Patient

Name: KBPRIDE THE BEST OF CHER TS51899101
GYPSY
Owner: 981020047262165
ID: 981020047262165
Species: Canine
Breed: Cavalier King Charles spaniel
Gender: Female
Age: 1 years
Date of Birth: 3/18/2021

Cavalier King Charles Spaniel COMS Evaluation

Study Date: 4/16/2022

Clinical Information:

Assessment for caudal occipital malformation and syringohydromyelia.

Exam:

Brain and cervical spine, sagittal and transverse plane T2 images.

Findings:

Chiari-like malformation present:	Mild
Syringomyelia:	Grade 0
Syringomyelia location/size(mm):	NA
Atlanto-occipital overlap grading:	Grade 0
Dorsal compressive AA band grading:	Grade 0
Medullary elevation/kinking:	Absent
Ventricular dilation:	Mild
Cerimunos Otitis:	None

Dr. Stephanie Nykamp, DVM, MSc, Dipl. ACVR

Grading Scheme

Syringomyelia

- Grade 0 - none
- Grade 1 - central canal dilation less than 2 mm
- Grade 2 - central canal dilation greater than 2 mm or separate syrinx

Atlanto-occipital overlap:

- Grade 0 - absent
- Grade 1 - present

Dorsal compressive AA band:

- Grade 0 - normal
- Grade 1 - subarchnoid space reduced
- Grade 2 - subarchnoid space eliminated, questionable spinal cord compression
- Grade 3 - spinal cord compression

J Vet Intern Med 2015;29:887-892

Ventricular dilation (ventricle height to brain height = VB ratio)

- Normal - VB ratio less than 15%
- Mild - TextVB ratio 15-20%
- Moderate - VB ratio 21-25%
- Severe - VB ratio greater than 25%
