

Psilocybe Cubensis History/Taxonomy List by Taylor Yates of SporeSwaps

This is an estimated/working list, not every known variety will be here and some information may be incorrect. New varieties are constantly being isolated, named, and/or crossed. Please note that this list may have multiple mistakes in it, all of the origin and historical information on this list is what we found in our research to be the most credible and believable. All of this information is supposed, if it's not from the originator themselves. Most if not all originators/iso'ers were reached out prior to releasing this list for permission and clarification of their work and name. If there are any mistakes, we do apologize, please reach out to a SporeSwaps admin to resolve and fix any issues in this list. If you have any other information of differing stories or origins of any of these varieties, please reach out as well. I would also like to note, the term landrace iso refers to a variety that was originally found/collected in the location in which it is named. Mush love to all, and to all, love mush.

- A+ (A-Strain)- originally marketed by Ralphsters Spores, also known as A-Strain
- AA+ (Albino A+)- mislabeled albino, leucistic A+ supposedly originating from Ralphsters Spores
- Alice- AA+ iso, unknown originator
- Acadian Coast- reportedly isolated from Louisiana coast
- Alamo- Albino Amazonian, iso'd by James Block and Jason Redman
- Alacabenzi- supposedly a hybrid of 'Golden Teacher' Cubensis and Psilocybe Mexicana, unknown originator
- Albino Chodewave (ACW)- albino iso of OG Chodewave credited to Uncle J, PJ Holder, Dustin Fischer, Eric Gillium, and Adam Toney
- Albino Monkey Dick/Dong (AMD)- APE iso by Nichy Myco and Suzie Greenberg
- Ajax- little to no information was found about this variety at all. It is mentioned in early blog threads, so it is suspected to be an OG almost lost variety

- AMAK (Albino Melmak)- a true albino Melmak TP iso by Dave Wombat
- American Mystic- MagicMyco cross of PE6 x Purple Mystic
- AMVP- albino TAT x Melmak cross by Jik Fibs and Dave Wombat
- APE- albino PE, apparently originated from Sporeworks and/or Shroomery user Workman, some say APE is a cross of PF Albino x PE and others say it is an albino iso of PE, an albino PE iso is most credited as correct
- APER- APE revert iso by Jake Oncid
- Argentina- landrace from Argentina
- Australian- apparently iso'd from a wild fruit in southern Australia, these rumors are not confirmed however
- Avery's Albino- iso'd albino Cambodian by Albinous White and Robert Young
- Aztec God- a Mexican variety, unknown origin suspected around Mazatec
- B+- commercialized cube by Mr. G, originally marketed as a Cubensis/Azureus hybrid
- Ban Hua Thanon (BHT)- from John Allen, Thailand
- Ban Nathon Dhupatamyia (BND)- from John Allen, Thailand
- Ban Phang Ka (BPK)- from John Allen, Thailand
- Ban Thurain (BT)- from John Allen, Thailand
- BeePee- B+ x PE cross, not related to TidalWave or MagicMyco
- Bilbo- TAT x Melmak cross iso by MycoMama Angela and Fahthyr O Blivion
- Blue Jay- TAT x Melmak iso by Jik Fibs
- Blue Magnolia Classic (BMC)- originally iso'd by two Shroomery users from Mississippi
- Blue Magnolia Rust (BMR)- rust spored iso of BMC, by Mycotopia user Cue? questions over originator
- Blue Meanie (cube)- named by Keeper after Pan Cyan nickname, many say this was just a marketing ploy
- Blue Moon- TAT x Melmak cross iso by Jik Fibs
- Brazilian- landrace from Brazil

