

PROFESSIONAL LONG-RANGE INTERCOM SYSTEM

Range up to 1500 FT

Peer-to-Peer connection with no base station needed

Up to 9 simultaneous users with expansion hub

10-Hour battery

Crystal clear communication

Single or Dual headsets fold for compact storage

Boom mic with automatic mute switch

Full duplex communication

Create a system with one master unit and up to three remote units, without the need for a base station or hub. Expand your system up to nine simultaneous users with the addition of the Wireless Expansion Hub. The hub can also be used as a 10th wireless station or can connect to your Pro Intercom wired network with our AD913 transceiver adapter.

Headsets and hubs include batteries. Chargers are required to recharge.
