

The Faith Leader Guide to the BIGGEST DECEPTION OF OUR TIME

How to understand the 2020 pandemic in light of
God's word and the science

"I send you out as sheep in the midst of wolves; so be wise as serpents
and innocent as doves." - Matthew 10:16

With a single directive, our movements were stifled. Our momentum was lost.

But WHO gave that directive? And was it justified?

How did we get here?

By the fall of 2019, **hundreds of thousands of people around the globe were protesting against** the single most powerful industrial complex in the world, the pharmaceutical industry and their forced implementation of mandated medicines, and government overreach in relation to it. (For more details, www.faithandpharmacy.com) (1)

Many Americans were blissfully unaware of the censorship that had been slowly happening during the previous year, across all our major social media platforms: Google, Youtube, Facebook, etc.(2) Many Americans assume that we will continue to live in a state of freedom forever – without ever actually having to fight for it – since our forefathers already did that.

Many Americans were not aware that a great deal of deception has been handed out by many of our major institutions, especially the pharmaceutical and chemical industries. (3)

A small number of citizens have been fighting for a few years to bring awareness that our legislators are being paid handsomely to implement laws that violate our **civil rights**, our **Christian rights**, our **Constitutional rights** (4), and our **bodily autonomy rights**.

SARS2/COVID19 IS UNLEASHED

- Jan 24th, the US Congress begins working on the CARES ACT, a bill that will bring relief to US citizens while the economy is shut down during the lockdown. **Wait a minute. How did they know this far in advance that there would need to be a shutdown?** After all, at this point there were less than 50 people in the US who were proven to have COVID.
- Jan 30th, US borders are closed to travelers from China
- Mar 13 – US begins implementing lock-down strategies: schools close, businesses are forced to close, fear overtakes the country – and the rest of the world
- Early March – genomics researchers in the US are able to determine that this new virus strain is created in a lab – by splicing several strains into one. We may never know if it was released by accident or on purpose
- Mid-April – We realize that the original models of 2 million Americans dead from this virus, is a serious over-estimate, by about 95%. The new argument is that we must remain on lockdown to ‘flatten the curve’. A month later the curve had been flattened, but the new argument was that we need to avoid letting the virus reach any more people. Scientists around the globe (at least the ones who aren’t tied to the industry funding of pharma): virologists, epidemiologists, and doctors are stating publicly that a lockdown can not stop a virus – only perhaps delay it a bit. They state that once a virus begins it’s trek around the world, it will find all humans. Our best defense against any virus is a strong immune system and metabolism. Then we will develop antibodies against the virus when we experience it – we may or may not feel symptoms.

It’s hard to accept that a virus will lead to death for some people. However, 35-50,000 people die from the flu viruses each year in the US.(5) We know that viruses kill. It’s sad for sure. But we expect it. It seems this Covid virus is stronger, and will end more lives than the typical flu – but not the originally projected 2 million, and not even 10% of that. Perhaps 5% of that estimate. So are all the actions we took originally still warranted? (6)

Ultimately what happened to those hundreds of thousands of demonstrators who were rallying around the world to bring awareness to the plight of freedom-loss? What happened to all of us who were previously out in the public domain attempting to ‘wake up’ the average citizen to government overreach, and the slow, creeping loss of our Constitutionally guaranteed rights? **We were suddenly, and very effectively, silenced. Around the globe.** In the time it took to write a newspaper article containing gigantic doses of fear. Coincidence or plan?

BUT WHO WOULD WANT TO SILENCE PROTESTORS AND LOCK DOWN COUNTRIES?

In each country that went into lock down, the edict would’ve come through that country’s Ministry of Health or Health Department or Center for Disease Control. But, who is advising those entities?

Make no mistake... it is the single most powerful conglomerate on Earth, the pharmaceutical industry (7). This is also who is paying off our legislators, medical professionals and gov’t officials to promote only the industry narrative – that only meds/vaccines will save the world (8). And so there is this massive search to find the next big medicine or vaccine. To the exclusion of all natural, God-given means of saving humanity from disease and illness. And, it seems... to the exclusion of Jesus Christ, as true Savior.

WHY WOULD THE PHARMACEUTICAL INDUSTRY WANT TO IMPLEMENT CONTROLS LIKE THIS?

Think about it this way, if pharma can convince our legislators to mandate specific meds (which they do through lobbying payments) by the creation of laws, that means that roughly 350,000,000 doses of that medicine will be purchased in the US alone. There would be a captive market. This is a windfall for any business. How much money would an industry be willing to shell out, in order to guarantee this huge sale? And if it can be done, then why stop at one drug? Why not pay out more money to guarantee more monster sales?

In science, it is well known that every human body is different. A medicine that helps one body, may cause an allergic reaction in another, or some other life-threatening effect. There is no ‘medicine’ on the face of the Earth that is 100% safe for all humans. If we know that all medicines will injure or kill a certain percent of the population that consumes it – why would we ever want to force someone to take it? Wouldn’t that be akin to Russian Roulette? Should people have a choice in the matter, or should other humans have the options of controlling them by forcing meds?