- Burma- from Yangon, Myanmar, apparently gifted to John Allen who then iso'd
- Cambodian- landrace from Cambodia
- Chitwan- landrace from Nepal
- Chocolate Krinkle- Mr. Krinkle x El Choco cross by Dave Wombat
- Chodewave (OG CW)- stabilized cross of Tidal Wave x APE originated by Uncle J (Raymond Midichee), different iso'd phenotypes such as Loaves, Scylla, and ACW.
- Clockwerk Orange- TAT iso by Dave Wombat
- Colombian Rust Spore (CRS)- Colombian, rust spored, sold by Sporeworks as B+ for brief time, from Shroomery user Workman
- Colorado- legend has it this variety was iso'd from a wild fruit in Colorado, this rumor is highly debated and questioned as Colorado does not have a climate suitable for Cubensis
- Corumba- landrace iso from Brazil
- Creeper (Keeper's Creeper)- namesake iso by Keeper
- Crooked Mystery- originated from an unlabeled mystery swab and iso'd by Dave Wombat
- Daddy Long Legs- not much credible info available, maybe an iso/rename by Willy Myco, Keeper, or Ralphsters. Apparently originally marketed by Ralphsters Spores
- Destiny- very little to no credible info available on this variety, maybe a suspected Keeper/Willy Myco rename or iso?
- Eclipse- MagicMyco cross of Tidal Wave x Peacock
- Ecuador- landrace from Ecuador, some dispute this claiming Cubensis does not naturally grow there or was introduced to the region by man
- El Choco- B+ iso by Dave Wombat
- Elephant Dung- from John Allen, Thailand
- Emerald Gates- Melmak OG x Pearly Gates iso by James Cruz
- End Game- TAT x Melamk cross iso by Jik Fibs
- Enigma- sporeless yet stabilized blob-like mutation

- of Tidal Wave, also known as TidalWave 2
- E-Froot- Enigma revert iso by Dave Wombat, known to throw albino and pigmented fruits
 - Entheogen Explosion- little to no information available, apparently originally available from PremiumSpores
 - Escondido- landrace iso from Puerto Escondido, Mexico
 - Eyelike- TAT x Melmak cross iso by Jik Fibs
 - F+- also called Florida White, commonly leucistic iso, unknown originator
 - Falbino- apparently a cross of PF Albino x F+ by Shroomery user The Chosen One
 - Fiji- landrace apparently from the island of Fiji
 - Gandalf- TAT x Melmak cross iso by MycoMama Angela and Fahthyr O Blivion after initial cross by Jik Fibs
 - Ghost- TAT iso by Jik Fibs, further iso Ghost Rider
 - Golden Halo- muddled history, some claim these originated from a wild Jamaican sample, some claim this was iso'd from a wild fruit from Gulf Coast USA in 2012 by GoldenHaloSpore Company, others say this is an iso of CRS credited to Shroomery user Morelman in 2015, in other words, we may never know the true origin of Golden Halo
 - Golden Mammoth- little history, many say this is a B+ iso/rename by Mr. G, some say these drop rust or gold spores
 - Golden Teacher (GT)- generic commercialized cube, some say originally from the coast of Georgia, USA, unknown originator, some say Mr. G
 - Great White Monster (GWM)- apparently, iso'd from a chemically altered white fruit, also apparently a cross of Puerto Rico x AA+, some even say that GWM is just an iso of AA+, questions over originator
 - Ground Zero- Leng x Choda cross by Dave Wombat
 - Guadalajara- landrace from Guadalajara, Mexico

- Gumby- Melmak TP iso by Dave Wombat, same origin as AMAK
- Hanoi- from Vietnam, iso credited to John Allen
- Hillbilly- isolated from a wild Alabama fruit, unknown originator
- Huautla- landrace from village Huautla de Jiménez in Mexico
- Illusion Weaver- apparently a Keeper iso/rename
- Jack Frost- TAT x APE cross by Dave Wombat
- Jedi Mind Fuck (JMF)- unknown origin, possible Keeper or Willy Myco iso/rename but there is little to no credible information available on this variety.
- John Allen (Allen Strain)- namesake variety brought back and iso'd by John Allen from Thailand, commonly confused with species *Psilocybe Allenii*, also named after John Allen
- KAPE- KSSS x APE cross, unknown originator
- KSAT- KSSS Squat x TAT cross by Dave Wombat
- Koh Samui Classic (KSC)- from Hua Thanon, Thailand, originally credited from John Allen
- Koh Samui Super Strain (KSSS)- iso of KSC, questions over originator, various phenotypes from 'peyote' to 'squat'
- LAPE- Long APE, iso by Nichy Myco and Suzie Greenberg
- Leng- squatty GT iso by Dave Wombat
- Leucistic Treasure Coast (LTC)- iso originated by Luna Morningstar
- Lex Luther (Cream Lex Luther)- originated and iso'd from wild samples by Berserker Genetics, Cream Lex Luthor known to be leucistic iso
- Lipa Yai- iso from Lipa Yai, Thailand, credited to John Allen
- Lizard King (LK)- iso'd by Shroomery user Lizard King, apparently from Gulf Coast, USA
- Loaves- stabilized phenotype of Chodewave (TW x APE) credited to Uncle J
- Lucid Gates- Melmak OG x Pearly Gates iso by James

