***“The Alchemy of Information Protection: A Cybersecurity Druid’s Spell Book”.***

This is a non-technical book about the business of information protection. It is intended for the non-cybersecurity executive and the person who is tasked with creating a cybersecurity program. Many CISO’s will also learn/relearn some keys points in the protection of information and certainly enjoy the war stories. You can check it and comments out at [Amazon.com: The Alchemy of Information Protection: A Cybersecurity Druid's Spell Book eBook : Owen, Rich: Kindle Store](http://Amazon.com: The Alchemy of Information Protection: A Cybersecurity Druid's Spell Book eBook : Owen, Rich: Kindle Store)

The Cyber Security Sam series of books which are a collection of stories about a high school student who ends up working with the authorities to solve cybercrime. The purpose of these books is to motivate young people to join us in the cybersecurity profession.

***“Time Out”*** – The story begins when Sam’s friend notices a timing problem with the scoreboard clock at a basketball game.

***“The Invisible Man”*** – After dealing with the issue of the teachers not getting paid, there is a bank robbery where at one point the best suspect is a ghost.

***“Rosie I’m Home”*** – Starting with a SWAT take down at UVA in Charlottesville, U.S. Secret Service Francis Andrews brings the perp of the previous book back to Roanoke while the local police and FBI are working on potential a kidnapping, car thefts and home invasions.

***“Your Personal Information is at Risk: A Guide for Protecting Yourself”***

This book is about protecting your business or personal information. It has a collection of phone, email, message and social media SCAMs with instructions of how to recognize them and what to do about them.
