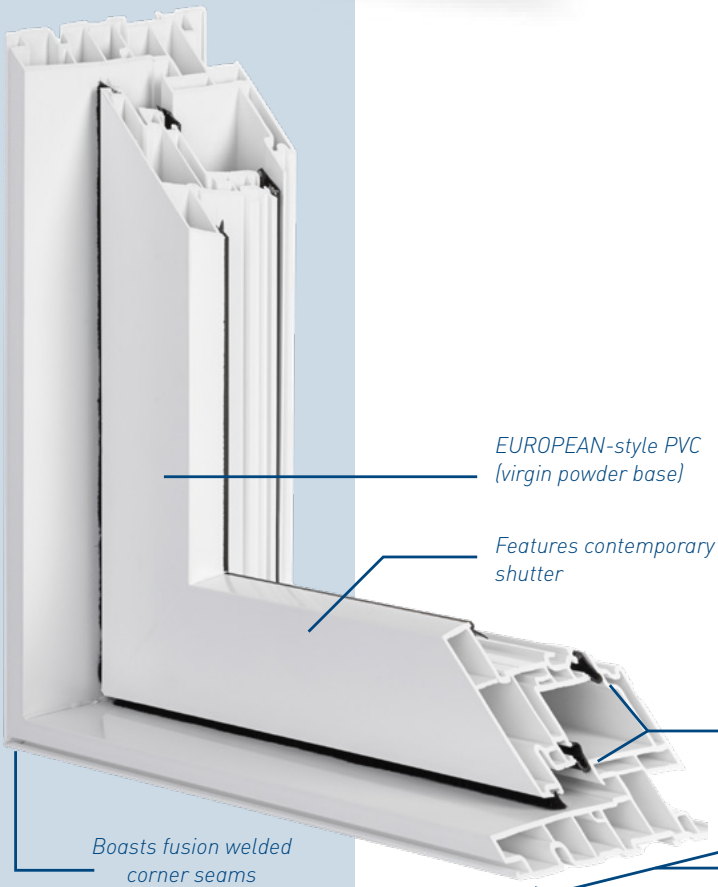

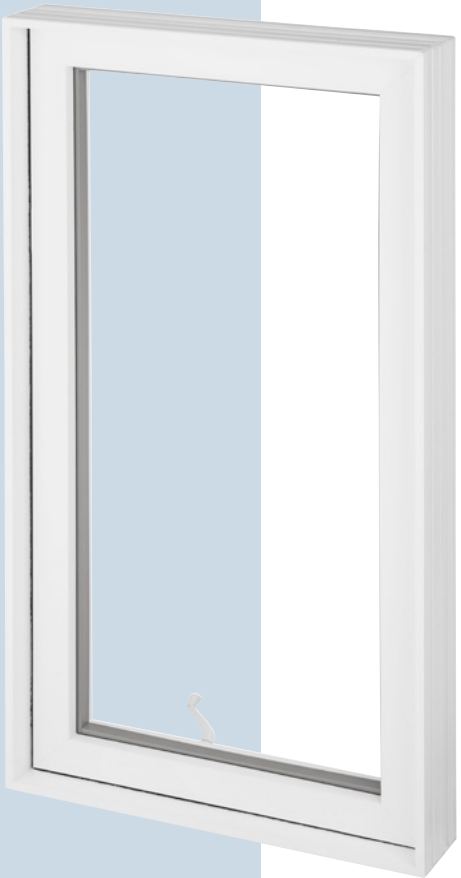

### FT-CONTEMPORARY

Adapted to Quebec's harsh climates, FT-Contemporary is a must-have for your home. It suits all tastes and needs. Are you looking for a window with high-performance thermal insulation and proven quality? Then look no further.

Its classic appearance is perfect for contemporary-style homes. A window brings more than just light into your space. It is also excellent for ventilation and adds noticeable appeal to your decor.

