Students will take a Virtual Field Trip to the International Spy Museum in Washington, D.C. Have the students click on the website to access the Virtual Tour. Students will navigate through the website, including the Exhibitions and Experiences. At the start of the tour, have students take paper-based notes for each Museum area they visit. As they visit each exhibit and watch interactive videos, they can stop and write notes about each exhibit. They can describe exhibits that increased their knowledge of the Spy World- "What did you learn at this exhibit?"

At the end of the tour, students should re-write their notes in a word program, and submit to the teacher using email or GDrive.
