

Election Truth Alliance Seeks Legal Action to #VerifyTheVote:

When an eligible voter casts a ballot in an election, it is their right and expectation for that vote to be accurately counted. The Election Truth Alliance (ETA) remains concerned about possible voter disenfranchisement in the 2024 U.S. Presidential Election. Reasons for concern include:

- Warnings from cybersecurity experts that significant election security breaches took place between 2020 and 2024, making hand recounts in swing states advisable.
- The U.S. Department of the Treasury's recent sanctions placed on Iranian and Russian actors for attempted foreign election interference.
- FBI-confirmation of 200+ bomb threats originating from Russian email domains called into polling places on election day.

More recently, the ETA's analysis of ballot-level voting data has identified patterns consistent with manipulation – raising concerns about the integrity and legitimacy of the results as reported.

To ensure voter confidence in this and future elections, our organization is seeking to open lawsuits in key states, as quickly as possible, to verify the election results in targeted counties where data indicates potential manipulation. To do this, we need:

- **State-Specific Legal Practitioners Welcome:** The ETA invites additional legal practitioners who are licensed to practice in the seven swing states, particularly where ETA's data and analysis indicates the strongest signs of manipulation, to get in touch. County-specific data that we have already analyzed will be posted to our website in the coming days as we continue to work through data available for other impacted states.
- **Volunteers.** If you are interested in sharing your time and expertise with us to support this effort, please visit the volunteer sign-up sheet on our website.
- **Donations and Contributions.** The ETA is a grassroots, non-partisan organization. While our non-profit status is being finalized, you can contribute to our interim legal fund on the 'Donate' section of our website.
- **Partners, Validators, and Amplifiers.** We are seeking like-minded organizational partners, experts, and communities to amplify our message.

Common-sense election hygiene – hand recounts, voting system audits, and other integrity checks – are all critical components of a strong and functional democracy. In the weeks that followed the 2024 US Election, no recounts were formally requested by presidential candidates prior to the state-set deadlines. As more data becomes available, it has become clear that the American electorate would benefit from verification measures.

We welcome and invite you to be part of our movement to ensure that every vote counts, and that the democratic process remains transparent, free, and fair.