### FT FEATURES

- › Crafted with glossy **pure white** PVC profile
- › **Double-walled** for hardware attachment to ensure long-lasting operation
- › Made with **galvanized steel** reinforcement inside the mullion for large windows
- › Equipped with **triple weatherstripping**, including two compression seals for optimum energy efficiency
- › Fitted with "J" mouldings for easy interior finishing
- › Sealed unit with **double seal**
- › Equipped with high-performance spacer
- › Crafted with energy-efficient **LOW-E ARGON thermopane glass**
- › Sliding and hung windows offer the option of an inward-tilting **sash** for easy cleaning
- › Equipped with recessed **tandem rollers** for sliding window
- › Meets the requirements of **NAFS** and **CSA** standards

## FT-NUANCE

Perfect for Quebec's harsh weather conditions, FT-Nuance is ideal for new builds. This colonial-shaped window suits all needs and tastes. Are you looking for a window with high-performance thermal insulation and proven quality? Then look no further.

Its perfect blend of beauty and durability makes it a clear winner. A window brings more than just light into your space. It is also excellent for ventilation and adds noticeable appeal to your decor.

## FT FEATURES

- › Profilé en PVC **lustré blanc pur**
- › Crafted with glossy **pure white** PVC profile
- › **Double-walled** for hardware attachment to ensure long-lasting operation
- › Made with **galvanized steel** reinforcement inside the mullion for large windows
- › Equipped with **triple weatherstripping**, including two compression seals for optimum energy efficiency
- › Fitted with "J" mouldings for easy interior finishing
- › Sealed unit with **double seal**
- › Equipped with high-performance **spacer**
- › Crafted with energy-efficient **LOW-E ARGON thermopane glass**
- › Meets the requirements of **NAFS** and **CSA** standards

