

Position: System Safety Assurance / System Engineering Professional

Salary: £ negotiable based on experience

Position Type: Permanent: Full-time or Part-time

Location: Bristol / Client Sites / Home Working

### **Job Description**

Occam Group are looking experienced System Safety Assurance / System Engineering Professionals with a strong foundation in UK defence. This is a fantastic opportunity for self-starters to join a new and growing company that already has an excellent reputation for delivery. The successful candidate will be integral in helping to shape a growing company.

Day to day, you will work with clients providing specialist consultancy services and support business development activities. You will work from our Bristol offices, client sites and from home. You must be flexible to travel if required. You must hold security clearance, or be willing to undergo the Security Vetting process and successfully obtain security clearance. Core responsibilities will include:

- Delivering:
  - Safety Assurance and Independent Safety Audit/Advice services.*And/Or:*
  - Engineering Management / Independent Technical Evaluation services.
- Technical leadership on projects, tenders and quotations.
- Taking active steps to ensure customer satisfaction and obtain repeat business.
- Supporting recruitment, training and mentoring.
- Involvement with business winning activities, account management and growth.
- Supporting the achievement of business objectives.
- Exploring prospects for alliances and partnerships to exploit new opportunities.

### **Required Experience**

- Experience of management and delivery of:
  - System safety assurance, including development of Safety Management Plans, Safety Case Reports, Hazard Logs and Legislative Compliance Assessments. Preferably also experience of eCassandra, Reliability Workbench and ASCE tools, and delivery of Independent Safety Audit/Advice services.*And/Or:*
  - Engineering management, including Engineering Governance, Process Development, Engineering Substantiation, and Independent Technical Evaluation.
- Experience within one or more of the following defence domains: Air; Land; Sea; Ordnance, Munitions and Explosives; Nuclear.
- Previous consultancy and business winning experience would also be desirable.

### **Required Skills**

- Strong customer focus, able to easily elicit and understand requirements, build professional relationships, and be trusted to deliver.
- Articulate and effective communicator, able to clearly present information verbally and within written reports.

- Organised nature, able to work autonomously, juggle tasks, work within budgets, meet deadlines and manage changing priorities.
- An optimistic and driven approach; equally able to lead teams and be a team player.
- Able to apply core experience and skills to new domains, and quickly understand new domain regulations and requirements.

### **Occam Group Benefits**

Occam Group provides safety assurance and engineering management consultancy services across all UK Defence domains. We have an excellent reputation for delivering to the high standards that our customers expect. As a result, our consultants are highly respected, and we are valued as a trusted partner.

We offer a competitive salary and benefits package including pension contributions, private health care, critical illness cover, life insurance, paid membership of a professional institution, and a bonus scheme based on company and individual performance.

You will enjoy a friendly, supportive and professional work environment, that seeks to give you the responsibility for shaping your own work and developing your career path. We are a growing company, and we will provide the opportunity for you to grow with us.
