

FOUR COLORS

THAT LOOK GOOD
ON EVERYONE

What Makes a Color Work for You?

Did you know not all colors work for everyone? Contrary to popular belief, black doesn't work for all of us. In the right colors, we shine from the inside out. When we wear the wrong colors we look tired and older – and who wants that?

The good news is there are some colors that work well for everyone! In their proper intensity each of these four colors can work for all of us. The best shades of these colors to wear based on your hair color.