FT-PVC

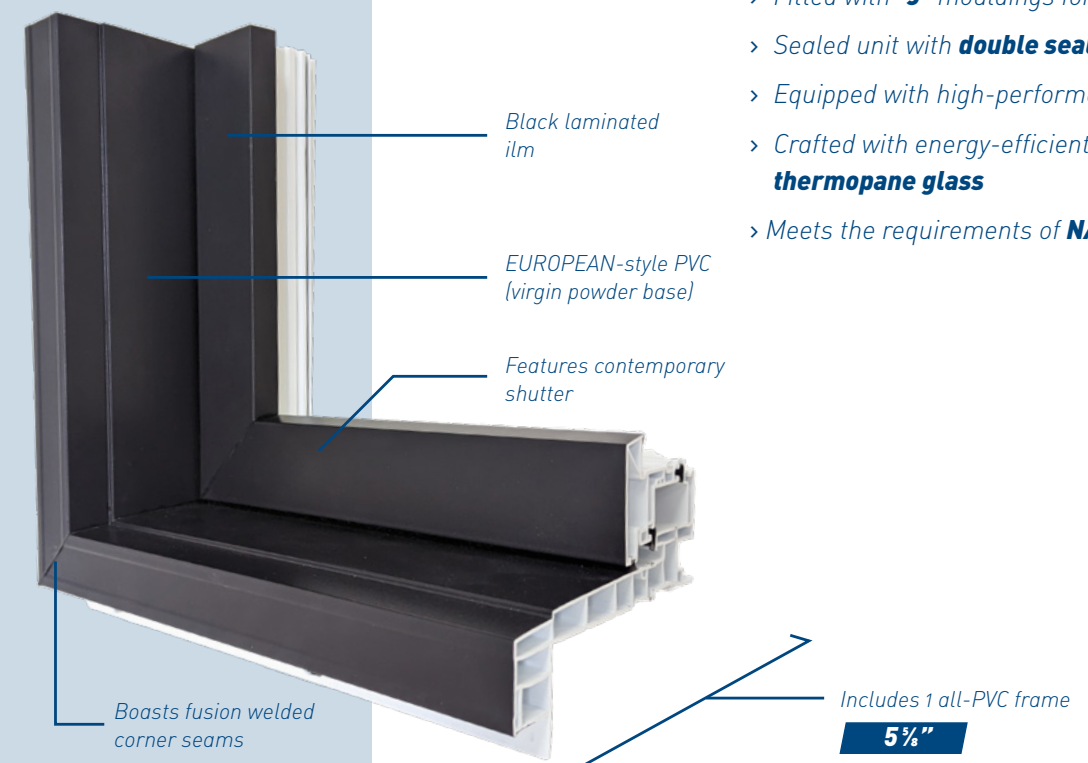

## FT-DURATECH

Brand new to Fene-Tech, FT-DuraTech features a laminated film, doubling its durability and offering unmatched resistance while also respecting the environment.

Built to withstand Quebec's harsh weather conditions, FT-DuraTech is a must-have for your home. It suits all tastes and needs. Are you looking for a window with high-performance thermal insulation and proven quality? Then look no further.

## FT FEATURES

- › Profilé en PVC lustré **blanc pur** à l'intérieur et **pellicule laminée noir** à l'extérieur
- › Crafted with a glossy **pure white** PVC profile on the interior and **black laminated film** on the exterior
- › **Double-walled** for hardware attachment to ensure long-lasting operation
- › Made with **galvanized steel** reinforcement inside the mullion for large windows
- › Equipped with **triple weatherstripping**, including two compression seals for optimum energy efficiency
- › Fitted with "J" mouldings for easy interior finishing
- › Sealed unit with **double seal**
- › Equipped with high-performance **spacer**
- › Crafted with energy-efficient **LOW-E ARGON thermopane glass**
- › Meets the requirements of **NAFS** and **CSA** standards

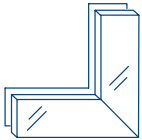

# OUR HYBRID WINDOWS

## HYBRID

These windows offer optimal energy efficiency that surpasses industry standards. This category features windows made of aluminum and PVC, as well as those made of aluminum and wood.

Our hybrid windows are crafted with PVC interiors and aluminum exteriors, striking the perfect balance between style and performance. Available in contemporary or colonial styles, they stand as the number one choice for interior design. Beyond their exquisite design, these windows guarantee top-notch security and sealing performance.

### ALUTECH HYBRID FEATURES

**ALUTECH HYBRID windows, combining aluminum and PVC, are efficient and robust. They enable you to:**

- › **Reduce energy costs**
- › **Enhance the value of your property**
- › **Achieve a complete thermal bridge**

## FT-ALUTECH

Alutech casement windows offer fantastic advantages. Its larger opening makes it adaptable to a wide range of projects, explaining its popularity for residential, commercial and institutional buildings. Its slim frame allows ample natural light in and ensures clear views outside. It is a unique window that delivers optimal energy performance.

## FT FEATURES

- › Crafted with **pure white** PVC profile
- › Designed with **exterior aluminum extrusion** assembled with screws at all four corners
- › Equipped with **triple weatherstripping**, including two compression seals for optimum energy efficiency
- › Fitted with “**J**” mouldings for easy interior finishing
- › Sealed unit with **double seal**
- › Equipped with high-performance **spacer**
- › Crafted with energy-efficient **LOW-E ARGON thermopane glass**
- › Available in **double** or **triple** glass
- › Meets the requirements of **NAFS** and **CSA** standards

