

First Generation Prototyping

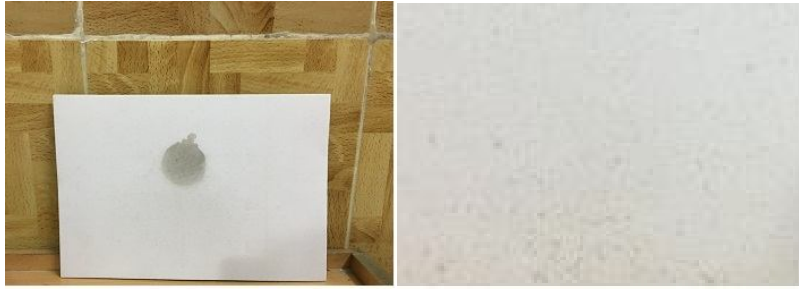

Saurabh K Resolve, Vijeta Jha

Mask Configuration when alone – Exactly overlapping glass wool sheets
No congestion in breathing; no protection from virus (not required too)

Mask configuration in crowd; Not exactly overlapping glass wool sheets (placed over one another to reduce effective pore size); congestion in breathing; protection from virus (required too)

Protection from Mask – About 90% plus

And finally BLUE LED drives the safety near 100% by its disinfestations – thanks to it inventors!
