

**Walls** - Our walls are 30-60 lbs. heavier than other brands and have deep, balanced corrugation which offers flexibility and vertical depth. In fact, we offer more corrugation per inch than any other brand.

**Slide Bar Wall Connector** - Unlike nuts and bolts, our exclusive slide-bar wall connector continuously joins the pool walls together for complete structural integrity while preserving (rather than piercing) the layers of wall protection.

**Vertical End Caps** - Made from 18 gauge G90 galvanized steel, our vertical end caps are 50% heavier than most brands. We also use exact, pre-punched holes that allow for a more precise installation and added stability.

### **Above Ground or In-Ground Pool Look**

Doughboy pools are the single most adaptable pools on the market today. Whether you want an above-ground pool or an in-ground look, Doughboy has the answer.

We can offer you the ability to adjust the height of the visible pool wall from 52" down to only 6" above ground, achieving an in-ground look when surrounded by a short deck or patio. This is an incredible savings when compared to even the lowest-cost in-ground pool!

### **The Best Fit For Your Yard**

From an 8' "get 'em wet" round pool to a 41' x 21' "backyard lake," our space-saving Com-Pac II Support System lets you have a larger,

more attractive pool in a smaller space. No other manufacturer can provide you with the space-saving features of the Com-Pac II when combined with our true 7' expandable liner.
