TRAILER CURTAIN INSTALLATION GUIDE

Professional Quality. Built to Last.

TOOLS & MATERIALS

DRILL
w/ 3/16" bit

POP RIVET GUN
w/ 3/16" rivets

FLAT
SCREWDRIVER

3/16"
POP RIVETS

BEFORE YOU BEGIN

- ✓ Read all instructions before installation.
- ✓ Make sure the trailer wall is clean and free of debris.
- ✓ Work carefully and take your time for the best results.

PART 1 | INSTALL THE TRACKS

1

POSITION THE TRACK

Locate where on the trailer wall you want to mount your channel track.

2

DRILL FIRST HOLE

Drill a hole in the flange part of the track, approximately 1" from the end.

3

DRILL INTO TRAILER WALL

Using the same hole, continue drilling until you pierce the first layer of the trailer wall.

4

INSERT RIVET

Place a pop rivet in the hole, hold the track flat against the wall, and secure with the rivet gun.

5

SECURE THE TRACK

Repeat along the track, installing rivets every **12-16 inches** to ensure proper support.

PART 2 | INSTALL THE CURTAIN

6

PREPARE THE CURTAIN

Unzip the sides (and top if your unit has a top zipper).

7

INSTALL TOP SECTION

- Slide the top strips (or top of the curtain) into the ceiling-mounted top track.
- Use a flat screwdriver if necessary to open a small part of the track to make sliding easier.

8

INSTALL SIDE SECTIONS

Slide the side strips into the side channel track, starting from the top and working downward.

9

SECURE WITH ZIPPERS

Zip the sides (and top, if applicable) together to complete installation.

PRO TIP

Properly securing the tracks is essential for smooth curtain operation and long-term durability.

Take your time and space rivets evenly for the best results.

INSTALLATION COMPLETE!

THANK YOU FOR CHOOSING
RIGGINS CANVAS & AWNING LLC!

FINAL CHECK

- ✓ All tracks are secure and evenly riveted.
- ✓ Curtain slides smoothly in all tracks.
- ✓ Zippers function properly and are fully closed.
- ✓ Curtain is aligned and hanging correctly.
