

NEBULOUS - Filmmaking Is Killer! Welcome to the cutthroat world of being a teenager...
Filmmaking turns deadly for a group of unsuspecting high school teens who realize
filmmaking is killer in more ways than one.

First-time writer/director, fifteen-year-old filmmaker Aeris Danet and her creation of NEBULOUS
has already proven feature length film viability. NEBULOUS was first created as a
short film/proof of concept specifically for 2025 limited film festival release.

Making waves and gaining support throughout the horror community during its 2025 festival run
through official selections, honorable mentions and award wins has catapulted Aeris Danet to the top
internet searches for "Youngest Indie Horror Director 2025".

Now, from Aeris Danet - Best Horror First-Time Director winner at the Chicago Horror Film Festival
comes NEBULOUS the full-length feature film campaign. NEBULOUS the movie has begun
pre-production, and filming will begin summer of 2027. Everyone at Team NEBULOUS
sincerely hopes you follow along on this journey and rally up all horror fans and indie movie
supporters so the NEBULOUS campaign can gain as many gifted monetary contributions as possible.

The goal is to gain well over \$100,000.00 in gifted contribution supporters, who all receive
a "Thank You" in the end credits making it the longest list of horror fans ever given end credits
in an independently made horror movie. Danet wants you to be the one who chooses how much
you can give the campaign based on your belief in her vision.

We do not know at this point if NEBULOUS the movie will end up only in film festivals,
as a theatrical release, available for a private streaming or on a streaming service. What we do know
is that we will keep everyone updated as the various campaigns progress throughout the entirety of
2026 and into 2027.

NEBULOUS is not a "one and done" film. Danet herself already has a treatment for the sequel.
Come be a part of the future of horror and help spread the word about NEBULOUS the feature film
campaign

Thank You,
Team NEBULOUS
