

Armored Car & Racing Gear

Learning how believers in Jesus Christ are like the drivers in a race car and can put on the full **ARMOR OF GOD** for our protection in this race of life.

EPHESIANS 6:10-18

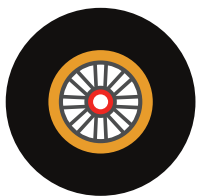

The driver's **JUMPSUIT** is fire-resistant and protects the body. The sponsor labels are visible for everyone to see who they represent. It reminds us of the **BREASTPLATE OF RIGHTEOUSNESS** that we can wear securely in Christ and represent Jesus to the world.

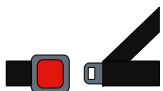

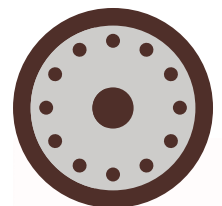

Driver's wear special **FOOTWEAR** made of material that will not burn or melt in hot conditions and they keep the drivers feet cool near the hot engine. We have to keep our cool in "hot" situations and go with the **GOSPEL OF PEACE** on our feet.

A race car driver's **HELMET** protects the head and has an audio wire so they can hear the spotter who directs them on the track. With our **HELMET OF SALVATION** we're wired to hear God and he helps us avoid the schemes of the enemy and protects our minds.

Drivers rely on pit crews to help make decisions on how to keep their cars on track which includes changing **TIRES**. By pulling into the "pit stop" at church helps us hold up our **SHIELD OF FAITH**.

With the **SEATBELT** secure, a driver can walk out of a crash without harm. This reminds us of the **BELT OF TRUTH** and being secure in Christ and the truth of God's Word in our lives.

As a driver, it is important to refer to the car **MANUAL** when something isn't working right inside the engine. Our manual in life is the Word of God which is the **SWORD OF THE SPIRIT**.