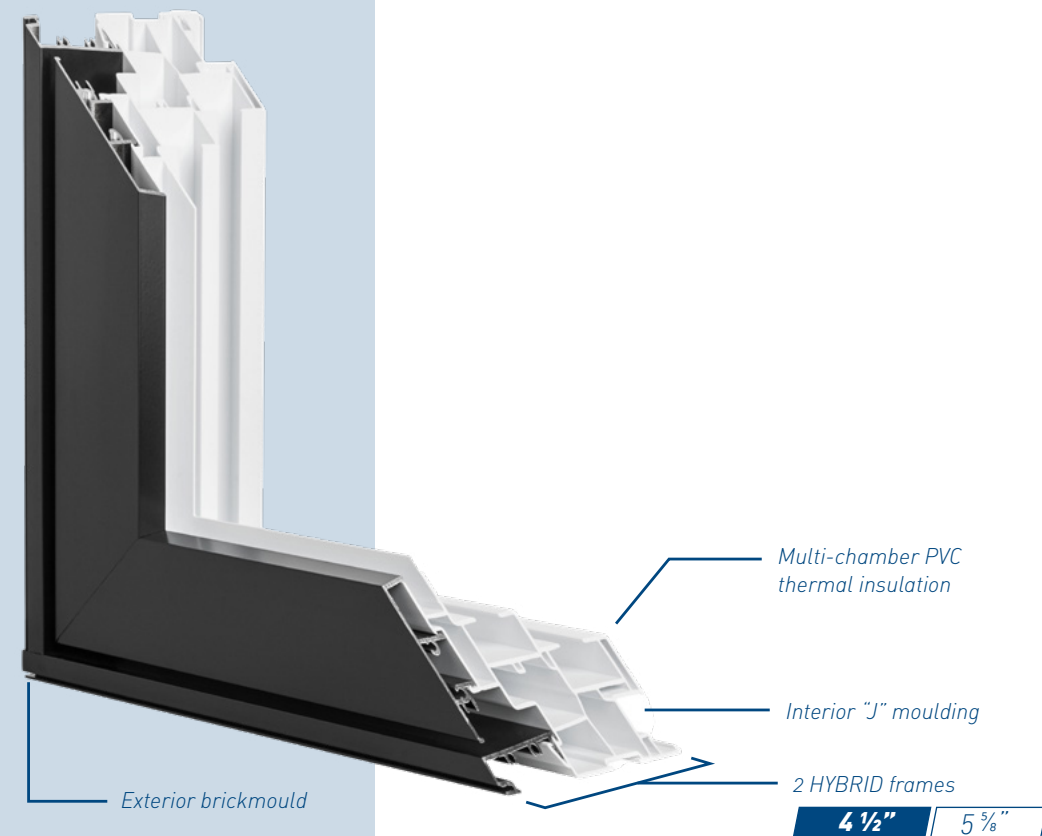

## FT-ALUTECH

FT-Alutech sliding and hung windows offer several advantages. Using the fewest hardware parts, their simpler construction makes them durable and efficient, making them a more economical choice.

## FT FEATURES

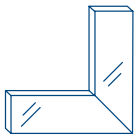

- › Crafted with **welded PVC** frames, featuring extruded aluminum extensions and facades
- › Equipped with **sturdy** welded PVC shutters
- › Built with a frame depth of 4 1/2", facilitating optimal glazing placement in the **warmest** part of the wall
- › Designed with extruded PVC profiles made from virgin powder base for an easy-to-maintain **glossy finish**
- › **Integrated handle** on shutters
- › Option of inward-tilting sash for **easy cleaning**
- › Satisfies the requirements of **NAFS** and **CSA** standards

# OUR ALUMINUM WINDOWS

## ALUMINUM

Aluminum windows offer fantastic advantages. Their durability makes them a popular choice for residential, commercial and institutional buildings, and their exceptional insulation ensures outstanding energy performance. And their great looks are sure to turn some heads.

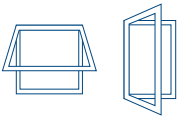

Windows are essential elements. In addition to providing plenty of natural light, they play a crucial role in air circulation and insulation for your home. Choosing the right windows is a vital step toward absolute comfort!

