

NexxaCore™  
The next generation flooring

LAMINATE CATALOG

Introducing the Next Generation of Laminate Flooring.

NexxaCore is proud to offer the latest flooring that redefines the previous image of laminate flooring. This new generation of performance laminate flooring passes the NexxaCore quality standards and offers exceptional durability and aesthetic style.

From the AC4 Commercial Melamine Wear Layer featuring Aluminum Oxide to the innovative NexxaCore HDF-5 Core, this flooring offers unparalleled water resistance and stability. The included 3mm EVA underlayment ensures a quiet and comfortable living environment, and its organic, biodegradable fiberwood core brings it closer to real hardwood floors.

However, what truly distinguishes NexxaCore is its fashion style. Curated with the top trending colors by our designers, this performance laminate flooring is on the cutting edge of interior design offering a range of clean, wide neutrals and rich brown tones.

The Matte Zero Finish technology brings a high quality, low gloss finish for authentic, oil-finished flooring looks. The flooring is resistant to wear, stains, and impacts, making it ideal for both residential and medium commercial spaces. Moreover, it's Floorscore Compliant for Indoor Air Quality, with no detectable formaldehyde, and can be installed in areas prone to moisture.

Elevate your space with NexxaCore's next generation laminate flooring – the perfect fusion of style and functionality.

# IKEBANA

Ultra wide, ultra long

the IKEBANA COLLECTION showcases a clean, understated color palette to let you truly express yourself. It's ultra-wide 9.3" x 72.25" planks add a sense of expansiveness to any room. Relax and enjoy this premiere collection knowing that it's water-resistant and the multi-layer construction makes it as sturdy as it is beautiful.
