### **Banctech Inc.**

We are a full Turnkey General/Electrical and Security Integration Company that is a specialty contractor for Financial, Commercial and Government projects.

The management team of Banctech has over 50 years of experience in the construction and security industry. We are proud to deliver exceptional service to clients who require experienced project management and quality workmanship for the West Coast.

### **Program Expertise and Capabilities**

- Project Management
- Tenant Improvements
- Commercial Office Restacks
- Facility Maintenance & Repairs
- Design, Build and Site Surveys
- Electronic Security and Lock Services
- Security System Integration
- ATM and Vault Installations
- Signage Installation and program management
- CAD and Designs Department

### **Departments Enhanced Using CyberVault™**

- Retail Department
- Vault Management Department
- Audit Department
- Security Department
- Mergers and Acquisitions Department
- Corporate Properties Department
- Marketing Department
- Future Operations Department

# Construction and Program Implementation

## Construction Services

- Pre-construction, estimating and value engineering
- Provide design-build services
- Evaluate plans and identify areas for potential savings
- Research product availability and/or lead time issues
- Prepare preliminary construction schedule
- Develop detailed budget for project
- Ensure best value through BMP

## Construction Management

- Define, direct and review performance of subcontractor's work
- Track all changes to project and update client daily/weekly
- Monitor construction schedules for timely completion of project
- Review, expedite and process submittals for approval
- Staffed with experienced personnel committed to quality
- Take digital photos of project for Web management
- Maintain clean and safe job site

## General Reporting

- Prepare, monitor and distribute construction schedules
- Prepare and distribute minutes of weekly minutes
- Prepare and maintain project, contract, change orders, etc.

## Contract Closeout package

- Prepare and verify accuracy of as built drawings
- Collect all operating manuals and provide warranty book
- Test all equipment and systems and train end user
- Provide closeout book with photos and lien releases
- Provide AutoCAD copy of as built drawing.

**ATM SERVICES**

***Electronics and Security Solutions*****► Access Control Systems**

Providing expert advice on planning, selection, and implementation of access control systems is one of the core strengths of Banctech.

Our design engineers will assist in developing system specifications and roll-out plans for any size system - from 1 to 1,000 readers, from 1 location to 100, we have the tools to make your project a success.

- Stand Alone or Integrated Systems
- Video Badging Systems
- Biometrics
- Smart Cards
- Global Software Management
- Systems Administration
  - ~ Network Based Administration
  - ~ LAN/WAN Field Panel Connectivity

**► Closed Circuit Video Systems**

We design video systems that integrate state of the art technology to provide the highest quality images available in the industry.

We believe that by incorporating High Resolution Digital CCD Video Cameras with SVHS Analog Recorders or Digital Archiving Systems that our customers will receive the highest quality evidentiary images. Our CCVS systems can be a stand-alone application or part of a larger integrated system.

- High Resolution CCD Video Cameras
- SVHS Video Recorders
- Digital Archiving and Remote Retrieval
  - ~ Network Based Video Transmission
  - ~ Live Look In Capability
  - ~ LAN/WAN Connectivity

No matter the size or scope of your project, you can be confident with Banctech to see your project through.

# Electronic Security

## ► Alarm Technologies

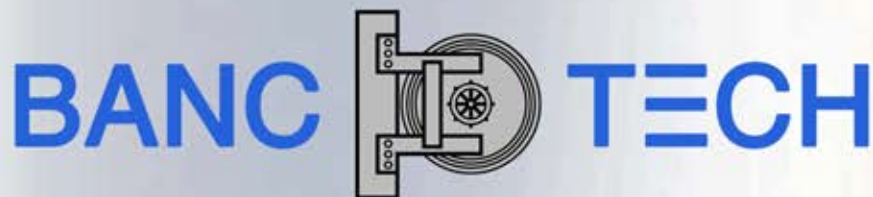

Burglar and Fire Alarm Systems are the foundation for protecting your assets from unforeseeable threats. We provide design, installation, monitoring, inspection, and maintenance services of the nation's most respected alarm equipment manufacturers.

- Intrusion and Fire Detection
- Single or Multiple Site Monitoring
- Network Based Systems Administration and Monitoring
- Live Remote Programming Services

## ► Network Communications Infrastructures

Technological advancements have made the integration of security systems with company networks commonplace. In addition to the various security services we offer, we also provide network systems integration allowing incorporation of all company security and business applications on to a single network. We have the expertise to design, install and maintain corporate networks.