### ALUMINUM FEATURES

*Our aluminum windows are designed to optimize the use of each material.*

- › **Aluminum exterior for durability**
- › **PVC multi-chamber thermal core**
- › **Stylish aluminum interiors**
- › **Excellent insulation**
- › **This thoughtful and targeted use allows for optimized energy performance**

### CHOICE OF INTERIOR AND EXTERIOR COLOURS

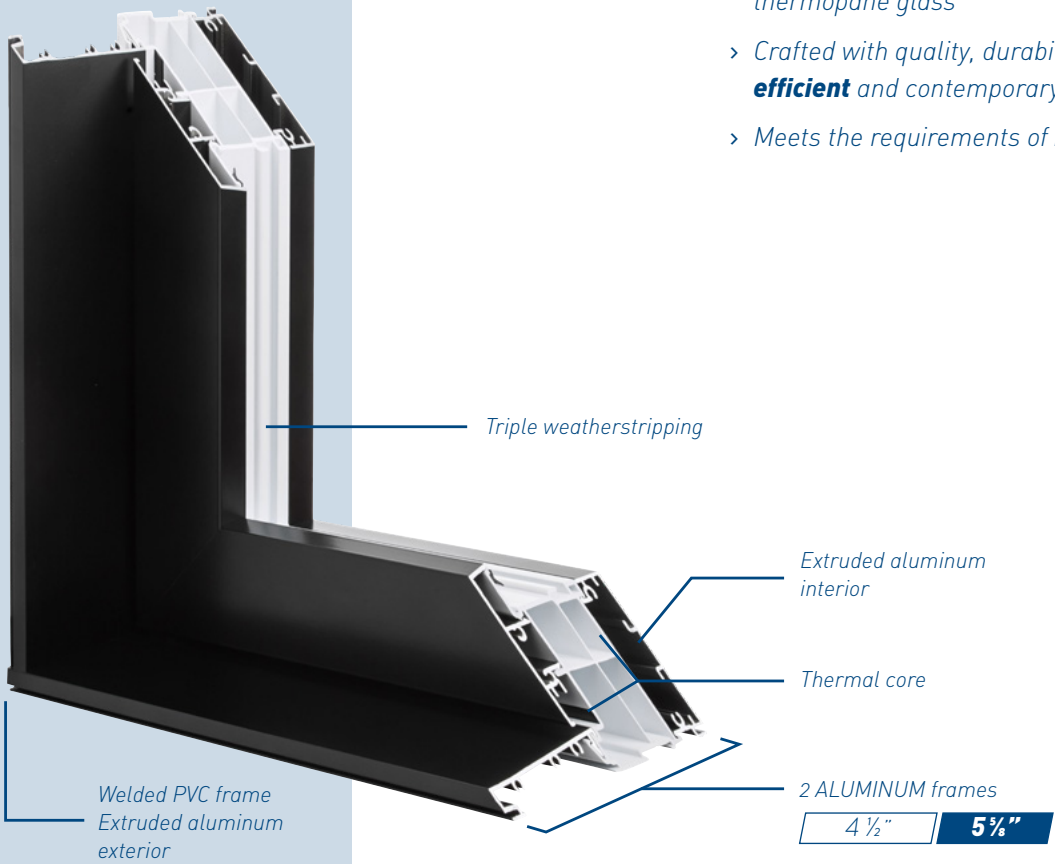

FT-ALUMINUM

### FT-DUAL

FT-Dual casement and awning windows are perfect for Quebec's harsh winds. In addition to their contemporary style, they offer some fantastic advantages. Their durability makes them a popular choice for residential, commercial and institutional buildings, and their exceptional insulation ensures outstanding energy performance. With regard to style, everyone will be blown away by their aesthetic design.

### FT FEATURES

- › Crafted with PVC **multi-chamber** thermal core for its insulating power
- › Designed with interior and exterior aluminum **extrusion** assembled with screws at all four corners
- › Equipped with **triple weatherstripping**, including two compression seals for optimum energy efficiency
- › Sealed unit with **double seal**
- › Equipped with high-performance **spacer**
- › Crafted with energy-efficient **LOW-E ARGON** thermopane glass
- › Crafted with quality, durability, performance, **energy-efficient** and contemporary styling
- › Meets the requirements of **NAFS** and **CSA** standards

LOW-E ARGON OPTION

THERMAL COMFORT

- In summer, it helps keep your home cool.
- In winter, it keeps heat inside for greater comfort.

