

Essay I. AL-Qiyamah 76: 1; 14, 4. XXIX
"From the Soulful Perspective"

By Munther Saadiq Shah

Life is a composite of static interrelated patterns of infinitely fluxuating variables. These can be described in terms of highly ordered abstractions, which when stimulated by the natural forces of cause and effect come together to produce the phenomenon we view or perceive through our senses as reality. Matter is the physical manifestation of the life process. The fact that matter cannot be created or destroyed but is converted to energy, and that it exists on various levels being transformed from stage to stage is the scientific proof of the truth in the spiritual concept of resurrection (life after death). The events of life should not be a sporadic coincidence of chance, but the intellectual application of divine principles designed to develop organization that an environment of peace may be maintained.

Once this is achieved mental spiritual
moral (human) growth can be experienced.
We come to understand the laws working
in creation and are confirmed that we
and we alone are held accountable for
our actions. Diffused consciousness enable
us to reason that the source of all matter
organic and inorganic in creation is of
a common origin though they be unique
in their diverse identity. Through rational
awareness we can focus on truth keeping
in mind that it is independent and is
whether we accept it or not. With proper
application of logic and illogic in behavior
we are able to govern the circumstances
that influence our life. The state of the
world today is testimony to man's weakness
in his use of the mental faculties inherent
in his make-up.

As sure as there is a sun, moon, and stars in heaven there shall be a judgement and the the earth and all the creatures that inhabit it will bear witness to man's negligence, carelessness, selfishness, and irresponsibility. In an arrogant demonstration of a total disregard for the divine message in creation conveyed through the revelations in scripture, nature, and man's own consciousness; the final word before the coming doom is being announced to the nations of this planet. The problems of the deviation from the divine destiny have reached epidemic proportions and crisis after crisis has formed a mountain of despair for the innocent and guilty alike. The future depends on man's ability to unify the collective motives of society and adapt to a universal civilization dedicated to the conservation and preservation of the ecological resources of the earth.

Essay II.

Reincarnation is a belief spawned by those who don't know or understand the nature of self. We hold within our genetic composition the accumulated experiences of countless generations in the evolutionary progression of the human family. The D.N.A. Molecule is an assimilation of this information in to a code of life that enables the species to perpetuate itself on higher levels of existence.

In the subconscious regions of the mind totality of reality is manifested. A barrier of fear acts as a buffer to protect the innocent soul not yet born in the world of knowledge wisdom and understanding of the greater forces working in the creation. The life cycle is infinite. It is a growth process that directs the soul to its creator. It is not until perfection is reached that oneness is achieved.

The death cycle does not begin after life has ended but occurs during physical life, and manifests itself in our actions. These acts are judged and the future course of our lives are

determined. The natural cycle of physical matter is often mistaken as a form of reincarnation; however since in this process the spiritual essence of the being is liberated if the soul is to continue on to the next stage of the life process. If not it is doomed to undergo the agony of decomposition degeneration and impenetrable damnation. In the process of decomposition the structure of the body is broken down or reduced to its lowest term and distributed in creation nothing is wasted. Degeneration is the total destruction of substance that has become so corrupt, decayed or polluted that it threatens the survival of the innocent. Impenetrable damnation is the fate of the soul that does not respond to the corrective measures designed to guide it along the right path to creator. It is a most severe chastisement (Hell) the consciousness allow to exist on a low plane in torment fully sensitive and aware of all past failures. It repeats the cycle time and time again as an example to warn others.

"Soulful Perspectives"

AL-TAKWID 81:1, 2, 4, ~~XXX~~ THE FOLDING UP

The great expansion is a scientific theoretical observation of the state of the universe. the origin of the physical creation was from a single primordial atom that by the will of God appeared in the dark infinite void of space. It then existed motionless in a womb of total triple blackness for six periods of time. It is not at this time known how long these periods were because there was no other reference plane in which to measure; However we can hypothesize that these were equal in duration. Now the assumption can be made that a period is the projected history of the creation completing one cycle of evolution. The only reality the only consciousness was that of the creator, Beyond all description the uncaused cause. Now what was the purpose of this long interval of inactivity? This question shall be analyzed as we further explore the subject. At this ^{PRESENTLY} time we shall address our attention to the major scientific theories of the Creation of the Universe, in

comparison to the basic religious theology.
First there is the Expanding Universe
Second the Steady State
Third the Pulsating Universe