- Fiber Optic Backbones
- LAN/WAN Design and Implementation
- CAT5 Installation for Corporate Networks
- Live Remote Programming Services

# Entrance Control Units

## ► Facility Security

ECU's are designed to protect your entire facility. Each unit is designed as a "Weapons Control System", and prevents access into your facility by anyone carrying metal objects or high-density plastics. This level of protection ensures that your clients and ALL employees are protected from outside threats and hostile takeovers.

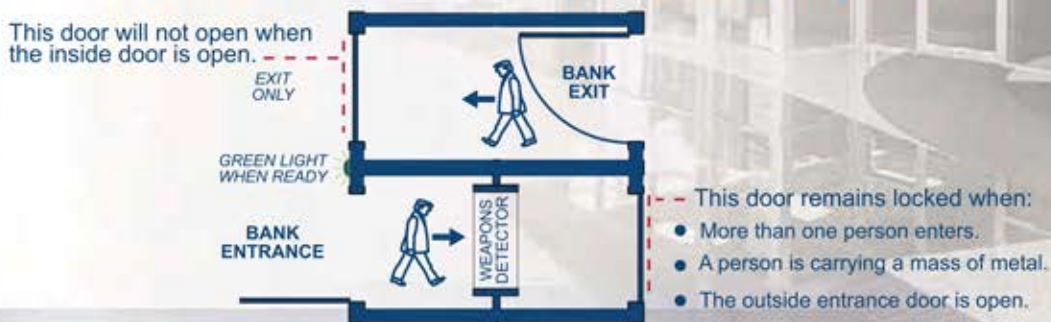

Bandit Barriers are designed to protect a specific area. Clients and employees located outside of the area of protection are vulnerable to threats in the unprotected area. Bandit Barriers do not provide for any level of weapons detection, whether large metal objects or high-density plastics.

## ► Portability

ECU's are modular and can be installed, de-installed, and re-installed within the same facility or at a completely different location. Your investment in an ECU is not tied to a specific facility and can provide return on investment for years to come.

## ► Facility Modifications

Entry Control Units typically require modification of the storefront glass. In most cases the existing entry doors and surrounding glass is removed to accommodate the installation of the ECU. The interior of the facility is typically unchanged with the exception of the ECU's presence in the previously open area. The area surrounding the ECU can be finished out to create a uniform appearance. Removal of an ECU is a straightforward process, and with the exception of re-installing the storefront glass and hardware, the removal is a seamless integration.

► "A proactive stance was taken by individual bank security departments in the installation of ... Access Control Units in their facilities. Robberies, particularly violent takeover robberies, were reduced to ... zero where access control units were installed."

**Assistant Director DeSarno, FBI Los Angeles:**  
Los Angeles FBI Press Release - January 10, 2000

*"Satisfied Clients Assure Future Success"*

**Corporate Headquarters - 15907 Blythe St, Van Nuys, California 91406**

**Entrance Control Units**

*Protecting the security of assets, customer, and employees is an important responsibility for any business. Although no workplace is completely safe, it is possible to deter a violent crime or attack and reduce the risk to your facility, customers and employees.*

*We provide and installs virtually all forms of bullet resistant glass, doors, transaction service windows and other ballistic products.*

***Bullet Resistant Barriers provide a level of protection your business, customers and employees need to feel secure in the work environmet.***

*The effects of crime on your business can be astronomical. Monetary losses are just the beginning. When employees are exposed to violence, fear and stress it can result in long-term reduction of productivity.*

*When customers are exposed to the threat of serious harm they will hesitate to engage in future dealings with your company. The public's faith that your business is safely protected needs to be rebuilt. Time is lost due to recovery. All this can have a devastating impact on your future. Bullet Resistant Barriers will bring an additional level of safety and security to your workplace.*

- High Crime Deterrent
- Reduction of Cash Loss
- Reduction of Property Damage
- Increased Employee and Customer Safety
- Increased Employee Production
- Increased Customer Loyalty and Appreciation
- Fast Operations Time Recovery
- FBI Studies Show Dramatic Decrease of Sick Days
