

Maryland (MDSHA)

717 & 721 - Flexible Guardrail Delineators

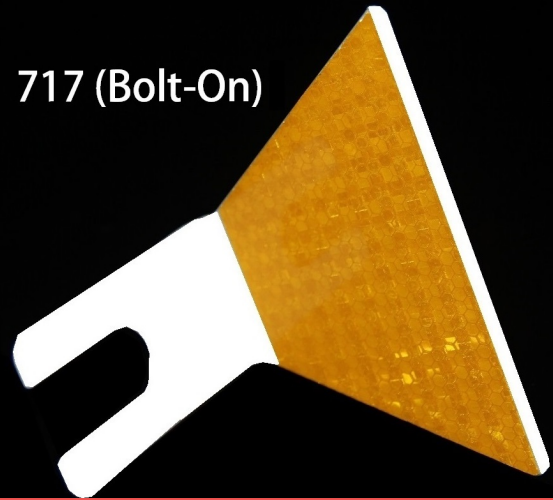

Artuk Model 717 & 721

Each have 9 square inches of reflectivity providing excellent delineation. The shape of both units allows each to fit comfortably within the channel of the guardrail protecting it from accidental damage and vandalism. Installation is quick and easy using either existing bolts (717) or cement (721). Both units are available in either Yellow or White reflective sheeting (single or double sided)

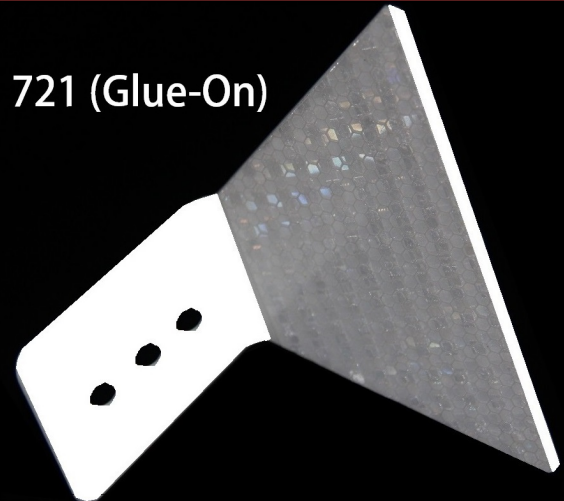

FEATURES

- Good visibility under all weather conditions
- Smooth, high-gloss surface sheds dirt, dust and water for long-lived reflectivity
- Reflective sheeting surface will not separate from mounting bracket due to weather or temperature and adheres so tenaciously it is virtually vandal proof
- Rugged Polycarbonate bracket has slotted base (717) which fits under the collar of existing guardrail bolt or semisolid base (721) which glues onto guardrail
- Will not be damaged by ice or snow thrown to the side by snow plows

717 (Bolt-On)

721 (Glue-On)

Bracket - High Impact Polycarbonate
Approx .085" thick (5 1/4" x 3")