UV PROTECTION

- Low-E Argon glazing filters out the sun's ultraviolet (UV) rays to preserve the beauty and colour of your furniture, curtains, flooring and artwork.

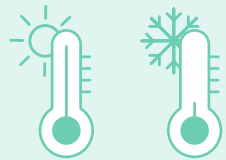

MOULD PREVENTION

- Excessive condensation affects air quality and accelerates window deterioration.
- In cold weather, Low-E Argon glazing substantially reduces the fogging that sometimes occurs on windows and causes mould.

SUNGATE 400

The Sungate 400 is particularly popular in well-heated areas. It improves thermal efficiency and reduces solar heat gain.

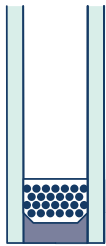

CLIMAGUARD 80/71

The ClimaGuard 80/71 maximizes visible light, solar heat gain and **energy efficiency** for extremely cold northern climates. With its film integrated directly into the glass, ClimaGuard 80/71 is the top choice for our Quebec winters.

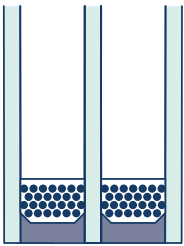

SPACER

INTERCEPT

The Intercept spacer is by far the most popular. Used in over a billion windows in North America, it offers exceptional performance. Renowned for its strength and durability, its smart design sets it apart.

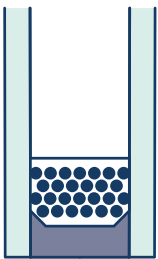

DOUBLE GLAZING

TRIPLE GLAZING

DOUBLE AND TRIPLE GLAZING

Sealed or thermal double glazing consists of two glass panes assembled and sealed in the factory, separated by a layer of insulating air or gas. Triple glazing goes even further by adding a third layer of glass, creating two insulating air or gas spaces. This configuration further enhances thermal and acoustic insulation performance.

