Well into his career Steve had a huge, all too common, health scare that left him with a worst-case scenario of five years to live. Steve's inspiring story of battling Stage IV cancer while trying to reach his ultimate dream of performing on the David Letterman show led to an award-winning documentary and a book from the same publishers of the "Chicken Soup for the Soul" series. The story also led to many requests to have Steve come and share his uplifting story with conferences and corporate events.

Not only has Steve given motivational talks to business groups, conferences, retreats and cancer wellness centers, but he has been invited twice to give talks at the prestigious **TED talks** events. His likeable persona, command of the stage and demeanor even led to him hosting an entire TED event.

When Steve combines his gifts as a comedian with his uplifting storytelling, crowds get something not often found in presentational & motivational speakers today: Heart AND Humor in one.

Looking for a speaker to motivate your team or provide some passion to your event, but don't want them to fall asleep with the same old boring clichés? Then have Steve come give them some much needed laughter with a message that will energize them.
