## Beginning Free Motion Quilting

Friday: 9:00am – 4:30pm

Class Fee: \$50.00

Skill Level: Beginner

Kit/Pattern Fee: \$15.00 (includes Fat Quarter with Design for sandwich without top, 90/14 Topstitch Needle, Booklet)

Class Size: Min. 5 Students, Max. 18 Students

In this class you'll learn the basics and beyond of machine free motion quilting on your domestic sewing machine and how much fun it can be, (not to mention rewarding)! We start at the very beginning... Starting with setting up your machine, tensions, needles, threads, and through many different free motion designs. You'll find a rhythm that works for YOU, as you learn to listen to your machine, and you'll make a sampler you can refer to later. You'll come away with new found confidence to carry you forward in this wonderful world of free motion quilting! This is my favorite part of making a quilt and I hope to make it yours.

Supply List:

**Sewing Machine and supplies** (also your sewing manual, power cord and pedal)

**Free Motion Quilting Foot** (If you have more than one, bring them all, we will talk about them)

**Extension Table** (this is a must)

**Single Hole Needle Plate** (If you don't have one yet, DON'T go buy one...I have a trick you can use.)

**Thread-2 different colored spools** (Each spool needs to be a contrast from the other. This is so we can get your tensions right during class.)

**Quilting Gloves**

**Drawing Paper and Pencil** (school lined paper is fine)

### Prep Before Class:

*Needed:*

**Solid color Fat Quarter** (probably white, so your thread will show up)

**Marking tool** (Choose 1 method to mark, Frixion pen, water soluble blue marker, etc.)

**24" Ruler**

*Directions:*

Please do this on **ONE** fat quarter

1. Stand your Fat Quarter TALL (21" tall, 18" wide)
2. Measure to find the middle of the 18" width, should be 9"
3. Draw a line down the middle of the 21" tall fat quarter
4. Measure to be sure you have a 21" tall fat quarter. If so, draw a line across the 18" width every 3.5". If your fat quarter is only 20" tall, draw a line across every 3-3/8".
5. You should have 12 rectangles, 6 on each side of a center line.
6. Now, on **one** of the lower 4 sections, just choose 1, make 1" square grid. This will not come out even because your rectangle is not an even measurement. Just make a grid using 1" measurement and let it come out as it does.
7. Sandwich this up with batting and a back and baste in your favorite method.
8. Sandwich up 3 other fat quarters to practice on.
9. Make 1 more fat quarter sandwich with the fat quarter from your quilt shop.
