

**ADULT BIB** for rehab centers (in need)

This is a new project that we can make to supply the rehab centers.

Trace pattern.

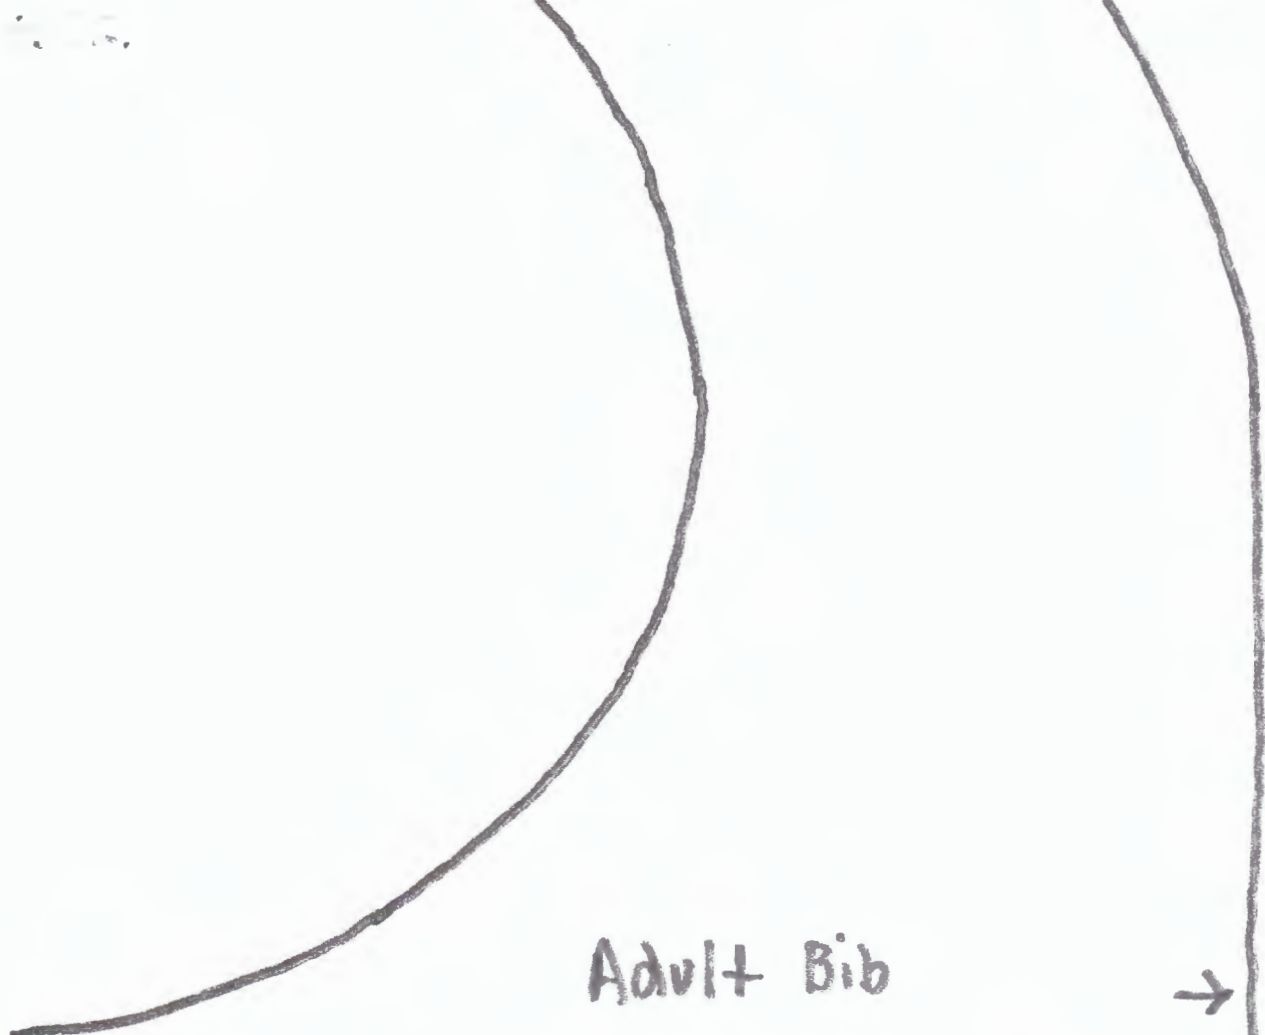

Use 2 fabrics with right sides together.

Trace design **THIS WILL BE YOUR SEWING LINE** so don't cut out yet.

Add many pins as you sew due to bias . Sew with a 2.0 stitch length on the line . Backstitch as you leave an open area to turn right side out.

Cut out with a  $\frac{1}{4}$  in seam allowance. Turn and Press. Edge stitch being sure to catch the opening closed. These will get laundered much so the edge stitch will add strength.

Attach a bit of Velcro at the strap behind the neck
