## Coronavirus (COVID-19) Essential Items Checklist

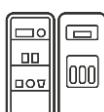

The Commonwealth Government has recently announced a one-off payment of \$750 for people who hold Pension Cards. When thinking about spending this money, you might like to think about what essential items you might need to have in the cupboard if you have to stay at home for 14 days and can't go out in the community. *You don't need to go out and get everything on this list. It is a guide*

**What are essential items?** Essential items are sometimes called staples. These are the things you need to live day to day. It can include food, personal, health and cleaning products you need that will last a long time in the cupboard and not go off. You can still get your fresh food, fruit and vegetables but these are some other things to think about having on hand.

### Important things to think about:

Check what you have already. You may have a range of things already stocked up in your cupboard and freezer.

When you are buying items, look for canned, boxed and long-life items that can stay in the cupboard for a long period of time. Frozen foods are also good to have as well.

It may be hard to find these some of these items at the moment. Governments are working with food chains to improve the supply of goods and food to our shop. It is important that you don't over buy more than you need.

It is important you check what is happening at the place you usually shop. Different shops have different things in place like early morning shopping times for older persons and people with disability. Supermarkets and pharmacies may also have special arrangements for who can use home delivery services.

You can call the shop, go online to their website, or you might ask your support service, family or friends to help you.

## Essential Items Checklist