- Cruz, same cross different iso of Emerald Gates
- Mak 120- Melmak OG iso by Taylor Yates and Luna Morningstar
 - Mak/AA- Melmak OG x Avery Albino cross, most likely unstable Avery Albino
 - Malabar- landrace from the Malabar Coast in India
 - Malaysian- from Malaysia, credited to John Allen
 - Mars- apparent iso by Shroomery user fishlevelmidnight, unknown location
 - Mazatapec- landrace from Mazatec, Mexico
 - McKennai- supposedly a PE hybrid/cross by Terence McKenna, not much other credible info available
 - Melmak Revert- reverted Melmak iso, unknown originator, possibly Edible Earth Fungi
 - Melmak 118- Edible Earth Fungi Melmak OG Iso
 - Melmak (Melmak OG or Homestead PE)- PE iso originally from the Homestead Company, bought out, renamed from Homestead PE to Melmak, and distributed by Alf in 2017, many say Melmak is the closest to the OG PE genetics available now
 - Melmak TP (Thick Penis)- Edible Earth Fungi Melmak iso
 - Menace- iso'd from Texas by Shroomery user lostfreddy
 - Mexican Albino- leucistic cube mislabeled albino, from Mexico and credited to John Allen, originally marketed by Ralphsters Spores
 - Mexican Dutch King- found in many coffee and head shops in Amsterdam, many credit this variety to a lost European High Times vendor
 - Mexicube- some say this is an iso by Mr G, others say this is a Keeper variety, suspected Mexican origin
 - Moby Dick- leucistic cube, some say this variety is just renamed AA+ and others say its a cross of AA+ x GT, originator unknown
 - Mr. Krinkle- TAT iso by Dave Wombat
 - MVP- TAT x Melmak cross by Jik Fibs and Dave Wombat
 - Nezuko- MagicMyco iso of Namuang Thailand

- Normak (Normac)- apparently a Melmak/PE iso by Reddit user SjKoD, iso'd from a 3 gram fresh sample
- Nutcracker- Yeti (TAT) iso by Myco Clay and Strictly Spores
- Omni- Melmak OG iso, known to throw blob like mutations, originated by Steven K
- Orissa India- from India, credited to John Allen
- Palenque- landrace from Palenque, Mexico
- PE6- cross of PE x Texas Gulf Coast (TGC), credited to Shroomery user RogerRabbit
- Peacock- Magic Myco cross of Tidal Wave x Aztec God x AA+ (some say Avery Albino instead of AA+, unconfirmed from source)
- Pearly Gates- Melmak x TAT cross iso by TAT Syndicate member Michael Montgomery
- PES Amazonian (PESA)- from the company Pacifica Exotica Spora, likely originated from Colombia, originally marketed as a Cubensis/Azurescens hybrid, some say the A in PESA does not stand for Amazonian but rather Azurescens
- PES Hawaiian (PESH)- PES headquarters was based in Hawaii, named this iso after their home State
- Penis Envy (PE)- an alleged iso'd mutation originally from the Amazonian rainforest credited to both Terence McKenna and Steven Pollock in the 1970's, much debate with Rich Gee being true originator (see Hamilton Morris interview)
- PE+- an apparent cross of PE x B+, unknown originator
- Penis Envy Hawk (Hawk PE)- MagicMyco cross of PE x Mazatapec
- Penis Envy Uncut (PEU)- apparently a cross of PF Albino x PE, credited to Shroomery user Workman
- PF Albino- unstable albino PF Classic iso, originator believed to be Professor Fanaticus
- PF Classic- iso named after famed Professor Fanaticus, apparently originally marketed by the Homestead Company