This process has already begun in the vaccine world. In 2019, 38 states fought against mandating vaccines for all school children. These mandates came with zero exceptions – even if the child has a known risk for death. Previously there were exemptions that allowed parents to not get their child vaccinated: if they thought the child might be injured or if they stood against vaccines due to religious beliefs, because most vaccines have aborted fetal cells in them.(10) The law to mandate vaccines passed in NYS. Parents have pulled children out of school rather than chance killing them. What would you do as a parent if you knew the vaccine might kill your precious baby? Or if you believed your Bible when it said, “Do not partake in another man’s sin,” and you truly believe that injecting your baby with a medicine that contains aborted fetal cells would be just that.

Those of us who’ve been watching this loss of freedoms coming over the last several years are absolutely so horrified we can barely put this all into words that make sense. It’s overwhelming. It’s exhausting, and yet we cannot take a break, as this train is rolling so fast down the tracks that we may not be able to stop it, even if we convince 50% of US citizens to join in our battle. But alas, at this point such a meager number of patriots have an understanding of the extremely serious nature of this current situation.

We are at the point of begging people to try to see through the media hype and the media misinformation campaign. Remember, the media companies are owned by the same people who own the pharma companies and the world banking system. This is a force so intermingled and so large, that surely man cannot stand against it, and only God has the power to stop. We must pray in earnest, and we must try to alert others.

Other concerns around this issue:

H.R. 6666 is a bill currently before the US congress.(11) It's title is: COVID-19 Testing, Reaching, And Contacting Everyone (TRACE) Act. This is an unconstitutional bill that opens the door to human tracking & medical mandates. Covid is a lab created virus, released upon society – for what? Accident or Plan?

Patent # 060606 was awarded to Microsoft earlier this year.(12) This gives Microsoft the ability to trace human beings through the cloud, and award cryptocurrency based on the human's actions. It lays the foundation for a medical police state that gives unlimited power to gov't agencies and the industries with which they partner. There are no mechanisms for individuals to opt out or that protect their privacy rights.

In early 2020, 2 unconstitutional projects are assigned random contract #s, both inflict a severe monitoring of humans and they both just happen to have the #666 assigned. Coincidence?

VACCINE CONCERNS:

COMMON CONCEPTION	SCIENTIFIC DOCUMENTATION STATES
Vaccines are safe	According to the US Supreme Court, vaccines are "unavoidably unsafe". Over \$4 Billion have been paid out to compensate for vaccine caused injuries (including autism) and death (13)
Vaccines are effective	Most are only effective at creating a certain antibody in some of the individuals who receive it. No one has ever proven that those antibodies actually prevent infection. We know that very often, those already vaccinated become infected with the infectious agent later anyway. (14)
Vaccines are the only way to protect a human against these life-threatening infections.	Scientific research proves that there is one way to fight all infections even better than vaccines: a strong immune system and strong metabolism. (15) The Bible teaches us what we need to do to build a strong immune system. God designed a system far superior to anything a vaccine can offer. (16)
Vaccines manufacturers (mfrs) are philanthropists – providing a product that is for the good of humanity, giving us something that will save our life	Vaccine mfrs are paid billions of dollars each year. They create a product for sale. They are corporations, with boards and stockholders, and their bottom line is their only concern. By law they must create the most profit possible.
Vaccine mfrs can be sued if they create a batch of vaccines that is in an incorrect formula and it kills someone's baby	Vax mfrs are immune from prosecution over vaccine injuries or deaths. They cannot be sued for almost any reason in regard to vaccines. (17)
Vaccine mfrs can be trusted	There is only one thing that a Vax Mfr can be sued for - FRAUD! The four major US vax mfrs have been sued in the last 20 years to the tune of billions of dollars. No one ever goes to jail, even if the fraud killed kids.
Vaccines do not cause autism – the vax mfrs have stated that to be so	Actually the opposite has been proven. One can actually follow the functional pathway by reading The Environmental and Genetic Causes of Autism by James Lyons-Weiler, PhD (18) Also, the movie VAXXED highlights the CDC's 2004 study that revealed that the MMR Vax causes autism in some children. (19)

COMMON CONCEPTION	SCIENTIFIC DOCUMENTATION STATES
Vaccines are just the antigen and saline solution, so of course they are just fine to inject	Vaccines contain some of the most toxic ingredients on the planet: mercury, formaldehyde, animal tissues (pork, cow, dog, monkey, mouse, chicken and more) that are laden with rogue viruses and retro-viruses. (20)
Vaccines are a simple medicine without side effects	Side effects as listed on vax package inserts include: Anaphylaxis, arthritis, brain swelling, aseptic meningitis, pneumonia, urticaria (uncontrollable skin rash), hemorrhaging, nerve deafness, inner ear infection, eye nerve problems, eye infections, urogenital infections, and yes.... Even DEATH. Listed right on the insert. (21)
These facts listed in the scientific documentation column cannot be true, since no professionals are speaking out about the problems	Many, many medical professionals are speaking out. But they are not being heard. They are being silenced, in many ways. Look for some references on (22) www.faithandpharmacy.com

Considering that the pharma industry has committed so much fraud, deception, injurious behavior, and even caused deaths without remorse, why would a Christian want to become entangled with something that the industry wants to force upon us? If possible, should we not consider completely severing ties with an entity that seems fraught with an overload of evil?

