

The under water adventure

Once upon a time, there were 2 explorers, who liked to chase adventure but one day they didn't need to chase it! One day they were going to Huntington beach to play in the ocean. While they were going there they decided that they should go inside a snack place to eat something, and then they were about to open the door but it was very hard to see so they opened it but it sucked them right in! Then they noticed it was a portal. Just a few seconds later they landed inside the twilight zone of the ocean! But it was a good thing they landed in a submarine."Wow one of them said they were both amazed but then they were like how do we get out of here? They thought and they thought,until 1 of them had an idea "how about we just ask the driver to take us home" said 1. "No I think there is no driver I think it's an auto pilot submarine" said the other one.

Okay.but then came a rampaging pod of orcas! The explorers yelled COME ON MOVE IT! But the submarine wouldn't move. They yelled even louder but it still would not move. The orcas got closer and closer they yelled EVEN LOUDER and finally the submarine started to go at turbo speed and they lost the pod. Phew they both said as the submarine got slower.But then a shark was beside the submarine "ugh!" one of them said.The submarine went faster as the shark chased them and officially had lost the shark. "Now what will we run into? said one of them a giant squid?I don't know said the other one maybe?Just then they saw the coral reef.It's beautiful they said and then they heard a whale song and even smelled a school of tuna fish. wow these little squids are so soft and this put your arm through hatch is so cool "I'm gonna drink a little water it tastes very salty." Lets see if we can find a blue whale good idea hey I found 1 and another there are two of them.

"Hey I found something else a door and it leads to home lets go. Wait we have to 'unlock it first. But where's the key? It says that we have to find it. Okay submarine give us scuba diving gear okay ready lets go find the key. Hey I found the key's map. Okay so turn west to the seaweed plants now north to the underwater cave now wait east to the underwater VOLCANO! Yep it's okay according to my phone it won't be erupting until next week. Phew okay now let's go now we just have to get it and go home. And in a second they were back at the door okay now let's open it. Huh? We're home!!!

The End
