

HOW GUTTER GUARDS WORK

Quick Homeowner Guide

Gutter guards are protective covers that keep leaves and debris out while letting rainwater flow freely. They help your gutters do their job with less cleaning and fewer clogs.

Benefits

- Prevents leaf buildup and overflow
- Reduces maintenance frequency
- Protects fascia and foundation from water damage
- Extends gutter lifespan

When They Make Sense

- Homes surrounded by trees
- Areas with frequent storms or heavy debris
- Homeowners wanting low-maintenance protection

When They May Not Be Needed

- Homes with minimal tree coverage
- Gutters already serviced regularly
- Roofs with unusual angles or drainage patterns

Pro Tip

Even with guards, inspect gutters twice a year to ensure proper flow.
