

DURALON

Rubber Covered Belting

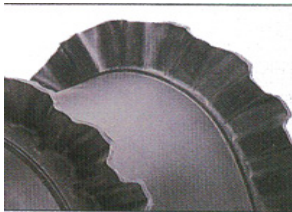

Wide Selection of Grades, Strengths and Compounds for Aggregate, Asphalt, and Waste Treatment Applications

DANDUX DURALON Rubber Covered Belting is the right product for your toughest applications in harsh environments. These heavy performance belts are made to carry **rock, sand, gravel, coal, coke, wood chips, ore, grain, sludge, phosphates** and many other caustic or abrasive products.

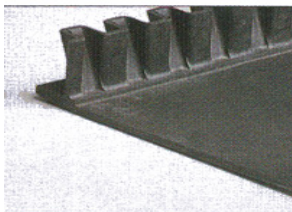

DURALON Belts are suitable for Quarry Operations, Light Mining, Waste Treatment and Reclamation Facilities.

DURALON Covers are available to suit your application in custom thickness and materials for high abrasion, hot stock, and moderate oil resistance requirements.

DURALON Belts are Built to Last...

High strength polyester carcass gives high tensile and tear resistance.
Non-wicking carcass will not rot or mildew.
Thick high adhesion skims between plies for high impact resistance.

...And Built the Way YOU Want!

A variety of cleats, flanges, and V-Guides are readily available for your custom requirements. Standard Bucket or custom patterns can be punched or complete elevator belts can be built to your specification. Finally, belts can be supplied prepped, laced, or simply cut and squared as per your requirements. Call us to see how our belts can get your materials moving!
