DISRUPTIVDATA: SNOWFLAKE ENTERPRISE ESG READY INVESTMENT DATA MODEL & WAREHOUSE
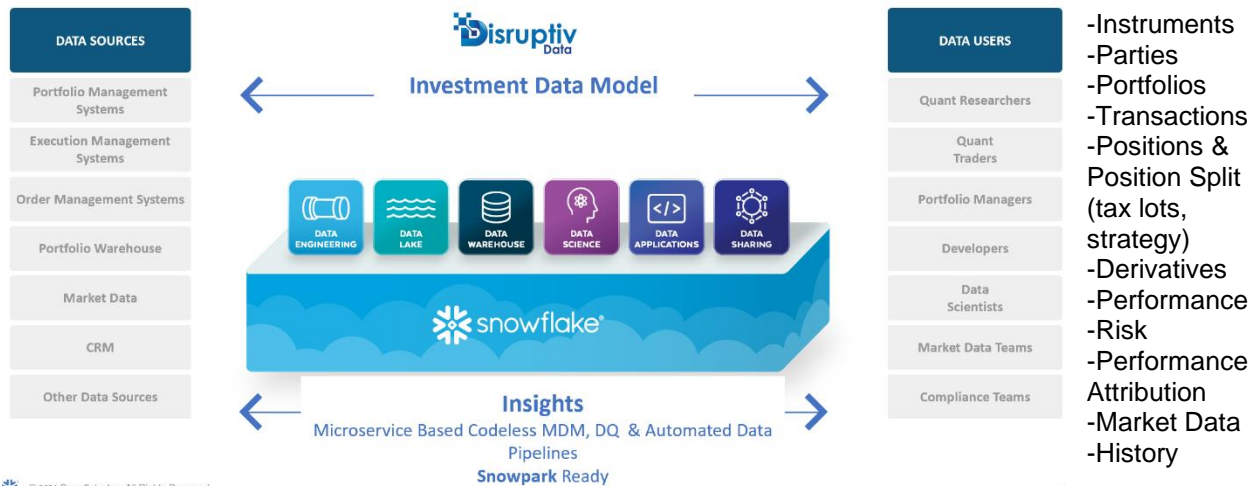

with Streamlit Demo for FactSet ESG Data Share

DisruptivData provides world-class enterprise solutions without long-term contracts, amazing prices and affordable support on the Snowflake Data Cloud marketplace as a supported Native Application.

Robust Investment Data Model (IDM) ready to go link your Positions, Instruments and Accounts with ESG data from multiple sources. Out of the box FactSet ESG Snowflake Data cloud data share integration is enabled and includes a sample Streamlit application to see your holdings and securities of interest data coupled with FactSet's ESG scores and measures in minutes. IDM supports other ESG sources on the Snowflake Data Cloud.

Developed by DisruptivData, the DisruptivData IDM is proven and built for the Snowflake Data Cloud and BI data consumption. It's also extensible to meet your organization's unique requirements for creating Internal ESG scores and can support multiple sources of ESG Data. The Model is logically organized by domain:

DATA SOURCES
Portfolio Management Systems
Execution Management Systems
Order Management Systems
Portfolio Warehouse
Market Data
CRM
Other Data Sources

Investment Data Model

DATA ENGINEERING · DATA LAKE · DATA WAREHOUSE · DATA SCIENCE · DATA APPLICATIONS · DATA SHARING

The IDM also offers Intra-day Cash Updates support as well as Fund of Funds, FX/Cash Overlay and Derivative look-throughs and is easy to integrate with Tableau, PowerBI and other Analytic Tools and of course Streamlit dashboards.

DisruptivData is also able to provide automated data pipelines featuring Metadata and Rules catalogs, Codeless Data Quality and Gold Copy capabilities via Snowpark. Machine Learning & AI models can be easily added. Structured and semi-structured data can be sourced, curated and deployed with full lineage, logging and audit in mind.

Whether Migration or Daily Operation these proven Snowpark Python tools accelerate your move to Snowflake.

About:

DisruptivData provides a new way forward with no upfront license fee, long term commitments or mandatory support fees offering the lowest TCO in the business. Support, Migration and Initialization services are available as well; all via the Snowflake Data Cloud Marketplace.
