

# ReadyVote® 41V1801-DS200 BallotExpress™ (DS200 Ballot Box Cart )

Footprint (storage/transport/use) – 38" x 28" x 65"H

The ReadyVote® BallotExpress™ is the patent pending storage and transport cart that allows an ES&S DS200 Ballot Box and Tabulator to be stored, transported, and easily deployed. The DS200 is secured to the cart with patent pending, specially designed, “J” brackets that keeps the DS200 securely attached to the cart at all times and eliminates the worry of someone disrupting the voting process by accidentally or purposely tipping over the ballot box. The Ballot Express allows the DS200 to convert from a secure, protected storage position to a voting position that is fully usable and accessible without removal from the cart. The patent pending lower support positions the tabulator to ADA height

and side accessibility standards. The secured equipment is fully restrained against lateral and vertical motion to protect against shifting experienced during storage and normal transport to the polling place.

ReadyVote® BallotExpress™ is constructed of welded structural steel tubing components which are fabricated and assembled in the USA. Components are powder coated before final assembly to provide corrosion resistance. All hardware used in assembly has a rust resistance finish.

ReadyVote® BallotExpress™ uses four industrial grade 6" x 2" casters (two swivel / two swivel with treadlocks) for ease of movement over various types of paved surfaces. Casters are assembled to cart with rust resistant hardware to allow for easy maintenance and replacement.

ReadyVote® BallotExpress™ offers a recommended optional privacy curtain that insures each voter's privacy.

ReadyVote® BallotExpress™ is configurable to meet specific precinct needs. Common components are utilized so that field upgrade or reconfiguration is possible thus maximizing the value of the investment. Available with optional folding privacy curtains, and additional brake caster

## KEEP YOUR VOTE PRIVATE !

It's your vote ! No one has a right to see your ballot - including an election Judge !  
Use ReadyVote® BallotExpress™ an insure voters can cast their ballot in privacy.

Use more than one ballot box ? ... consider our DoubleBox™ Cart !

Carts are warranted to be free from material and manufactures defects for one year from the date of delivery. Carts can be returned to manufacturer and if defects are found, carts will be replaced or repaired. Casters and normal wear and tear is not covered. Carts that have been damaged or abused will not be repaired or replaced. Customer is responsible for freight on any return or replacement carts.

## C.R. Daniels, Inc.

- 101 year old diversified manufacturing firm. Headquartered in Maryland since 1939.
- Experienced Executive Management Team – 175 years of combined manufacturing experience.
- Quality System - ISO 9001-2015, Mil I 45208-A, Sikorsky S-2000, Boeing D-9000(status –Advanced)
- Fabric, Plastic and Metal Fabrication and Finishing capabilities and production expertise
- Facilities – 180,000 sq ft headquarters and manufacturing facility in Ellicott City, MD (built 1975)  
130,000 sq ft manufacturing and distribution facility in Rutledge, TN (built 1961)

C.R. Daniels currently employs 200 individuals, 150 in Maryland. C.R. Daniels prides itself on its dedicated workforce; 40% have over 20 years of tenure with the company. The company's products range from simple tote bags and industrial covers to complex energy absorption seats for the Sikorsky Black Hawk Helicopter.

C.R. Daniels has been headquartered in Maryland since 1939 when it relocated to the town of Alberton, MD (later renamed Daniels). Daniels, MD remained the firm's principal facility until 1972 when Hurricane Agnes forced the firm to build and relocate to Ellicott City. In 1995, in conjunction with Howard County and the Maryland Department of Economic Development, the firm expanded its Ellicott City facility by 20,000 sq ft and added robotic welding and powder coating capabilities to its then existing sewing, plastic and metal capabilities.

C.R. Daniels is uniquely qualified to produce 100% of the Election Carts / Booths in its Ellicott City plant, including all metal fabrication, robotic welding, powder coat finishing, vacuum formed plastic tote box, and fabric cover.

The ReadyVote® BallotExpress™ QuadExpress™ DuelExpress™ AutoCart™, BODCart™ and Nesting Voting Booth were developed and patented (additional patents pending) by  
C.R. Daniels, Inc. of Ellicott City, Maryland.
