

Student Name _____ Class Date _____

You are a trained pediatric first aid provider responding to a call received over your workplace two-way radio for a “child hit by gunfire.” The shooter has fled. The scene is safe. You see a child sitting on the floor holding their hand over a bloody wound on their thigh. You have appropriate PPE and a first aid kit with a 10-pack of sterile 4" x 4" gauze sponges, but no hemostatic dressings or a tourniquet. Demonstrate what actions you would take next.

Procedure	Provider Action (Performance Criteria)	Instructor Prompt	Check Off
Performs Assessment	<ul style="list-style-type: none"> ▸ Assesses scene safety. ▸ Takes Standard Precautions (at a minimum, puts on disposable gloves). ▸ Assesses responsiveness. ▸ Activates EMS and/or EAP. ▸ After activating, and unless they are readily available, sends someone to get the first aid kit and an AED. 	<p>“Shooter has fled. The scene is safe.”</p> <p>“Child is responsive.”</p> <p>“EMS/EAP activated.”</p> <p>“Other first aid providers are on the way, bringing an AED and additional first aid kits.”</p>	
Assesses Breathing	<ul style="list-style-type: none"> ▸ Assesses breathing for no more than 10 seconds. 	“Child is breathing normally.”	
Obtains Consent	<ul style="list-style-type: none"> ▸ Obtains consent from a parent or legal guardian, if readily available (unless previously established). ▸ Introduces self and lets the child know you are there to help. 	“Parent consents.”	
Assesses for Life-Threatening Conditions	<ul style="list-style-type: none"> ▸ Quickly scans the child for life-threatening conditions. 	“The child is crying and holding their hand over an obvious thigh wound. Blood is leaking around their hand and dripping onto the floor.”	
Immediately Provides Appropriate First Aid	<ul style="list-style-type: none"> ▸ Exposes the wound. ▸ Applies a single stack of 10 sterile 4" x 4" gauze pads over wound. ▸ Applies direct manual pressure over the wound using the heel of one hand with the other hand stacked on top of the first or the pads of 3 fingers of each of hand stacked on top of each other. 	“Blood is flowing continuously from the wound.”	
Maintains and Increases Pressure	<ul style="list-style-type: none"> ▸ Increases direct pressure over the wound. ▸ Doesn’t remove pressure to add more gauze and doesn’t remove blood-soaked materials. 	[Instructor, after about another 5 seconds] “The bleeding has stopped.”
