"THE opposite of COURAGE in our society is NOT cowardice; it is conformity."

- Earl Nightingale -

## CONSUMER CONFIDENCE

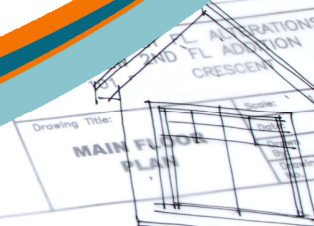

Consumer confidence index (CCI) Amplitude adjusted, Long-term average = 100, Jan 2014 - Feb 2022

### What Is Consumer Confidence and How Is It Measured?

Consumer confidence is a catch-all phrase for the opinions and attitudes of consumers about the current and future strength of the economy. A psychological concept, consumer confidence is difficult to measure. The University of Michigan and Conference Board both measure consumer confidence by asking a random sample of consumers five questions about current economic conditions and expected future conditions. Consumers also are asked to assess their personal financial situation. -St. Louis Fed-

DeBary, Florida

We visited this restaurant right when they opened at 11:00am. We didn't sit outside since it was too cold and rainy. But this restaurant is always hopping with activity whenever we drive by. It's located in DeBary, Florida, just 2.6 miles south of the Sunrail station off 17 92.

We started off with their hot artichoke appetizer with pita. The pita was deep fried in a wonderful tasting oil. Had the same texture as a chalupa. It was so very good - unbelievable, in fact. Our server was really nice and suggested a few items including this appetizer.

Our table had a pulled pork sandwich one with bbq sauce served on a pretzel roll. The stir fry could be ordered with shrimp, chicken, beef, or just veggies. Their sauce was a spicy sweet thai chili sauce. The burger had bacon jam

served on the side with blue cheese on the burger and a blue cheese dressing served on the side. The bacon jam was very smoky and sweet.

We will definitely return just so we can try more menu items.