- PF Redspore- rust spored PF Classic iso, unknown originator, suspected Professor Fanaticus
- Phobos- albino Mars iso by Mycocat Genetix
- Pink Buffalo (PB)- from Thailand and credited to Milo Zverino, named after rare pink buffalo, apparently found on water buffalo dung
- Plantasia Mystery- apparently an outdoor grow/isolation by The Grow Room, from a Thai cube, some have rumored this to be a Cubensis/Azureus hybrid
- Puerto Rico (PR)- landrace from Puerto Rico
- Purple Mystic (PM)- an iso from Plant City, Florida by Shroomery user blackd0ve420
- R44- apparently originated and iso'd by Ralphsters Spores and associates from wild American samples
- Redboy- red spored iso/cross by Shroomery user Roger Rabbit, apparently an OG almost lost variety, legend has it that modern day Redboy comes from a Roger Rabbit snake venom cross of a true red-spored cube and Puerto Rico
- Riptide- TAT x Tidal Wave cross originated by Berserker Genetics and Seven Del Gato
- Roatan Honduras- apparent landrace from the Roatan island off Honduras
- Roger Rabbit (RR)- leucistic TAT iso by Kilor Diamond
- Rusty Whyte (RW)- cross of AA+ x Colombian Rust by Shroomery user PastyWhyte
- Scylla- stabilized phenotype of Chodewave (TW x APE) originated by Uncle J
- Shamans Gift- very little is known of this variety, some suspect this to be a Keeper iso
- Shakti- Albino Malabar iso by MycoMama Angela and Fahthyr O Blivion
- Shooting Star- Keeper iso, not much known other than that
- South African Transkei (SAT)- reportedly from South Africa, not much documented
- South American- from Venezuela, apparently introduced into the region by man

- Sporeworks PE (SW PE)- standard isolation of PE by Sporeworks, known to blob and mutate, assumed iso by Workman
- Stargazer- apparently iso'd from a wild sample originally in South America near Incan ruins. Suspected in Peru. This variety is held in high regard by Paul Stamets
- Starry Night- APE isolation by Jeff Hutchens
- Sunny Side Up (SSU)- cross of Melmak Revert x APE by Nichy Myco and Suzie Greenberg
- SyZyGy- OG, almost extinct variety, SyZyGy was the name of McKenna brother's shop in Hawaii, iso apparently from Terence McKenna and distributed/revived by Free Spore Ring Europe
- Tasmania- landrace apparently from Tasmania
- OG True Albino Teacher (TAT)- albino GT iso by Jik Fibs
- Wombat TAT (WTAT)- OG TAT iso by Dave Wombat
- TAT Black Cap (TBC)- TAT iso by Dave Wombat and Jik Fibs, further iso Harly Quin
- TePe- Magic Myco cross of Tidal Wave x Penis Envy
- Texas Gulf Coast (TGC)- landrace iso from the gulf coast of Texas, unknown originator
- Thai Elephant Dung- from Thailand, credited to John Allen, supposedly found under wild elephant dung
- Thai Lipa Yi- from Thailand, credited to John Allen
- Tidal Wave (TW)- Magic Myco cross of PE x B+, multiple iso's and variations such as TW4 and TW2 (Enigma)
- Treasure Coast- supposed landrace from Florida's Treasure Coast, some say Mr. G originated/iso'd this variety
- Trinity- MagicMyco cross of PE x Tidal Wave x Aztec God
- Tsunami- MagicMyco cross of Tidal Wave x Aztec God
- White Teacher- leucistic Golden Teacher, unknown originator
- Wollongong- landrace apparently from Southern Australia, however this is not confirmed and is debated

- Xilo- suspected Mexican origin, not much documented on this variety
- XXX- TAT x Melmak cross iso by Jik Fibs
- Yeti- TAT iso by Jik Fibs, various further isos like Nutcracker, 2.0, King Yeti, Yoda's Yeti (Seven Del Gato iso) and Deep End
- Ymir- GT iso by Dave Wombat
- Zillacybin (Zilla)- MagicMyco cross of Lizard King x KSSS x APE
- Z Strain- Keeper iso/rename, many people assume this to be B+ iso
