

If You Were Going to the Dinosaur Time

When you went through the portal it started quiet then louder and louder until you saw a dinosaur! You thought you were using your imagination. But you saw and felt the dinosaur. Some were rough, some were smooth, some had plant-eating teeth, some were fast, some were slow. They were fast to catch food. Some had four legs and some had two. When you got out of the portal you saw a lot of things and everything was new. Not like at home. There were too many dinosaurs and you thought they

were going to bite you. But some were on your team, some were fierce but others were not.

One sunny day you met a terrible monster. But some other fierce dinosaurs were on your team and bravely fought another dinosaur down. You also try very hard to fight the dinosaur down. But the other dinosaur on your team killed it before you could fight it down.

Then you left through the portal. It was loud then it got quieter and quieter until you were home. When you were home you were exhausted. So you took a nap and never woke up until the next morning.
