Care Instructions

NOTE TO CUSTOMER

To maintain the integrity of your treats, keep them away from direct heat and sunlight to prevent the chocolate from melting.

Refrigerate any leftovers to prevent spoilage and ensure your box is properly supported. For optimal storage, place the box on the car's footwell to utilize a flat surface and benefit from air conditioning. Refrain from holding the box on a passenger's lap or exposing it to direct sunlight, which can cause the chocolate to melt.

Chocolate-covered strawberries are highly perishable and should be consumed within 48 hours. Refrigerate promptly if not consumed immediately, but avoid freezer storage.

Please note that we are not liable for remaking orders that are not picked up timely, damaged from a fall, left unattended in a hot vehicle, or exposed to the elements. If you desire a fresh order, place a new order at full price for an available date.
