

Next Generation Laminate Flooring

The Ikebana & Bonsai Collections are the next generation of water-resistant performance laminate flooring. Redefining the category with latest modern neutral fashion in colors, width, lengths, EIR and ultra-matte finish with a proprietary HDF-5 Core technology (max 5% thickness swell NALFA LF-01 Sect 3.2.) AC4 wear layer and Uniclic locking system.

KEY POINTS

Best in Fashion and Design

15mm is thickest in industry

300 hr water absorption test (See diagram below)

All performance specs are tested and available

IKEBANA

collection

Ultra-wide, Ultra-long

BONSAI

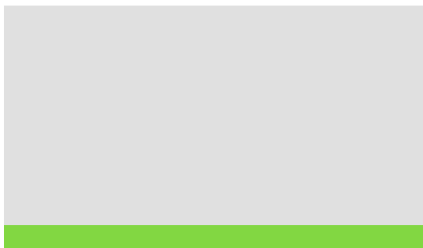

collection

Wildly Popular Colors

Thickness Swell Rate Test Results

Swell rates measures how flooring reacts to moisture—critical for lasting quality. A higher swell rate means the planks are absorbing more water.

NEXXACORE PERFORMANCE LAMINATES

Swell Rate 5% (EXCELLENT)

LEADING "WATERPROOF" LAMINATES

Swell Rate 10% (AVERAGE)

STANDARD LAMINATES

Swell Rate 18% (POOR)
