What Can Fox Systems Do for Your Organization?

Fox Systems is a full-service electrical contractor providing service to a wide range of industries. We provide Design-Build Services and Engineering Services for all types of electrical systems, including turnkey electrical power distribution systems or upgrades, preventive maintenance, and service for existing electrical systems.

We offer complete lighting system design and installation as well as upgrades to existing lighting systems that meet EPACT 2005 and LEED (Leadership in Energy and Environmental Design) standards.

We also offer Systems Integration for turnkey automation systems and modifications or upgrades to existing control systems. We can handle all your PLC, VFD, and HMI needs.

We can provide state of the art Fire & Security Protection Systems along with computer-based Video Surveillance Systems.

Our people make the difference because of our commitment to the success of your organization. If you give us the opportunity, we will work hard to earn your trust and give you the support that you need to bring your electrical systems into the future with years of trouble-free operation.

Fox Systems, Inc.

Services Provided

Power Distribution Systems

- Turnkey Low and Medium Voltage Power Distribution System Solutions
- Upgrades to Existing Power Distribution Systems
- Facility Lighting Design and Installation
- Troubleshooting and Repair Service for Switchgear, Transformers, and Circuit Breakers

Engineering Services

- NFPA 70E – Arc Flash Incident Energy Calculations and Labeling
- NFPA 70E – Arc Flash Incident Energy Mitigation
- NFPA 70E – Arc Flash Safety Training Presentations
- NFPA 70 National Electrical Code Audits, and Value Engineered Compliance Solutions
- Energy Demand and Power Quality Monitoring

Systems Integration, Controls, and Drives

- PLC Systems Integration
- Custom Designed and Built Electrical Control Panels and Motor Control Centers
- Turnkey Relocation of Existing Electrical Control Systems
- VFD Retrofits for Pumps, Fans, or Other Motors
- Troubleshooting and Repair Service for PLC/PAC, HMI and Variable Frequency Drive Systems

NFPA 70B - Preventive Maintenance and Testing

- Preventive Maintenance and Testing of Low and Medium Voltage Transformers, Switchgear, HVLs, and Busway
- Preventive Maintenance and Testing of Low and Medium Voltage Ground Fault Systems, Relays, and Circuit Breaker Trip Units

Low Voltage Systems

- Fire Alarm Systems (Design, Installation, Inspection)
- Access Control Systems
- Video Surveillance Systems
- Automated Gate Systems
- Field Service for Communication Networks.