The Expanding Universe has already been briefly discussed. The Steady State is that the Universe always was and always will be and that change is relative to the space that matter occupies, and matter cannot be created or destroyed. ^{IT IS ONLY TRANSFORMED INTO ENERGY} Through Astronomical observation we find that the galaxies are rapidly moving away from each other at the speed of light. Thus increasing the rate of change. Through this process it can be calculated that zero change is the only steady state, this will take place when total isolation of every particle of matter is achieved. The force of gravity being nullified bringing about decay. Considering these factors it is logical to reason that some form of recreation must be constant to maintain a physical existence of matter. The Pulsating Universe begins and ends with a big bang. A eternal phenomenon. Space being infinite the creation being finite. Space is the

unifying force that causes matter to gravitate in a cohesively organized pattern of systems. A counter force or centrifugal force generated by the friction of this pressure producing light which sets matter into motion. Once a velocity exceeding the speed of light is reached mass is multiplied and the boundaries of Creation are extended. When the maximum level of critical mass is reached immediate collapse occurs. Then when maximum density is achieved the expanse repeats its self, from an explosion.

To further clarify the steady state when each atom is isolated it loses momentum and becomes stationary in space until some force causes it to be activated again.

In returning to the question of the period of idleness of the primeval atom we find in the creative process there is an interval of peace between each stage of evolution.

Now at this moment Allah instructs or makes the most painful adjustments this is a mercy to all of creation. This is the motivating force that catapults the subject into the dynamic sphere of reality.

life is the Criterion of experience that measures a creatures ability to retain and follow the pattern of submission ordain by the creator which will guide them along the right path to their ultimate destiny.

In this brief summary we can associate the relativity of the Oiverse theories attempting to explain the origin of the physical Universe. Much time, money and energy is wasted in a vain desire of Pathistic mad scientist to dispute the reality of the Omnipresent Almighty God, Allah Who is One and alone Independent of His Creation Above all needs. Allah is Most True Most Perfect Being, The Beneficent Cherisher and Sustainer of all the Heavens and the Earth. Allah is Greater than anything we can comprehend, there is nothing that can be associated with Him.

O Allah Guard and protect us from the intensified darkness, Have mercy on us and forgive us for our sins, Bless us with the Peace attained through knowledge in action, and understanding

Essay IV - "Soulful Perspectives and Creative Expression"

What is man? The dictionary defines the term man to be an adult male person, a human being, the human race. Individual being mortal. Humanity, mankind. The meaning here implies that man is merely a biological life form. It is through this limited understanding of the word that ^{western society} is in the present state of confusion, crisis and conflict. The influences of the diverse theories based on this elementary truth has traversed the earth with diabolical effects. One must be clear-minded in the approach to the objective of formulating sound psychological axioms as a means to solve the prevalent problems of modern civilization. Step one the construction of a premise based not simply on theory but upon proven truth, fact, and reality before the objective is missed, because a truth can't be taken out of the context of the chronological evolutionary ^{PERSPECTIVES IN THE} history of ^{UNITY} the life's phenomena. ^{IF SO} ¹ ² ³ ⁴ ⁵ ⁶ ⁷ ⁸ ⁹ ¹⁰ ¹¹ ¹² ¹³ ¹⁴ ¹⁵ ¹⁶ ¹⁷ ¹⁸ ¹⁹ ²⁰ ²¹ ²² ²³ ²⁴ ²⁵ ²⁶ ²⁷ ²⁸ ²⁹ ³⁰ ³¹ ³² ³³ ³⁴ ³⁵ ³⁶ His rational mind deceived him, which is portrayed very graphically in the Holy Bible as the serpent, that slides in and out of truth to defend weak ideas. The soul is the spiritual essence - from which the self is born. self is the reservoir of intelligence inherent in the species. The self development is transmitted from generation to generation in the form of psychic energy that is released by electrical chemical reaction in the brain. The product of this phenomenon is a thought. The realm in which the thought emerges is called the mind. An inner world of infinite space. The thought is abstract until the light of truth is perceived through the senses gives it some relationship to the reality

If people are so good, why are societies so bad.

The reason is very simple though the problem is quite complex!!

Ignorance is a weakness, and weakness can not be defended it must be eliminated with knowledge. For knowledge to be effective in dispelling ignorance it must be true knowledge from Allah, Allah is the God of all knowledge. There is no god but Allah. He is One and alone. He begets not nor is he begotten.

People have lost the true knowledge of God, They worship anything and everything or nothing as a god and can not see that it is Almighty God Allah, who created everything. They even say god has begotten a son by the agency of a mortal woman; The wrath of Allah will surely consume the author of such a lie. When man believes another physical body has contained god; hate, envy, jealousy

that they may come to know one another."
