

RT-90

The **RT90** offers a bright, smooth exterior, which helps to eliminate the build up of dirt and moisture. It exceeds Federal and State delineator photometric standards.

The **RT90** helps to increase safety in inclement weather conditions, providing better visibility in general road conditions. All **RT90** reflectors are hermetically sealed against moisture and feature a 1/4" (6.35 mm) center mounting hole.

Divergence Angle (Degrees)	Entrance Angle (Degrees)	Intensity - Candle Power Per Foot-candle by Color		
		Crystal	Amber	Red
0.1°	0°	120	75	40
0.1°	20°	50	30	16

Specifications:

Size - 3-1/4" Diameter
Reflective Area - 7 square inches

Materials

Housing: Acrylonitrile Butadiene Styrene (ABS), Aluminum or Plastic Housing available upon request. As well as center hole grommet

Reflector: Methyl Methacrylate

Standard Colors: Amber, Crystal, Blue, Red, Green (other colors available upon request)