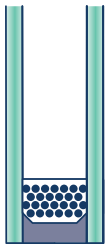

SWISSPACER

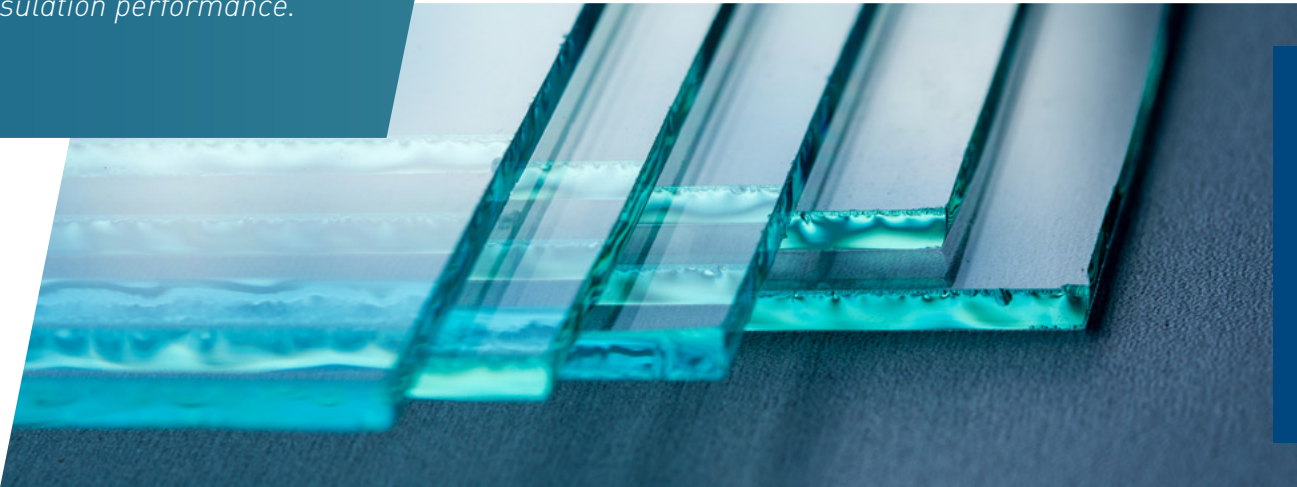

The Swisspacer has been manufactured in Switzerland since 1998 and exported all over the world. The Swisspacer Ultimate used by Robover is made from a composite material that provides **excellent insulation and significant energy savings**. Its ingenious manufacturing process also gives it major qualities.

TEMPERED GLASS

Tempered glass, often referred to as "safety glass," is the result of a special heat treatment process that gives the material unique properties. Its resistance to thermal shock makes it a preferred choice in settings where safety is a major concern.

TEMPERED GLASS

ENERGY EFFICIENCY

The blue ENERGY STAR® is a recognized certification that helps consumers make informed choices when shopping for windows and doors. By purchasing certified products from Fene-Tech, customers ensure superior product quality and energy efficiency.

ENERGY STAR is a program overseen by the U.S. Environmental Protection Agency (EPA), helping businesses and individuals save money and protect the environment by using energy-efficient products and practices. An ENERGY STAR-certified window meets certain energy efficiency standards set by the EPA. These standards are based on the window's ability to reduce heating and cooling costs, as well as its impact on the environment. ENERGY STAR-certified windows are more energy-efficient than non-certified windows, reducing energy bills and greenhouse gas emissions.

WARRANTY

ELEMENTS	PERIOD	COVERAGES AND CONDITIONS
PVC	20 YEARS	DELAMINATION, CRACKING AND MAJOR DISCOLOURATION.
ALUMINIUM EXTRUDÉ	20 YEARS	EXTRUDED ALUMINUM COMPONENTS ARE GUARANTEED AGAINST WARPING FOR 20 YEARS.
OPERATOR	10 YEARS	Fenêtre à battant et auvent bénéficie de la garantie pour le produit dans lequel il est installé Main-d'oeuvre 1 an
HARDWARE	10 YEARS	CASEMENT AND AWNING WINDOWS ARE COVERED BY THE WARRANTY FOR THE PRODUCT IN WHICH THEY ARE INSTALLED LABOUR: 1 YEAR
PAINTED AND LAMINATED COMPONENT	10 YEARS	DELAMINATION, CRACKING AND MAJOR DISCOLOURATION.
LOW-E THERMOPANE, CONDENSATION	QUALITY LIFETIME	WARRANTY UNDER 20 YEARS = 100% AND BETWEEN 20 AND 25 YEARS = 20% AGAINST THE FORMATION OF A FILM (CONDENSATION) DUE TO DUST ACCUMULATION BETWEEN THE GLASS PANES: THIS DEFECT MUST BE CAUSED BY A LACK OF SEALING AND NOT BY GLASS BREAKAGE.
REPLACEMENT THERMOPANE	10 YEARS	LIMITED WARRANTY PROTECTS AGAINST THE FORMATION OF A FILM OR DUST ACCUMULATION ON THE INNER SURFACES OF THE GLASS, CAUSED BY A LACK OF SEALING (NOT GLASS BREAKAGE) AND CONSTITUTING A SIGNIFICANT OBSTRUCTION TO VISION.
THERMAL BREAKAGE	1 YEAR	SPONTANEOUS GLASS BREAKAGE (GLAZING ON THE INTERIOR SIDE OF THE RESIDENCE) WHOSE CAUSE CANNOT BE EXPLAINED.
WOOD COMPONENTS	1 YEAR	ALL WOOD FRAMES AND SHUTTERS ARE GUARANTEED AGAINST WARPING EXCEEDING 6 MM OR ¼ IN.