Does the Bible say anything about pharma, one way or the other? Indeed.

Revelation 22: ¹⁴ *Blessed are they that do his commandments, that they may have right to the tree of life, and may enter in through the gates into the city.* ¹⁵ *For without are dogs, **and sorcerers**, and whoremongers, and murderers, and idolaters, and **whosoever loveth and maketh a lie**.*

It seems the King James translators may have done us a disservice. The original Greek word, instead of ‘sorcerers’ was pharmakoi (or pharmakon). Pharmakoi translates directly into our modern-day ‘pharmacy’. (23) Our current paradigm of believing that pharmacy is for the good of humankind, biases us to thinking that Jesus could not possibly have been speaking about our much needed ‘medicines’. In fact, I’ve had a few pastors say that perhaps one could not make an exact, direct translation, because perhaps 2,000 years ago when this was written there was a different understanding of what ‘phamakoi’ meant. As in, perhaps it only applied to the opiates that they were using as their choice of medicines of the day. Since these are the words of Jesus, I had to ask myself, “*Would our all-knowing, all-seeing, omni-present Lord – when He was speaking about the end of days – and having already seen the end of days – possibly have spoken a word that didn’t quite fit into our modern-day knowledge base? Could he have made a mistake? Was 2000 years too far in advance for Him to have imagined what would be happening in our day?*” For those who believe in a literal Bible, it seems obvious that Jesus could see exactly who he was addressing – perhaps it’s us. And appears that Jesus could see one of the biggest evils of our day – pharmaceutical takeover of our gov’t. This is both a spiritual problem as well as a physical problem. If Satan can get us weak enough through drug use, he can bring our thoughts under submission. This issue is literally a fight for the bodies and the souls of men, women and children. As a health coach, this author has seen that for nearly every drug or vaccine on the market, there is a superior counterpart in the natural world. But the world

has convinced us to take the easy way, and pop a pill or take a shot. And there are health professionals around the world who teach on both sides of this paradigm.

Our Bible tells us that in the last days, there will exist much deception. That men will be wise in their own eyes.

It's time to wake up to the new reality, that evil has been worming it's way into our societal norms for centuries. And suddenly it is prepared to wrap its long tentacles around us and take over our lives – whether we invite it in or are just silent while it happens. We've allowed it to get to this point, slowly lulling us into subservience. With God's grace, we may have a chance to protect some of the innocent children and future generations, if we act now.

What can a faith leader do?

- Consider learning enough to speak about these happenings to congregants. Or bring in someone who can present the facts.
- **Encourage congregants to get involved, if they want to preserve freedoms: Involved in rallying, in praying, involved with contacting legislators, etc. If we are silent, we are seen to consent.**
- **We must especially speak out against Bill HR6666, before it becomes law and we are a slave society to pharma's plans.**
- **Consider your church an essential business for the citizens of your town, and act in civil disobedience by opening the doors to your church on Sunday, whether the state of NY considers churches essential or not.**
- Teach the Gospel message like never before, as Biblical prophecy of the end times has never seemed clearer or closer.
- Teach Bible prophecy, so that people know not only what to expect, but how to rely on God for support. Never before in history have all the Biblical prophecies of the end times been fully in place and ready to be fulfilled. Our current technologies give mankind the capability of achieving the events that Revelation reveals.
- Consider bringing in experts to counsel members on:
 1. Health recovery outside the medical system
 2. Growing a Garden for self-sufficiency
 3. Developing a plan for sheltering at home during an emergency of several weeks or months
- Check out www.faihandpharmacy.com .
- Watch the movie VAXXED to understand how the CDC and pharma work together to cover up research that reveals autism is caused by the toxins in vaccines.
- Watch the movie PLANDEMIC, which is coming out in the summer of 2020. You will learn so much more about the fraudulent system that is our pharmaceutical system. (24)

FINAL NOTE: This is NOT a commentary on doctors or pharmacists. Medical professionals are wonderful people who have devoted their lives to helping the people in their communities. But doctors are somewhat trapped in the paradigm they were taught in med school – which is highly subsidized by pharma. Some doctors have learned to think outside the pharma box, and are speaking out. Some have not found their path out of the system yet. The evil that is pervasive is the system of business management, not the individuals.
