

portals to a secret  
world

I found all three portals. It is not a rumor! The first portal is connecting from my bedroom to a forest. There is a door hidden in my closet in my bedroom, and it connects to the famous Amazon forest. In there, you can see snakes, monkey, ants, crocodile. It is hot and wet. The forest has three layers, the top layer is a canopy up in the sky and underneath is the forest floor. It is exactly what I read about from the magic tree house serie #6 Afternoon on the Amazon. I like to hang out there in the weekend in the afternoon and check on insects and animals. But I don't sleep in the forest because it's icky and muddy. So I usually just find a boat and then row along the river. When it gets dark I find fire flies and put them in a glass jar then I will find my door to the portal and then go back to my bedroom to sleep.

The amazon rainforst,

The second portal is connecting from my school to outer space. The entrance is in my school library. There is a very small door, in my school library in the chapter sections. It is about my height and I am quite tiny, that is why nobody else has discovered that door. Every Thursday we go to the library after recess. To get to the portal, I knock at the door and open and when I get in there, there is a dark room and astronaut outfits. I see other planets like Venus and Mars and the rest in solar system, kind of what I read from the book "DK Readers - Space Explorer." I can also see the earth and a space shuttle. I usually cannot stay long in the outer space because if I am away for so long then my teacher will not be able to find me and I would be in trouble.

The outer space

The third portal is connecting from the children's department of the central library to cloud town where the unicorns are living in. In the girl restroom when you stand on the toilet and then flush it, it will take you to cloud town. Kind of like what we read in Harry Potter where the toilet can lead you to the Ministry of Magic. I only went there once and the door disappeared so now I never visit again. My last visit was an adventure. Cloud town was beautiful. I saw a meadow and a magical pond and unicorns living happily. However, there was trouble in the land, a bad dragon showed up. The dragon had six tails, four legs and one head. It invaded cloud town. The unicorns had to use every bit of energy to save cloud town and the world against the dragon. But then all the unicorns had died during the war. Luckily hope was not lost... behold the queen of unicorns! The queen had to use every bit of her magic and she defeated the dragon! Now the land was peaceful and calm. The queen showed me the way out and then I waved good bye.

The End P.5

Cloud town,

P. 6

## Portals to the Secret World

I found all three portals! It is not a rumor! The first portal is connecting from my bedroom to a forest. There is a door hidden in my closet in my bed room, and it connects to the famous Amazon forest. In there, you can see snakes, monkeys, ants, crocodiles. It is hot and wet. The forest has three layers, the top layer is a forest canopy up in the sky and underneath is forest floor. It is exactly what I read about from the Magic Tree House series "#6 Afternoon on the Amazon". I like to hang out there in the weekend in the afternoon and check on insects and animals. But I don't sleep in the forest because it's icky and muddy, so I usually just find a boat and then row along the river. When it gets dark, I find flies and put them a glass jar, and then I will find my door of the portal and then go back to my bedroom to sleep.

The second portal is connecting from my school to the outer space. The entrance is in my school library. There is a very small door in my school library in the chapter sections. It is about my height and I am quite tiny, that is why nobody else has discovered that door. Every Thursday we go to the library after recess. To get into this portal, I knock at the door and it open and when I get in there, there is a dark room and an astronaut outfit and space walking gears in my size. Then behind the gears there is a secret door and it leads to the outer space. I see other planets like Venus and Mars and the rest in the solar system, kind of like what I read from the book "DK Readers - Space explorer". I can also see the earth and a space shuttle. I usually cannot stay for long in the outer space because if I am away for so long then my teacher will not be able to find me and I will be in trouble.

The third portal is connecting from the Children's department of the central library to Cloud Town where the unicorns are living in. In the girl's restroom, when you stand on the toilet and flush it, it will take you to Cloud Town, similar to the story of Harry Potter where the toilet can lead you to the Ministry of Magic. I only went there once and the door disappeared, so now I never visit there again. My last visit was an adventure. Cloud town was beautiful. I saw a meadow and a magical pond and unicorns living there happily. However, there was trouble in the land as a bad dragon showed up. The dragon had six tails, four legs and one head. It invaded Cloud Town. The unicorns had to use every last bit of energy to save the Cloud Town and the world against the dragon. But then all the unicorns died during the war. Luckily hope was not lost... behold the queen of unicorns! The queen had to use every bit of her magic and she defeated the dragon! Now the land was peaceful and calm. Then, the queen showed me the way out and I waved goodbye.
