

Item 42067, 42087 – Optional Tow Hitches

Excellent Options for either the 6 cubic foot or 8 cubic foot models. **Tow hitches are size specific – designed to handle weight capacities of specific carts.** No tools required to attach it to a *Loadumper* and to a lawn tractor or ATV. The hitch easily attaches to the axle of the *Loadumper*. Releasing the trigger automatically locks the hitch to the axle of the cart. The hook in the middle of the hitch snaps on to the safety handle of the cart. A pin (not provided) is used to secure the other end of the hitch to the tractor or ATV. In order to dump the load while attached, simply step on the foot release near the safety handle and dump the contents without un-hooking the cart from the tractor or ATV. This item conveniently converts these *Loadumper* models into a tow behind dump cart, in seconds.
