◦ ◦ ◦ ◦

ABOUT 12PAK GLOBAL

At 12Pak Global, we specialize in providing **high-quality packaging** solutions tailored to meet the unique needs of our clients. Our innovative and reliable materials are sourced with a focus on sustainability, compliance, and quality.

We partner with certified vendors who adhere to strict food safety regulations, ensuring all packaging meets or exceeds:

- FDA Requirements
- ISO 9000 Standards
- IMS Certification
- BRCGS Food Safety Global Standards

Whether you are in the **food industry** or any other sector requiring certified packaging, we provide solutions that support your **business growth** and **compliance** needs.

CERTIFIED &
SAFE
PACKAGING

YOUR TRUSTED PARTNER

From sourcing to delivery, 12Pak Global is here to provide the solutions you need, when you need them.

OUR PACKAGING SOLUTIONS

Versatile, high-quality packaging tailored for diverse products and industries.

3 SIDE SEAL BAG

A versatile and secure packaging solution with three sealed edges, ideal for snacks, powders, and small items that require a simple, airtight seal.

STAND UP POUCH

A sturdy pouch that stands upright on store shelves, ideal for products like food, pet food, and household goods. Often includes a resealable zipper for easy use.

ZIPPER POUCH

A pouch with a built-in zipper closure that provides an airtight seal to preserve freshness, for snacks, dried foods, and personal care products.

ZIPPER STAND UP POUCH

A hybrid of the stand-up pouch and zipper pouch, providing both stability and convenience, features a resealable zipper and ideal for retail display of dry goods, supplements, and more.

SIDE GUSSET BAG

A flexible bag with gussets on the sides that expand to allow for more space. Perfect for bulkier products such as coffee beans, tea, and grains.

PILLOW BAG

A packaging option with a seal along the back of the bag. Offers a sleek and clean look, often used for snacks, powders, and other retail-ready items.

OUR PACKAGING SOLUTIONS

Versatile, high-quality packaging tailored for diverse products and industries.

SPOUTED POUCH

A pouch equipped with a spout for easy pouring and dispensing of liquids or gels. Commonly used for beverages, sauces, and cleaning products.

BOX POUCH

Stand-up zipper pouch for easy display and convenient reuse. Ideal for dry goods like food and cosmetics.

ROLL STOCK FILM

Flexible plastic film that can be used for custom packaging, ideal for wrapping and sealing a variety of products. Often used in industrial and food applications.

MYLAR BAG

A durable, moisture-resistant bag made from polyester film. Commonly used for long-term storage, food packaging, and specialty items due to its ability to protect from light, air, and moisture.

KRAFT PAPER BAG

An eco-friendly option made from natural kraft paper, offering a rustic, earthy look. Typically used for dry goods, flour, or organic products, and is easily recyclable.

RECYCLABLE AND BIODEGRADABLE BAG

Eco-friendly packaging made from recyclable or biodegradable materials, ideal for reducing your carbon footprint in food, cosmetics, and more.

BOXES

Versatile, high-quality packaging tailored for diverse products and industries.

FOOD AND BEVERAGE

Sturdy boxes for bulk shipping, folding cartons for retail snacks, and rigid boxes for premium gourmet items.

RETAIL AND E-COMMERCE

Durable packaging for bulk shipments. Mailer boxes suit small items, while folding cartons offer a sleek, practical solution for retail products.

DISPLAY BOXES

Showcase products with sturdy, eye-catching display boxes. Ideal for cosmetics, toys, and promotions, they enhance visibility, access, and organization.

COSMETICS AND PERSONAL CARE

Luxury packaging for high-end gifts. Rigid boxes and folding cartons enhance protection and the unboxing experience.

PHARMACEUTICALS AND HEALTHCARE

Elegant packaging for beauty products. Rigid boxes add luxury, folding cartons offer style and protection, and custom shapes create standout designs.

GIFT AND SPECIALTY PACKAGING

Secure packaging for medications. Folding cartons ensure reliability, blister packs suit small doses, and rigid boxes protect high-value products.

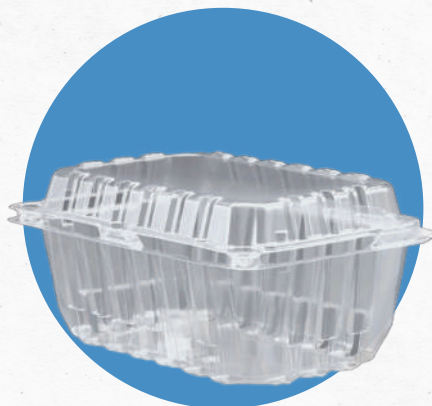

CLAMSHELL & BLISTERS

Versatile, high-quality packaging tailored for diverse products and industries.

