BRSR Cloud®

Your **ESG** Journey
Simplified

Integrated Risk, Environmental and Safety Consultants

BRSR Cloud® is a flexible **SaaS** platform to **configure your ESG templates** without programmer easily irrespective of **any standards** and streamline your **ESG journey** to manage Scope 1, Scope 2 and Supplier **Value Chain** mapping of **Scope 3** emissions.

With over 12+ years in business, our consultants have conducted Air Pollution Control Studies which includes Emissions Inventory Studies, Air Quality Impact Assessment, Greenhouse Gas (GHG) Inventory and Forecasting, and Best Available Technology (BAT) Assessment for Emissions Control; Water Pollution Control Studies i.e., Wastewater/Effluent Inventory Studies, Water Quality Impact Assessment, Mixing Zone Modelling and BAT Assessment for Wastewater/Effluent Control; Toxic Waste Management i.e., Toxic Waste Inventory and Toxic Waste Management Plan; Environmental Impact Assessment (EIA). Based on our experience, we launched **BRSR Cloud®** to enable Companies to report ESG using any standards like GRI, SASB, TCFD or others to comply with local country specific regulations.

The software enables you to add users from multiple branch locations as well as third party consultants or auditors, assign security to access relevant data, navigate, monitor data capture progress, easily manage Scope 1, Scope 2, Scope 3 emissions. **BRSR Cloud®** also enables customers to do Sector-wise Peer to Peer ranking as well as Year on Year progress of your ESG goals.

Benefits of BRSR Cloud®

- ✓ Year on year **reduction of Energy Consumption, Waster, Water**
- ✓ Improved **Brand image** by performing better in the **Sector-wise Peer to Peer** Comparison
- ✓ Better **Employee Morale** and hence better **Retention** and **attract** better **talents**

- ✓ **Enhance Compliance** with tracking and better visibility for **informed decisions**
- ✓ Sustainable investment of Capital and **better returns**
- ✓ Save software licensing costs with **affordable** SaaS prices.
