

MSI BIMINI MAGNET MOUNTING SYSTEM

There are two components you need for the installation:

- 1) Stainless neodymium magnet base

- 2) Epoxy coated neodymium magnet for the underside of the bimini. **DO NOT USE** steel washers, they rust and have a fraction of the holding strength of the epoxy coated magnets.

Screw magnet base to the eyelets of each panel as illustrated below:

Place panels on top of bimini top between the metal supports. **DO NOT INSTALL OVER METAL SUPPORT BARS.** Attach the epoxy coated magnets to the underside of the canvas. **ALL DONE !**