BAKERY AND CAKE ITEMS

Clear packaging keeps cakes, pastries, and bread fresh, protected, and visually appealing while ensuring easy handling during transport.

FRESH PRODUCE

Blister and clamshell packaging maintain freshness, protect fruits and vegetables, and enhance visibility for better customer selection.

TAKEOUT

Durable containers keep hot or cold meals secure and intact, offering convenience, visibility, and protection for on-the-go dining.

FOOD TRAYS

Used for meats, deli items, and frozen foods, these trays ensure freshness, organized storage, and protection from contamination.

DISPLAY TRAYS

Designed for small packaged foods and snacks, transparent display trays keep products organized, visible, and easily accessible in retail settings.

CUSTOM BLISTER PACKAGING

Tailored to a product's shape and size, blister packs offer secure protection, clear display, and easy identification for consumers.

FINISHES

GLOSSY FINISH

A shiny, reflective surface that enhances color vibrancy and provides a smooth, sleek look. Ideal for designs that require high visual impact, such as premium products or eye-catching packaging.

MATTE FINISH

A smooth, non-reflective surface that offers a sophisticated, elegant look. It reduces glare and fingerprints, making it ideal for luxury products or items that need a soft, refined aesthetic.

HOLOGRAPHIC FINISH

A vibrant, multi-colored effect that changes depending on the angle of light. Adds a futuristic, eye-catching appeal, making it a popular choice for fashion, cosmetics, and special-edition packaging.

METALLIC FINISH

A shiny, reflective surface with a metallic sheen, giving a premium and high-end feel. Commonly used for packaging of upscale products, such as luxury goods, beauty items, or seasonal gifts.

SPOT UV FINISH

A technique where a glossy coating is applied to specific areas of a design to create contrast and highlight certain elements. Ideal for adding emphasis to logos, text, or patterns on matte or uncoated surfaces.

EMBOSSING

A process that raises certain areas of the design to create a textured, three-dimensional effect. It gives a tactile quality to the packaging, often used for logos, brand names, or decorative elements.

HOT STAMPING

A method where metallic or pigmented foil is applied to the surface of the packaging using heat and pressure. This process creates a luxurious, shiny effect, perfect for logos, text, or decorative accents.

SOFT TOUCH FINISH

A velvety, smooth texture that provides a luxurious, tactile experience. Often used for premium products or high-end packaging, offering both a visually appealing and comfortable feel.

ADD - ONS

TEAR NOTCH

A small cut or perforation at the top of the package that allows easy and clean tearing. Ideal for products like snack bags or pouches that need to be quickly opened by the consumer.

GUSSET

Folded sides that expand when the bag is filled, allowing it to stand upright and provide more space. Commonly used in side gusset bags and for packaging products like coffee or grains.

ROUND/RIGHT CORNERS

Rounded or square corners that give packaging a softer, polished look. Rounded corners reduce the risk of tearing and provide a more modern, elegant finish, often used in both pouches and boxes.

HANG HOLE

A small hole punched at the top of the package, allowing the product to be hung on display hooks in retail stores. Common in products like small personal care items or retail-ready goods.

WINDOW

A transparent or see-through section in the packaging that allows consumers to view the product inside. Ideal for showcasing the product itself, such as snacks, dried foods, or handmade items.

INTERNAL PRINTING

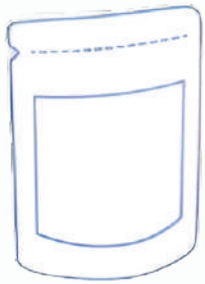

Printing done on the inside of the packaging material, often for branding or decoration. It helps to keep the outside clean while still displaying an eye-catching design or additional product information.

DIE CUT SHAPED

Custom-shaped packaging made using a die-cutting process to create unique, non-standard shapes. This add-on gives packaging a distinctive look and feel, often used for promotional or luxury products.

UV SPOT HOLOGRAPHIC

A selective holographic effect applied to specific areas of the design, creating an attention-grabbing shine or pattern. Ideal for highlighting logos, brand names, or design elements with a futuristic or high-end appearance.
