White or Black

## PVC V-GUIDES

White or Black

## SPECIAL APC BELT

for Accumulating Package Conveyors  
4" wide PVC120CBS

Hot Melt A-Section Guide

Save Time ... Save Money ... choose from our large selection of PVC belts for Food and Package Handling, Bulk Materials and Elevator Belts. Dandux Ranger PVC belts are all made with a low stretch 100% polyester carcass that will not wick moisture because individual yarns are impregnated with polyvinyl chloride even before they are woven into a strong, plyless, interwoven carcass. Our PVC is well known for its oil and chemical resistance.

We can attach cleats, flanges and V-guides, make endless or punch bolt holes and supply elevator buckets and bolts. Our white PVC belts meet FDA and USDA requirements for direct contact with food.

SUP-R-THANE® — Tough urethane cover on interwoven polyester carcass for applications requiring a cut resistant cover ... oil resistant.
