INTELLIGENCE FOR THE BUILT ENVIRONMENT

Non-Building Infrastructure
Public spaces and walkways like parking and transportation

Man-Made Structures
The buildings themselves

Embedded Building Technology
Building Systems (HVAC, electric, refrigeration, lighting, reservation system)

Industry-Specific Support Infrastructure
Corporate (IT systems, copiers)
Commercial (Ventilation, cranes)
Healthcare (Radiology, MRIs)
Education (Desks, Classroom)

Functional Assets
Heavy machinery, medical devices, lab equipment

Human Support Infrastructure
People who work to support resources (maintenance, administrative, security, facilities)

THE BUILT ENVIRONMENT ISCOMPLEX

- Physical assets are the second largest expense item

- Disconnected silos, disparate systems, teams and processes

- Inefficient and mistake-prone legacy processes

- Amplified by scale and speed of strategic change

AND FILLED WITH OPPORTUNITY

- Simplified and automated processes and workflows

- Cloud-managed software that is always up to date and secure

- Real-time alerts and long-term predictive estimates

- Data-backed decisions made from full-picture insights
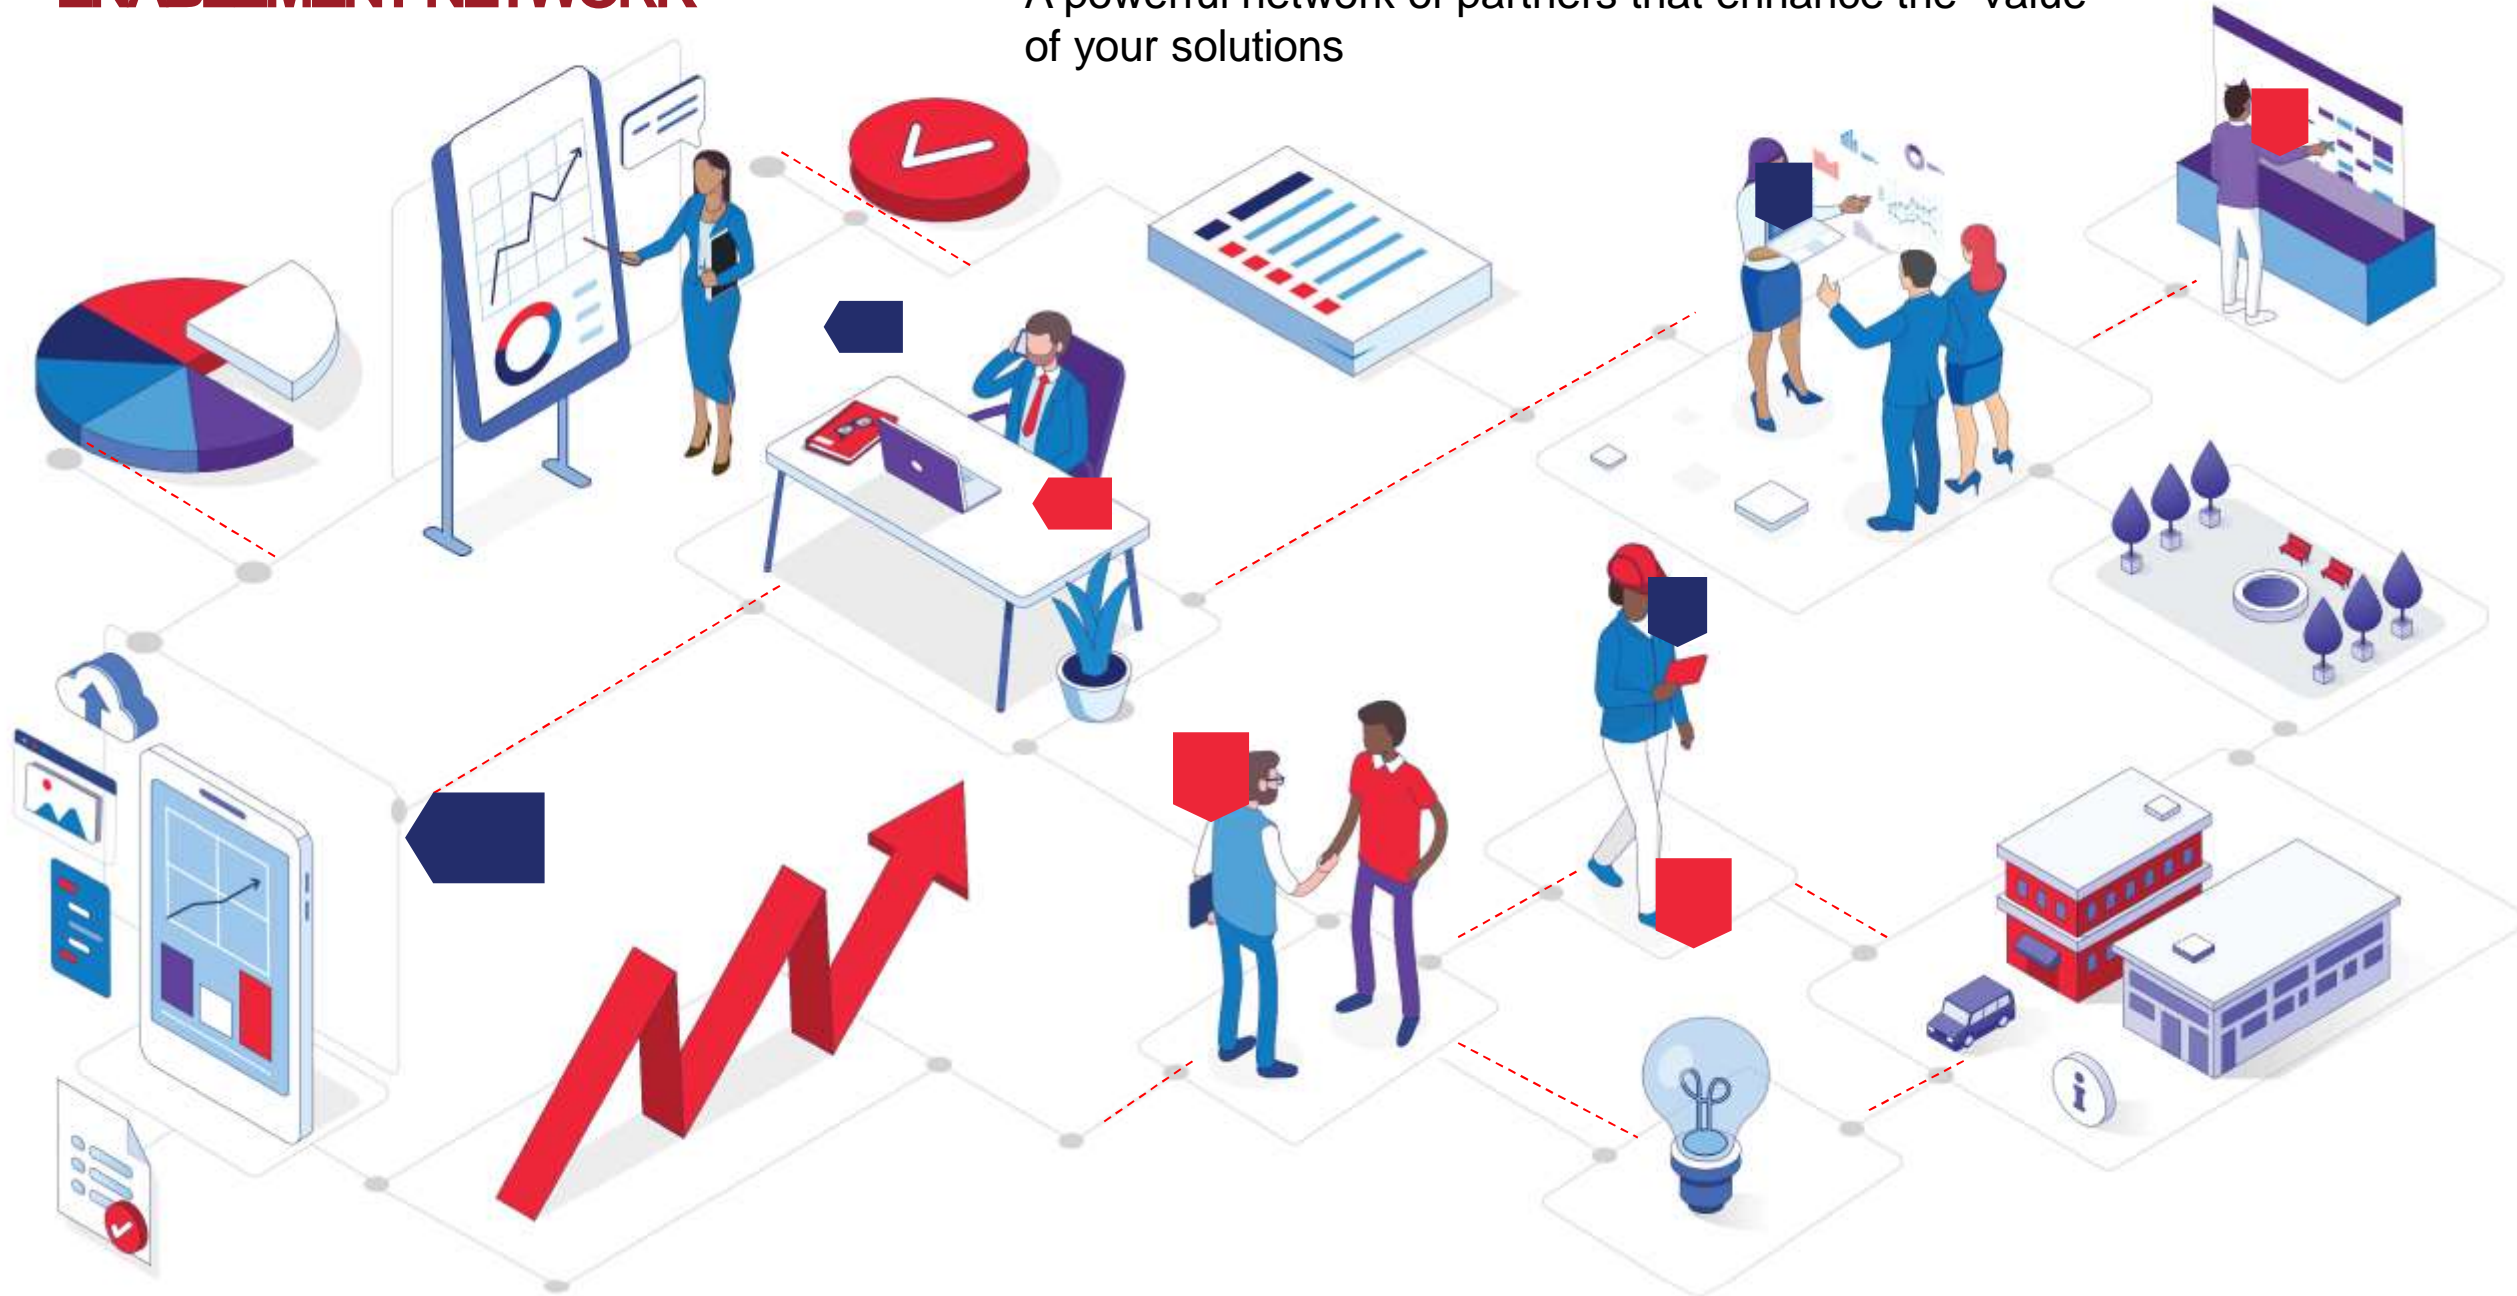

INTEGRATIONS

Added ecosystem intelligence powered by our accrued industry experience

ENABLEMENT NETWORK

A powerful network of partners that enhance the value of your solutions

DATA-LED INTELLIGENCE

Greater visibility for more informed decision making
